

Washington Metropolitan Area Transit Authority

FY2026 PROPOSED BUDGET

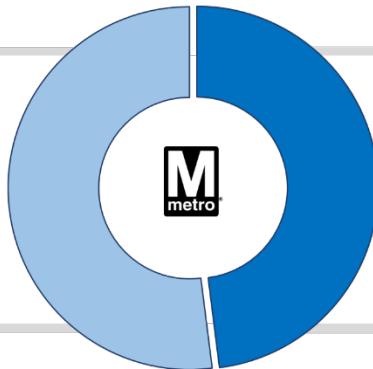

EFFECTIVE JULY 1, 2025

METRO | AT A GLANCE

FY2026 Proposed Budget

Capital **\$2.4B**
Operating **\$2.6B***

\$5.0B
total budget

*Includes reimbursables and debt service

Regional Investment

Metro station areas = **3%** of land

Metro repays the region's investment many times over.

30%
of property value
65%
of new office developments

Transit customers

save

\$2,800

per year

on average, by not having to pay for rideshares, taxis, parking, and tolls

Accomplishments

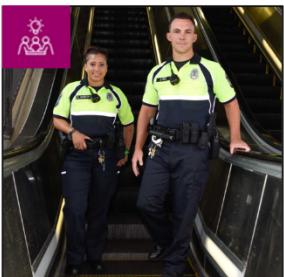

Metro's **Strategic Transformation Plan** is our North Star to Deliver a Modern, World-Class Transit System

Service Excellence

Activated Automatic Door Operations across all lines, a critical step in Metro's rail automation program

Talented Teams

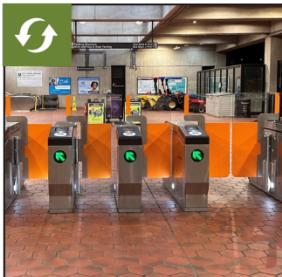

Welcomed the inaugural class of the new Metro Transit Police Department Criminal Justice Academy

Regional Opportunity & Partnership

Restructured the Metrorail and Metrobus operating subsidy allocation formula to improve transparency and better align service costs with regional benefits

Sustainability

Completed installation of more-secure faregates at all 98 Metrorail stations and fareboxes on 1,500 buses to reduce fare evasion

PRESENTED TO

**Washington Metropolitan Area Transit Authority
District of Columbia**

For the Fiscal Year Beginning

July 01, 2024

Christopher P. Morill

Executive Director

METRO | Board of Directors

The Washington Metropolitan Area Transit Authority is governed by a Board of Directors that determines agency policy and provides oversight for funding, operations, and expansion of transit facilities within the Transit Zone. The 16-member Board of Directors is composed of eight Principal Directors and eight Alternate Directors. The District of Columbia, State of Maryland, Commonwealth of Virginia, and the federal government each appoint two Principal and two Alternate members. The Board performs its duty through three committees: Executive, Finance and Capital, and Safety and Operations. At the time of publication, one alternate board position for the District of Columbia is vacant.

THIS PAGE INTENTIONALLY LEFT BLANK

GENERAL MANAGER AND CHIEF EXECUTIVE OFFICER'S MESSAGE

I'm incredibly proud of our talented team and all the accomplishments we've achieved this fiscal year. Ridership is growing and customer satisfaction is at an all time historic high, driven by our commitment to deliver the best service this region deserves. Metro is pivotal to the region's success. This past year marked a key milestone in addressing the structural funding deficit that Metro has faced since its inception. Thanks to the hard work and dedication of our Board of Directors and collaboration with our jurisdictional partners, we successfully avoided severe service cuts and fare increases that would have decimated our ability to deliver the best service to this community. However, our work is not yet done.

We must continue to pursue sustainable funding, finding cost efficiencies in our business model. I'm happy to report that our continued efforts in strong financial management led to our ninth clean audit this year, which supports our Strategic Transformation priority of Sustainability. Efficiencies in the way we work with other transit partners in this region is also paramount for our future. For this reason, Metro remains a dedicated partner in DMV Moves,

a regional initiative aimed at creating a unified transit vision. Through this partnership, Metro and the Washington Council of Governments have connected business, community, and government leaders to create a more efficient, reliable and accessible transportation network that meets the needs of our region.

Our Strategic Transformation Plan, *Your Metro, the Way Forward*, guides Metro's financial, operational and strategic decisions by outlining our vision, mission and goals. My proposed FY2026 Budget of \$5.0 billion includes \$2.6 billion for operations and \$2.4 billion for capital projects. This budget not only supports our strategic goals of Service Excellence, Talented Teams, Regional Opportunity and Partnership, and Sustainability, but also responds to external economic and regional factors such as changes in commuting patterns and ongoing funding challenges.

Despite what may lie ahead, we continue to put our customers first. The return of our entire 7000-series fleet and the arrival of our 8000-series cars creates an even more reliable Metro. The implementation of Automatic Door Operations (ADO) are improving system performance and reliability, as well as helping us prepare for additional capacity needs as regional growth continues. And for the first time in 15 years, we are back operating in Automatic Train Operations (ATO), which is how our system was originally designed to operate. I could not be prouder of this team for this commitment and hard work to reach this milestone.

Looking ahead to FY2026, we will build on recent service improvements and continue our emphasis on safety and the customer experience. The approval and implementation of the Better Bus Network Redesign will create a bus system that meets the region's travel needs, making service improvements and route adjustments for the first time in 50 years. Our investments in taller, more resilient faregates helped us significantly reduce rail fare evasion in our rail system by 82%. As we bolster our MTPD presence at bus terminal stations to enforce fare payment, operation "Fares Pay for Service," our efforts ensure all pay for the services that's being delivered. The dedication of our Special Police Officers, Crisis Intervention Specialists, Ambassadors, and community outreach units have reduced serious crime in our system to its lowest level in five years.

My FY2026 proposed Budget continues this momentum and will advance service excellence as the leading transit agency in the region. Our pursuit of strategic initiatives to modernize our system will help the region meet its mobility, environmental, and economic goals. Now is the time to develop the world class regional transit system we need by supporting predictable funding to make our future planning more thoughtful. As you travel throughout the National Capital region, I hope you choose your Metro system. As we move forward together, please let us know how we can better serve you.

See you on board,

Randy Clarke
General Manager and Chief Executive Officer

Your Metro, The Way Forward

Metro's Mission: Your Metro – Connecting you to possibilities

Metro's Vision: The region's trusted way to move more people safely and sustainably

Metro's vision will be achieved by advancing four goals that were developed through data and direct input from our customers, staff, and stakeholders:

Goal 1: Service Excellence

- Objective 1A) Safety and security
- Objective 1B) Reliability
- Objective 1C) Convenience

Goal 3: Regional Opportunity and Partnership

- Objective 3A) Regional network and partner service optimization and transit equity
- Objective 3B) Community partnership and engagement

Goal 2: Talented Teams

- Objective 2A) Recruitment and retention
- Objective 2B) Engagement, empowerment and recognition
- Objective 2C) Professional and technical skill development

Goal 4: Sustainability

- Objective 4A) Financial sustainability
- Objective 4B) Environmental sustainability

METRO | STRATEGIC PLANNING

Metro's Strategic Transformation Plan (the Plan), *Your Metro, The Way Forward*, was adopted in February 2023 and outlines Metro's mission and vision. The Plan identifies four strategic goals: **Service Excellence**, **Talented Teams**, **Regional Opportunity & Partnership**, and **Sustainability** in support of Metro's values, mission, and vision. The Plan was developed by the Board of Directors and senior management to guide Metro's decision making over the next five years. It serves as our North Star, guiding how we fund the Metro the region needs, wants, and deserves. As part of the Plan, Metro developed and incorporated performance metrics to monitor plan progress. These Key Performance Indicators (KPIs) are critical to the Plan, ensuring goals and objectives are data-driven and employees remain accountable for and transparent about progress.

The Plan establishes clear priorities, expands transparency around performance metrics, and promotes collaboration within our teams and with partners. Metrics identified in the Plan are used to drive performance and

operational decisions. Metro reports on these metrics to the Board and its committees regularly—including through our Annual Transformation Report found at wmata.com—with metric progress and success evaluated based on targets to track improvements or when we aren't meeting targets.

Each goal within the Plan identifies supporting objectives and associated KPIs. Appendix I of this budget book presents Metro's performance metrics.

Metro executes the business initiatives necessary to advance our strategic goals and objectives through several key initiatives, which are broken into two categories: **Administration** and **Operations**. These initiatives span multiple years, providing a long-term strategy for business continuity, with milestones to align Metro's day-to-day decision making with its strategic outlook. The graphic below outlines the initiatives within each category.

Administration

- Environmentally Sustainable
- Financial Sustainability
- Employee Development
- Employee Engagement and Performance
- Workforce Planning and Acquisition

Operations

- Fare System Modernization
- Security
- Data & Information Strategy
- Customer 360: Modernized Customer Experience
- System Automation
- Better Bus Program
- Rail Car Modernization
- Advanced Maintenance Program

This section outlines the key initiatives. These high-level initiatives are often cross-departmental and will help Metro achieve our strategic goals of **Service Excellence, Talented Teams, Regional Opportunity and Partnership, and Sustainability**. This section highlights the need to be addressed and the importance of addressing it. Each of these key initiatives are associated with KPIs from the Plan, and also various sub-projects that will help Metro achieve these initiatives.

Administration

The initiatives in the Administration category will transform the workforce culture by focusing on talented teams and improving core business functions to enable better-informed decisions. These initiatives aim to reduce costs and further develop environmental sustainability efforts, while advancing strong working relations with external partners.

Employee Development

Metro is working to deliver best-in-class training, particularly through our Center of Excellence Training Academy. As Metro continues to transform and advance, it is critical that Metro's workforce is prepared for the new procedures and tasks of this evolving agency. Also, Metro has set a target of having 75 percent of staff agree that "I receive the help I need to learn and grow professionally", and this initiative will help achieve that goal.

Employee Engagement and Performance

This initiative includes efforts to increase job satisfaction and productivity through enhancing and strengthening organizational culture. Engaged employees are more productive and less likely to leave Metro. Retaining top talent for all types of jobs, and ensuring staff feel empowered to excel and innovate within their area of responsibility will help Metro be a more nimble and cost-effective organization ready to support transformations throughout the organization.

Environmental Sustainability

Efforts under this initiative will establish plans and processes to reduce Metro's environmental impact. This includes converting the bus fleet to 100 percent zero-emissions vehicles by 2042, and the Access and non-revenue fleets to the same standard by 2050.

Metro's Board has set a goal of achieving carbon-neutral operations by 2050. Achieving this will require moving to a zero-emission fleet of vehicles and tools, as well as sourcing electricity from renewable sources (currently at 33 percent). Metro also plays a major role in helping the region meet its goals to reduce greenhouse gas emissions. In addition, the transition to a zero-emission

fleet reduces noise experienced by communities on bus routes and improves the customer experience.

Financial Sustainability

Metro is partnering across the region to enhance regional coordination, develop long-term regional plans, and secure long-term funding for Metro. We are also working to improve core business functions to ensure efficiency and implement best practices and technologies.

Metro does not have a sufficient dedicated funding stream, which contributes to budget uncertainty and the risk of service cuts. Efforts to streamline business processes can help reduce costs and make Metro a more efficient organization. At the same time, efforts to increase ridership can lead to higher revenues.

Workforce Planning and Acquisition

Metro is working to improve the process for hiring new employees to increase efficiency and decrease the time it takes to hire. This initiative also includes efforts to improve the overall planning for agency-wide hiring and succession planning to have a more proactive process for hiring and maintaining a skilled and professional workforce. It is important that Metro has the necessary workforce in place throughout all levels of the organization to continue best-in-class operations and meet the demands of the system.

Operations

The initiatives in the Operations category aim to improve customer communications; modernize fleet, signals, staffing, and fare technology; and maximize connectivity and accessibility; all while improving safety and customer service.

Advanced Maintenance Program

This initiative includes a variety of sub-projects to develop and implement processes and a culture surrounding maintenance to ensure that Metro is using the most advanced techniques and efficient processes available. It includes ensuring staff have the tools and information they need to plan and execute preventive maintenance.

Advanced maintenance strategies will help ensure our system can support the service our customers want and deserve, including maximizing on-time performance, all while minimizing costs. Maintenance activities comprise approximately 33 percent of Metro's operating expenses annually.

Better Bus Program

Metro is working internally and with its regional partners to deliver a full redesign of the bus network and implement a technology-driven bus priority program. Over 50 percent of customer trips are on bus, and on-time

performance and bus speeds have declined in recent years due to traffic congestion. This program will help Metro provide more frequent and reliable service, create new connections, and reduce travel times to meet its goals of achieving 85 percent customer satisfaction and 80 percent on-time performance.

Customer 360: Modernized Customer Experience

Metro is working to produce consistent, streamlined, high-quality customer communications and engagement across all channels and modalities – including the in-station experience – to ensure a best-in-class transit experience and wayfinding. Customer 360 builds digital experiences that allow customers to determine the fastest route, provides estimated times of arrival and opens easy pathways to get questions answered quickly.

Data & Information Strategy

Efforts under this initiative seek to transform Metro into a fully digital enterprise with processes for collecting, analyzing, and using data to inform decision making. To be a leader in the industry, Metro needs to have access to our data and use that data to make better informed decisions.

Fare System Modernization

This initiative focuses on the modernization of Metro's fare systems, including optimized fare strategy, new and more reliable equipment, and contactless, cashless fare systems and software. It also includes continued efforts to reduce fare evasion and provides easier ways for customers to pay for their travel.

Metro's fare collection software and hardware, especially the vending machine program, is at the end of its useful life. Maintaining the current equipment is getting more costly due to obsolete parts and more frequent

breakdowns. Metro is committed to moving towards open payment platforms which will reduce the amount of hardware and software in our system permanently.

Rail Car Modernization

Metro is working to modernize our rail fleet with the latest technology. Ensuring the full fleet of 6000- and 7000-series railcars are digitized and in service will improve safety and help Metro provide more reliable service and meet its on-time performance target. At the same time, the new 8000-series will incorporate design elements that improve the customer experience, such as open gangways, storage for luggage and bikes, and additional digital information screens.

Safety & Security

Metro will continue to research and implement current and future technology to enhance security throughout the system for both customers and staff, focusing on real-time video surveillance. Safety is one of Metro's core values and safety from crime is one of the top three drivers of customer satisfaction. A safe system is critical to improving ridership and customer satisfaction.

System Automation

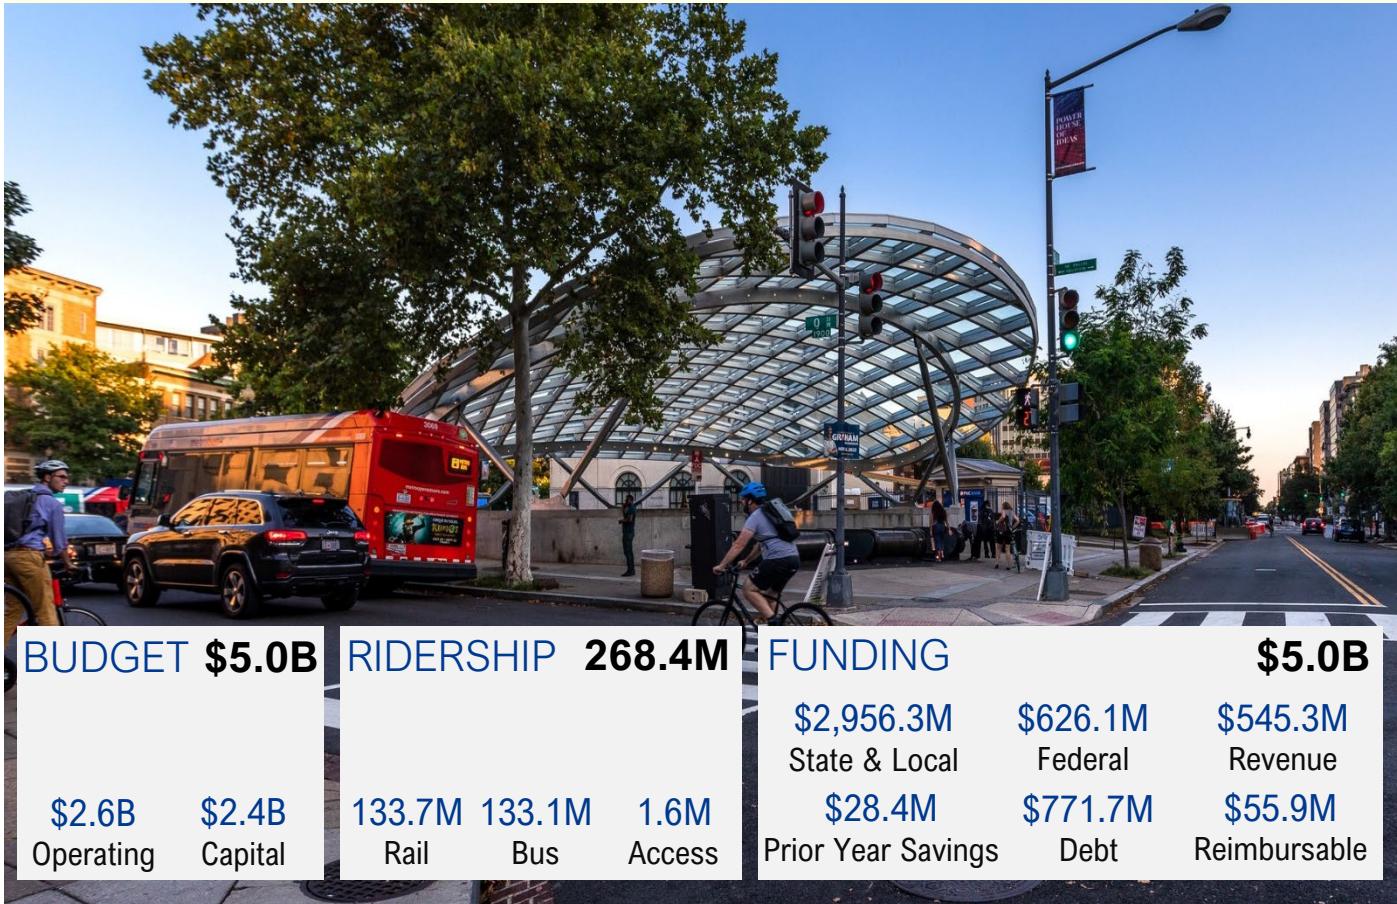

This initiative works towards fully automating rail operations. It also includes preparations for bus automation, including automation in bus yards.

Automation provides for safer vehicle movements, more reliable service, and reduced costs. Rail automation increases safety and reliability while reducing travel times, leading to increased customer satisfaction. It will help Metro achieve the 95 percent rail on-time performance goal established in the Strategic Transformation Plan. Yard automation increases the efficient use of space and prepares Metro for future automated on-street operations.

THIS PAGE INTENTIONALLY LEFT BLANK

Chapter 1 – Budget Summary

Metro connects people -- providing safe, reliable transportation to families, commuters, and tourists.

Pictured: Outer view of Metrorail station.

Executive Summary

Metro unites the Washington D.C. Metropolitan region and drives economic activity through its commitment to safe and reliable transit solutions. Metro services connect people to jobs, schools, attractions, key destinations, and recreational activities, while advancing equity and promoting environmental sustainability. As an engine for economic growth, Metro attracts development, creates new opportunities for housing and generates new tax revenue. As commuting patterns and work schedules continue to evolve, Metro fosters connections through accessible and affordable transportation options and is transforming service to meet the region's needs. Ensuring current levels of service and promoting long-term planning requires reliable and predictable funding. The FY2026 Proposed Budget adopts a regional approach with collaboration and contributions across all

stakeholders to deliver the most useful network within available resources.

Metro services are vital for daily commuters and visitors alike, offering efficient travel that enhances the region's overall quality of life. Through its extensive network of Metrobus, MetroAccess and Metrorail services, Metro helps alleviate traffic congestion, reduce greenhouse gas emissions, and encourage economic growth. By facilitating reliable alternatives to conventional transit options, MetroAccess supports the independence and mobility of individuals whose disability prevents the use of Metrobus and Metrorail services by providing access to essential services, employment, and community engagements. Metro supports regional sporting events, concerts, and festivals through coordinated transit solutions to accommodate large numbers of attendees.

As the public transit agency supporting the nation's capital, Metro provides essential transit support for national and international events such as the National Cherry Blossom Festival, Fourth of July celebrations, presidential inaugurations, and international summits. Metro's commitment to maintaining and preserving its expansive infrastructure ensures it continues to meet the evolving needs of the region's diverse and dynamic population and its visitors.

Metro's Strategic Transformation Plan, *Your Metro, The Way Forward*, outlines the mission, vision and strategic goals of Service Excellence, Talented Teams, Regional Opportunity and Partnership, and Sustainability that guide Metro. The FY2026 Proposed Budget advances each of these strategic goals through its Action Programs and initiatives with service enhancements such as Automated Train Operations (ATO), new options for bike storage solutions, and implementation of an open payment system for contactless payments. Recent service improvements, simpler fares, and renewed emphasis on customer experience are growing Metro ridership and customer satisfaction.

Advancing Service Excellence

ATO will help trains operate more safely and efficiently through automatic control of trains' acceleration, deceleration, and speed.

The FY2026 Proposed Budget is also influenced by external economic, legislative, and regional factors, including changes in commuting and ridership patterns, dependency on legislatively restricted jurisdictional subsidies, and structural funding challenges which the system has faced since inception. Financial stability and long-range regional planning are critical to optimizing service. The pandemic underscored the need for flexibility and adaptability in public transportation. Metro has responded with innovative strategies such as mobile ticketing applications and real-time updates offering a more convenient customer experience. Despite Metro's successes, fiscal challenges resulting from changes in commuting and work patterns, a lack of dedicated operating funding, and unprecedented inflationary pressures in recent years have contributed to a structural operating deficit that significantly impacts planning and sustainability. Like transit agencies nationwide, the Covid-19 pandemic altered Metro's operating model through significantly reduced ridership beginning in FY2020. To provide relief and help transit agencies continue to offer safe and reliable service to customers, the federal government provided temporary operating funding through legislation such as the American Rescue Plan Act (ARPA). While federal relief funding played a critical role

in bridging Metro's funding needs and ensuring continued delivery of essential transit service as the region recovered, Metro will spend the remainder of its ARPA funding during FY2025.

With the conclusion of federal relief funding, Metro relies on its traditional funding sources for its operating budget – operating revenue and subsidies from Metro's jurisdictional partners in the Commonwealth of Virginia, the State of Maryland, and the District of Columbia. Metro has also aggressively pursued expense reductions with targeted cost-savings and efficiencies. Additionally, innovative customer experience advancements and service improvements have encouraged ridership and increased revenue, with ridership demonstrating strong year-over-year growth. Regardless of Metro's positive momentum, resolving the structural funding shortfall requires a collective solution. The FY2026 Proposed Budget relies on jurisdictional subsidies to provide a robust and reliable public transportation system. Following regional collaboration, jurisdictional partners committed additional subsidy funding in FY2025 to address funding challenges and support a fiscally responsible budget that offers the region a realistic transit solution. The FY2026 subsidy includes three percent annual growth and an additional \$95 million to replace one-time savings used in FY2025. While Metro and its jurisdictional partners have resolved immediate funding constraints, long-range funding concerns persist.

Advancing Regional Partnerships

Metro and the Metropolitan Washington Council of Governments came together in a historic joint meeting to launch a comprehensive regional transit initiative, DMVMoves, that will shape how we plan, fund, and operate public transit in the DMV.

Metro is not alone in these funding constraints. Systemic funding challenges plague transit operators across the region and risk the region's ability to meet its long-term goals. Metro is committed to a regional transit solution built to support the region's emerging transit needs and advance integrated transit improvements. As such, Metro has played a pivotal role in the launch of DMVMoves, a comprehensive regional transit initiative. Through this project, Metro and the Washington Council of Governments have connected business, community, and government leaders to create a unified vision and sustainable funding model for the region's transit. Metro and its DMVMoves partners aim to create a more efficient, reliable, and accessible transportation network that meets the needs of the growing population.

The FY2026 Proposed Budget prioritizes service optimization, financial stability, long-range planning, and

environmental sustainability. The service optimization goals in the FY2026 Proposed Budget are designed to drive ridership, increase equity, and optimize the use of our assets. As ridership continues to grow, Metro is proactively anticipating needs for additional capacity as passenger loads at key locations are approaching crowded conditions. Metrorail service optimization concepts will focus on adding peak capacity, adjusting rail service patterns and frequencies, and expanding weekend rail hours of operation, while ensuring the most efficient use of rail assets. Metro will also implement the first phase of its Better Bus Network in FY2026. This realignment will increase capacity within current resources, while also preparing for potential future expansion.

To further promote financial stability and long-range planning, Metro has expanded its budget process to include an operating forecast for FY2027. This forecast is not part of Metro's formal budget submitted for adoption by the Board, but rather Metro's current budget projection for FY2027 to support long-range planning.

The FY2026 Proposed Budget continues to advance Metro's commitment to environmental sustainability by investing in new technologies and practices to enhance energy and cost efficiencies. Metro remains committed to the expansion of the zero-emission bus fleet and on-site solar projects, as well as prioritizing transit, walking, and biking alternatives through transit-oriented real estate development. To support environmental goals, Metro is engaged in ambitious sustainability projects, such as

electrifying the bus fleet, constructing new facilities to Leadership in Energy and Environmental Design (LEED) certifications, and investing in cleaner energy.

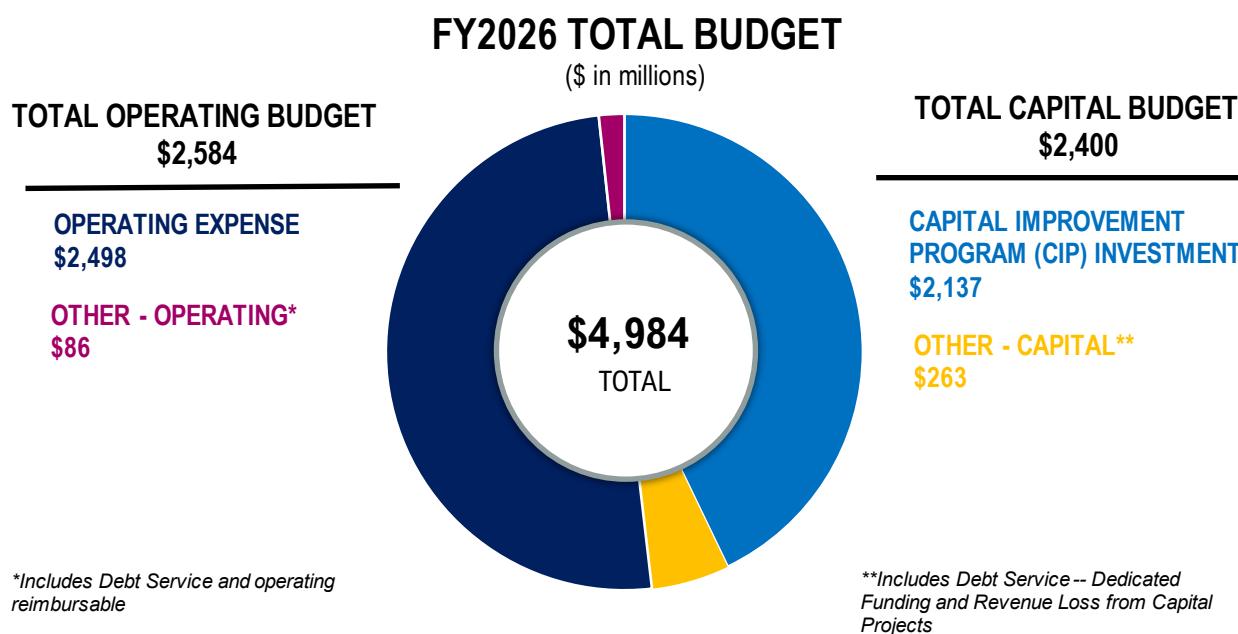

The FY2026 Proposed Budget of \$5.0 billion includes an operating budget of \$2.6 billion and a capital budget of \$2.4 billion. Metro's \$2.6 billion operating budget includes operating expenses of \$2,498.2 million to support its three modes Metrobus, Metrorail and MetroAccess. Additionally, the operating budget funds reimbursable projects of \$13.5 million and debt service of \$72.3 million. Metro's capital budget of \$2.4 billion funds capital expenditures of \$2,136.6 million across its six major investment categories, as well as debt service for dedicated funding of \$253.3 million and revenue losses from capital projects rehabilitation and repair work of \$10.0 million.

Supporting Talented Teams

The FY2026 Proposed Budget of \$5.0 billion supports 13,646 positions funded by the Operating and Capital Budgets.

Metro continues to support the regional economy. With dependable funding, Metro can build on important steps taken in previous years to improve service and continue its customer-focused approach that promotes the economic and environmental goals of our region. Metro continues to look toward the future focusing on services and initiatives that will encourage the region's long-term livability and economic growth.

FY2026 Operating Budget

As an essential transportation provider to the region, Metro keeps the region moving and advances regional goals for growth, sustainability, and equity. Metro's operating budget includes the expenses necessary to operate Metrobus, Metrorail, and MetroAccess, funded through the revenues generated and jurisdictional subsidies provided to support these operations.

The landscape of public transportation fundamentally changed during the Covid-19 pandemic and subsequent recovery, altering ridership patterns, passenger revenue and operational strategies. In response, the federal government provided operating relief funding to assist transit agencies nationwide. Metro will spend the remainder of its federal relief funding during FY2025. As such, the FY2026 Proposed Budget relies on Metro's traditional funding sources for operations.

Advancing Financial Sustainability

Metro has integrated long-range financial planning into its annual budget process by including a second-year forecast for planning purposes. This addition will advance financial transparency and sustainability.

The FY2026 Proposed Budget addresses the impacts of persistent changes in ridership, the end of federal relief funding and ongoing structural funding challenges. In addition, the FY2026 Proposed Budget incorporates new Collective Bargaining Agreements (CBA) negotiated with Metro's labor unions. The FY2026 Proposed Budget reflects robust financial management by Metro through administrative efficiencies and other cost reductions, as

well as service optimization to maximize ridership within current funding. Metro is advancing service efficiencies through train automation and optimizing its use of 6-car and 8-car trains. Service enhancements in the FY2026 Proposed Budget include the implementation of the Year One Better Bus Network and adding capacity on Metrorail to address ridership growth through changes to service patterns and frequency. Metro will expand weekend hours of operation on Metrorail to support regional travel needs. All fares will remain at FY2025 levels.

The FY2026 Operating Budget of \$2,498.2 million (excluding debt service and reimbursables) is funded with \$545.3 million in operating revenue and \$1,924.5 million in jurisdictional subsidies. In addition, Metro projects \$28.4 million in prior year savings to apply to FY2026.

Metro continues to show strong year-over-year recovery despite changes in ridership patterns as businesses have shifted to hybrid and remote working arrangements. This fundamental shift continues to impact the number of peak-hour, daily commuters. In response to the evolving nature of commuting habits, Metro continues to adapt to its new reality through customer-focused service enhancements. Total ridership is budgeted at 268.4 million trips, an 18.5 percent increase relative to FY2025 budgeted ridership.

Operating revenue in the FY2026 Proposed Budget of \$545.3 million includes passenger fare revenue and non-passenger revenue. Passenger revenue is 81.5 percent of operating revenue. At \$444.5 million, passenger revenue for FY2026 is projected to increase 14.8 percent from the FY2025 Approved Budget. Non-passenger revenue includes parking, proceeds from joint development agreements and the sale of fiber optic leases, and other

Service Changes in the FY2026 Proposed Budget

- Implement Year One of the Better Bus Network redesign to include:
 - 11 more routes in the Frequent Service Network
 - New connections to transit stations, jobs and other key destinations
 - Increased midday, evening and weekend service
- Operate the Yellow Line in two patterns at all times, with half of the trains terminating at Greenbelt and half terminating at Mt Vernon Square
- Expand Metrorail system hours of operation by opening at 6 a.m. on weekend mornings and closing an hour later at 2 a.m. on Friday and Saturday to better align with regional travel demand
- Provide additional Silver and Red Line trains along certain segments during busiest peak timing to offer "Super Peak" frequency
- Shift half of Silver Line trains to terminate at New Carrollton rather than Downtown Largo to balance service between Downtown Largo and New Carrollton

sources such as the interest on investments. For the FY2026 Proposed Budget, non-passenger revenue totals \$100.8 million, a \$0.3 million or 0.3 percent increase relative to the FY2025 Approved Budget.

Jurisdictional subsidies of \$1,924.5 million fund 77.0 percent of Metro's operating budget. To avoid draconian service cuts in FY2025, the jurisdictions provided additional subsidy funding and agreed to provide an additional \$95 million in FY2026 to replace one-time savings in FY2025. Metro's FY2026 Proposed Budget includes additional investment in Metrobus service, jurisdictionally sponsored by the District of Columbia and Arlington.

Metro continues to aggressively manage expenses and pursue operational efficiencies. Despite unprecedented inflation as the economy emerged from the pandemic, Metro continued to identify savings through administrative efficiencies, technological advances, and office consolidations.

FY2027 Operating Forecast

Metro remains dedicated to financial sustainability and transparency. As part of this commitment, Metro is presenting its FY2027 Operating forecast in addition to its FY2026 Budget. The FY2027 forecast is not part of Metro's formal budget submitted for adoption, but rather Metro's current projection for a future period. The FY2027

forecast incorporates multiyear economic outlook assumptions such as anticipated inflation, other macroeconomic trends, ridership estimates, and assumptions for future personnel growth, labor, and operating contracts.

Establishing financial objectives that extend beyond the current budget year can mitigate the pitfalls of short-term decision-making, ensuring spending and investments align with broader strategic goals. Multiyear financial planning may also help identify structural challenges and potential financial risks early, informing proactive strategies. This foresight fosters resiliency and adaptability to navigate economic fluctuations, market changes and unexpected expenses. By incorporating a long-range financial plan into its annual budget process, Metro can advance further financial health and operational continuity.

For planning purposes, Metro anticipates a three percent increase in jurisdictional subsidies in FY2027. Based on current assumptions, the FY2027 forecast projects ridership growth of approximately two percent based on regional population and employment trends, and revenue and expense growth of 1.8 percent and 2.8 percent respectively in FY2027. The following tables present Metro's FY2027 Ridership and Financial Forecast, based on current assumptions. These forecasts are for planning purposes and are subject to change.

Preventive Maintenance

Historical: Preventive maintenance (PM) includes operating maintenance costs eligible for reimbursement from the capital budget, subject to Federal Transit Administration (FTA) approval. The annual budget establishes the maximum amount of PM costs to be transferred from the operating budget to the capital budget. Historically, Metro has budgeted approximately \$60 million annually for PM transfers.

Recent Budget Years: Despite continued ridership recovery, changes in commuting patterns continue to constrain passenger revenue. To mitigate the impact on service during the recovery, Metro increased preventive maintenance transfers to relieve stress to its operating budget. However, these transfers decrease capital funding for infrastructure projects and may accelerate Metro's looming capital deficit.

- The FY2026 Proposed Budget includes a total PM transfer of \$129 million, \$69 million above the historical level of \$60 million.
- The FY2027 Operating forecast continues the higher PM transfer level to present a balanced budget under current funding assumptions. The FY2027 forecast projects a total PM transfer of \$160 million, or \$100 million above the historical amount of \$60 million.

RIDERSHIP BY SERVICE

(Trips in Thousands)	FY2023 Actual	FY2024 Actual	FY2025 Budget ²	FY2026 Budget ²	FY2027 Forecast ⁴
Metrorail ¹	95,813	123,166	113,713	133,717	136,392
Metrobus ²	102,477	117,540	111,408	133,069	135,730
MetroAccess	1,394	1,397	1,481	1,630	1,630
Total Ridership³	199,684	242,103	226,603	268,416	273,752

1. Ridership statistics beginning in January 2024 include both tapped and non-tapped ridership for Metrorail.

2. Metrobus ridership reflects Automated Passenger Count (APC) data

3. Metrorail ridership is based on linked trips; Metrobus ridership is based on unlinked trips from APC data; MetroAccess ridership is based on total passengers.

Unlinked trips are total boardings, while linked trips are total number of complete trips from origin to destination, including transfers

4. Forecast is **subject to change** and is for planning purposes only. Based on current economic and ridership growth assumptions.

OPERATING BUDGET – REVENUE AND EXPENSES

(Dollars in thousands)	FY2023 Actual ²	FY2024 Actual	FY2025 Budget	FY2026 Budget	FY2027 Forecast ³

FY2026 Capital Budget

Both the \$2.4 billion FY2026 Capital Budget and \$12.5 billion FY2026-2031 Capital Improvement Program (CIP), each inclusive of debt service and revenue loss from capital projects, focus Metro's capital investments on safety, state of good repair, and reliability of Metrorail, Metrobus, and MetroAccess assets. Of the \$2.4 billion FY2026 Capital Budget, \$2,136.6 million funds capital expenditures across its six major investment categories, \$253.3 million funds debt service and \$10.0 million in revenue loss from capital projects.

Metro's CIP is grouped in six major investment categories: Railcars and Railcar Facilities; Rail Systems; Track & Structures Rehabilitation; Stations & Passenger Facilities; Bus, Bus Facilities & Paratransit; and Operations and Business Support. Details regarding the Capital Budget and the Six-Year Capital Improvement Program can be found in Chapter 4. Additional information regarding WMATA's 10-Year Capital Needs can be found on-line at: www.wmata.com/initiatives/capital-improvement-program

FY2026 - FY2031 Capital Improvement Program

Dedicated capital funding in 2018 enabled investments in long-neglected state of good repair work. Metro's capital investments are defined through our CIP. The \$12.5 billion

planned FY2026-2031 CIP focuses on safety, state of good repair, reliability, security, and customer experience improvements with \$2.4 billion to fund the FY2026 Capital Budget (each inclusive of debt service and revenue loss from capital projects). The CIP includes Passenger Rail Investment and Improvement Act (PRIIA) funding, authorized by Congress through Metro's Fiscal Year 2031, as well as assumptions about increases to Federal formula funding over the six-year planning horizon. Federal financial participation, including the increase in federal investment under the Infrastructure Investment and Jobs Act (IIJA), is critical for funding Metro's capital investment.

Metro's six-year CIP investments of \$10.5 billion requires total funding of \$12.5 billion from the federal government, state and local government partners and other sources due to an expected \$10.0 million cost for revenue loss from service shutdowns for capital projects and \$2.1 billion of debt service.

Within the \$12.5 billion six-year funding plan, Metro is projecting \$4.0 billion from federal grant funding, based on the IIJA authorization for formula funds and PRIIA funding; \$2.9 billion in state and local contributions for matching of federal grants and system performance funds, of which \$10.0 million is expected to fund revenue losses from long-term service shutdowns due to major capital projects; \$3.0 billion in state dedicated funding; \$2.5 billion in debt, secured by dedicated funding; and \$126.1 million in funding from other local sources.

FY2026 Sources of Funds

Metro's operating and capital budgets are funded through a variety of sources including system generated revenues, state and local support, and federal funding sources.

State and local funding of \$3.0 billion supports both the operating and capital budgets. The jurisdictional operating contribution of \$1,996.7 million includes \$1,924.5 million of net operating subsidy and \$72.3 million of debt service contributions. State and local funding of \$959.6 million supports the capital program and includes \$500.0 million of dedicated funding, \$311.1 million in federal match and system performance funds, and \$148.5 million in state and local match to federal PRIIA grants.

Metro also receives federal funding in support of the capital program through Federal Transit Administration (FTA) and other federal grants. For FY2026, federal funding related to Metro's capital program totals \$626.1 million, which includes \$482.6 million from Federal Transit Administration (FTA) formula grants and other federal grants, as well as federal PRIIA funding. The PRIIA funding consists of \$143.5 million in support of the capital program and \$5.0 million for the Inspector General's Office. During the pandemic and recovery, Metro also received ARPA funding from the federal government to support operations. Metro has spent its remaining ARPA funding during FY2025.

Operating revenues derived from Metrorail, Metrobus and MetroAccess support the operating budget and total \$545.3 million, which includes passenger fare revenue of

\$444.5 million and non-passenger revenue of \$100.8 million. Non-passenger revenue consists of parking, advertising, real estate joint development and fiber optic proceeds of \$77.6 million and other sources of revenue of \$23.2 million.

Reimbursable project funding supports both the operating and capital budgets as follows:

- \$13.5 million for operating projects requested by jurisdictions or other third parties and safety/security programs
- \$42.4 million in jurisdictionally requested capital improvements

Dedicated funding debt proceeds totaling \$771.7 million support the capital program.

Total funding for FY2026 is slightly lower than FY2025; however, the composition of funding has shifted. Notable changes in funding (over 10 percent) include:

- Metro spent the remainder of its Federal Relief funding used to mitigate revenue losses during FY2025
- Revenue from passenger fares are anticipated to increase by 14.8 percent as year-over-year ridership continues to grow
- Metro expects to carry forward \$28.4 million from the FY2025 Budget
- Reimbursable funding varies based on projects

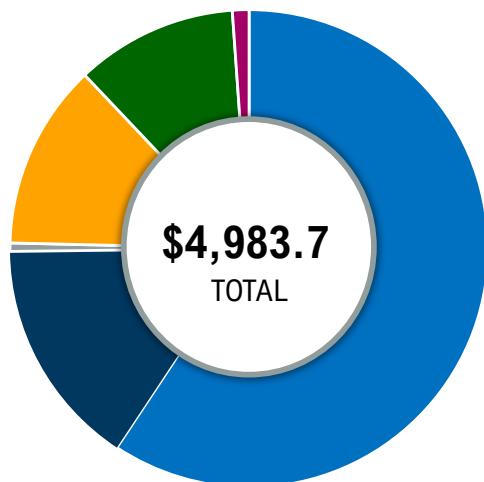

Pictured: Metrobus parked on a side road

Please note that chart and table totals throughout this publication may not add due to rounding.

2. Year-over-year variance is less than \$50,000 and thus rounds to \$0.0 for this table

3. WMATA Compact requires Metro to have a balanced budget (i.e. projected funding equals planned expense). See Appendix B for additional discussion

4. Totals may not sum due to independent rounding

Operating Subsidy

The FY2026 subsidy, excluding debt service payments, is \$1,924.5 million, an increase of \$171.9 million from the FY2025 Budget. Metro's jurisdictional partners include the District of Columbia, two jurisdictions in the State of Maryland (Montgomery County and Prince George's County), and six jurisdictions in the Commonwealth of Virginia (City of Alexandria, Arlington County, City of Fairfax, Fairfax County, City of Falls Church, and Loudoun County).

Following collaboration with jurisdictional partners, the FY2026 Operating Subsidy includes three percent annual growth and \$95 million to replace one-time savings from FY2025. In addition, Metro's FY2026 Proposed Budget includes additional investment in Metrobus service sponsored by the District of Columbia and Arlington that are included in the Year 1 Better Bus Network. The Debt service payments remain equivalent to FY2025 at \$72.3

million, resulting in total jurisdictional contributions in FY2026 of \$1,996.7 million.

In FY2025, the Board of Directors approved a restructuring of the Metrorail and Metrobus operating subsidy allocation formula to address the challenges with the legacy formulas by improving clarity and transparency, aligning service costs with regional benefits and incentivizing ridership and revenue growth. This restructured operating subsidy formula allocates both costs and revenues to determine the jurisdictional subsidy using six subsidy allocation formulas: Metrobus Cost Allocation, Metrorail Cost Allocation, Metrobus Revenue Allocation, Metrorail Revenue Allocation, Paratransit subsidy allocation and Debt service allocation.

The following table provides the FY2026 subsidy by mode by jurisdiction. Appendix F provides further details on the variables used to calculate the restructured operating subsidy.

FY2026 BUDGET – SUMMARY OF STATE AND LOCAL OPERATING REQUIREMENTS

(Dollars in Millions)	Metrobus Subsidy ³	Metrorail Subsidy	MetroAccess Subsidy	Total Subsidy	Debt Service	Jurisdictional Contributions
District of Columbia	\$375.7	\$324.0	\$45.3	\$745.0	\$33.3	\$778.4
Montgomery County	\$95.3	\$155.0	\$31.4	\$281.7	\$15.4	\$297.1

Passenger and Non-Passenger Revenue

OPERATING REVENUE

(Dollars in Millions)	FY2023 Actual	FY2024 Actual	FY2025 Budget	FY2026 Budget	\$ Change	% Change
Metrorail	\$231.4	\$301.4	\$328.9	\$384.7	\$55.8	17.0%
Metrobus	55.6	50.1	53.7	54.8	1.1	2.1%
MetroAccess	4.6	4.1	4.5	4.9	0.5	10.1%
Passenger Revenue Subtotal	\$291.6	\$355.6	\$387.1	\$444.5	\$57.4	14.8%
Non-Passenger Revenue ¹	\$89.3	\$117.0	\$100.5	\$100.8	\$0.3	0.3%
Total Revenue	\$380.9	\$472.6	\$487.6	\$545.3	\$57.7	11.8%
Federal Relief ²	\$643.4	\$532.6	\$95.0	\$-	(\$95.0)	(100.0%)
Total	\$1,024.4	\$1,005.3	\$582.6	\$545.3	(\$37.3)	(6.4%)

1. Other non-transportation revenue includes interest on investments, property disposal sales, vending machine sales, and miscellaneous revenues

2. Federal relief includes ARPA federal relief funding

Though federal relief funding aided Metro during recent years, Metro's principal source of operating revenue is passenger and non-passenger revenue generated through ongoing operations. Metro's operating revenue includes fare collection from its Metrorail, Metrobus and MetroAccess services, advertising placements within stations and on vehicles, and income from parking facilities at Metro stations. Metro also generates revenue through its joint development projects, fiber optic program and other general sources. These funds play a crucial role in maintaining the efficiency and reliability of Metro services and ensuring millions of customers can travel safely and efficiently throughout the capital.

As employers increasingly integrate remote working and expand flexible work arrangements, these decisions directly impact current and future ridership. Metro has actively addressed the changes in the way many people work and commute to work through customer-focused adjustments in coverage, fare structures and service frequency. Fare simplification implemented in FY2024 made Metro's pricing easier to understand and increased

affordability through initiatives such as the Metro Lift income-based pass. The FY2026 Proposed Budget will maintain fares at FY2025 levels. In addition, Metro is preparing to introduce an Open Payment fare system to Metrorail, Metrobus, and parking facilities during 2025. Open Payment will allow customers to use their contactless credit/debit card, mobile wallet, or linked smartwatch for fare payment without the need to use a SmarTrip card. All fares remain eligible for reduced fare programs such as Metro Lift and reduced fares for seniors and people with disabilities.

The FY2026 Proposed Budget projects \$545.3 million in operating revenue. This change represents an 11.8 percent increase from FY2025. Passenger fares of \$444.5 million make up 81.5 percent of the operating revenue budget. Passenger revenue is projected to increase by 14.8 percent relative to the FY2025 Budget. Non-passenger revenues from parking, advertising, joint development, fiber optic leases and other sources are projected to be \$100.8 million, an increase of \$0.3 million relative to the FY2025 Budget.

FY2026 Fares Will Remain at FY2025 Levels Across all Three Modes

- Metrorail base fare will remain at \$2.25, with a composite mileage charge of \$0.45 per mile after the first three miles, and a maximum fare of \$6.75
- Metrorail late-night and weekend fares will remain the same, ranging from \$2.25 to \$2.50
- Metrobus local fares will remain \$2.25 and the express fare will remain at \$4.80
- MetroAccess maximum fares will remain at \$4.50

Ridership

RIDERSHIP BY SERVICE

(Trips in Thousands)	FY2023 Actual	FY2024 Actual	FY2025 Budget	FY2026 Budget	Change	% Change
Metrorail ¹	95,813	123,166	113,713	133,717	20,004	17.6%
Metrobus ²	102,477	117,596	111,408	133,069	21,661	19.4%
MetroAccess	1,394	1,397	1,481	1,630	149	10.1%
Total Ridership³	199,684	242,159	226,603	268,416	41,813	18.5%

1. Ridership statistics beginning in January 2024 include both tapped and non-tapped ridership for Metrorail.

2. Metrobus ridership reflects Automated Passenger Count (APC) data

3. Metrorail ridership is based on linked trips; Metrobus ridership is based on unlinked trips from APC data; MetroAccess ridership is based on total passengers.

Unlinked trips are total boardings, while linked trips are total number of complete trips from origin to destination, including transfers

Total Ridership is projected to increase to 268.4 million trips in FY2026, with 49.8 percent of trips on Metrorail, 49.6 percent on Metrobus and the remainder on MetroAccess.

Metrorail

As home to the nation's capital, the greater Washington D.C. Metropolitan area is a dynamic entertainment, cultural and historic destination, drawing individuals from around the world while also housing some of the country's most critical government institutions. Metrorail services support both residents and visitors, providing convenient service to area sporting events, festivals, and institutions.

Advancing Service Excellence

Metro began Automatic Door Operations (ADO) on all lines during FY2025. Upgrading and restoring the technology for Auto Doors will enable Metro to safely automate 20,000 daily door openings systemwide.

The increased prevalence of hybrid work schedules continues to impact Metrorail. The FY2026 Proposed Budget focuses on optimizing rail service to meet the current travel needs of the region, while simultaneously focusing on future requirements. To enhance customer experience, Metro continues efforts to modernize the rail program, replacing antiquated infrastructure, vehicles and obsolete signaling systems. By improving signage and communication throughout the rail system, Metro is enhancing customers' ability to move through the system seamlessly to a desired location. Metro is also expanding its improved wayfinding program across Metro stations, incorporating more recognizable icons to help customers navigate from the station to a chosen destination. This program, first introduced at L'Enfant Plaza station in Fall

2023, enhances customer experience and makes Metro easier to use.

Metrorail ridership continues to demonstrate strong year-over-year gains. The FY2026 Proposed Budget recognizes the changes in ridership patterns and focuses on optimizing service to continue this positive momentum. Metrorail anticipates 133.7 million trips in FY2026 which represents a 17.6 percent increase from the FY2025 Approved Budget. Based on ridership projections, Metrorail passenger revenue for FY2026 is budgeted at \$384.7 million, a \$55.8 million or 17.0 percent increase relative to the FY2025 Budget.

The FY2026 Proposed Budget incorporates targeted service changes, focused on addressing crowding, aligning with regional travel demand and maximizing the efficiency of Metro's rail assets. To address growing ridership, the FY2026 Proposed Budget will extend half of the Yellow Line trains to Greenbelt, open the Metrorail system at 6 a.m. on weekend mornings, close the Metrorail system at 2 a.m. on Fridays and Saturdays, adjust service patterns on the Silver Line and add additional trains during the busiest times of service along the Red and Silver Lines. Metrorail will also continue to advance service efficiency through train automation and optimizing the mix of 6-car and 8-car trains to increase capacity. Efficiencies from rail automation and train length optimization will enable approximately three percent more rail service with the same FY2026 resources. Metro will continue to assess ways to most effectively add peak capacity to address passenger loads at business times and locations. Metro fares will remain at FY2025 levels, a fare range of \$2.25 to \$6.75 for weekdays and \$2.25 and \$2.50 for late-night and weekends.

Metro continues to implement solutions to reduce fare evasion. Metro completed the installation of saloon style faregates at all 98 stations. Additionally, the Secure DC

Bill passed in 2024 enhanced penalties for assaulting a transit worker and includes a provision requiring anyone stopped for fare evasion to provide their true name and address, allowing police officers to issue civil citations. These efforts have helped to reduce fare evasion across the Metrorail system.

Metro's budget also includes up to \$10.0 million as a rail fare revenue offset for closing stations for major capital improvement projects. Metrorail revenue also includes the Kids Ride Free program. In partnership with the District Department of Transportation (DDOT), District of Columbia Public Schools (DCPS), and the District of Columbia Public Charter School Board, Metro is reimbursed for District K-12 students riding Metrorail and Metrobus. Students can take unlimited trips on Metrorail and Metrobus using program specific SmarTrip® cards.

Pictured: Metrobuses parked on street

Metrobus

Due to its expansive and unique urban space, a reliable and convenient bus network is critical to the regional transportation system. As with Metrorail, Metrobus services connect individuals to personal, educational and professional opportunities. Metro's Better Bus Network Redesign is a crucial element of Metro's service optimization concepts. Launched to better meet the region's needs, this initiative will redesign the network with priority bus lanes and technology, standardized stops and covered shelters at bus stops, making connections across all transit providers easier and improving customer experience. This transformative bus service will reallocate

resources to meet regional goals by adapting the network to current travel patterns. The implementation of its initial phase is included in the FY2026 service plans and is supported by the FY2026 Proposed Budget. The Year One implementation will provide 11 more routes in the Frequent Service Network; offer new connections to transit stations, jobs and other key destinations; and increase midday, evening and weekend service.

The FY2026 Proposed Budget maintains bus fares for both local and express service at FY2025 levels. Metrobus ridership is projected at 133.1 million trips in FY2026, an increase of 21.7 million trips, or 19.4 percent, from the FY2025 budget. Metrobus passenger revenue for the FY2026 Proposed Budget is \$54.8 million, an increase of \$1.1 million from the FY2025 Approved Budget.

Advancing Environmental Sustainability

The addition of 10 electric buses in FY2025 is a significant step toward Metro's goal of achieving a fully electric bus fleet by 2042.

Metrobus ridership is based on data collected using Automatic Passenger Counters (APCs), which the transit industry considers a more accurate method of recording ridership than data acquired through the farebox. Accordingly, starting with FY2020, bus ridership is reported using APC figures unless otherwise noted.

MetroAccess

MetroAccess is a shared-ride, door-to-door, paratransit service for people whose disability prevents them from using Metrobus or Metrorail. MetroAccess fares will remain at FY2025 levels with a fare cap of \$4.50. The FY2026 Proposed Budget includes proposed expansion of service hours on Metrorail, as well as revisions to the Metrobus network through the implementation of the Better Bus Network, previously approved by the Board of Directors. To the extent that these changes increase the service hours or service area, MetroAccess services will, as required by law, expand to meet those requirements. MetroAccess is projected to provide 1.6 million trips in FY2026, an increase of 0.1 million trips relative to the FY2025 budget. MetroAccess passenger revenue for the FY2026 Proposed Budget is \$4.9 million, an increase of \$0.5 million from the FY2025 Approved Budget.

Nearly 61.6 percent of MetroAccess trips are provided in Montgomery and Prince George's counties in Maryland, 26.0 percent in Washington D.C., and the remaining 12.3 percent of the trips in combined Virginia jurisdictions based on FY2024 actual results.

Non-Passenger Revenue

Parking

Total parking revenue for the FY2026 Proposed Budget is \$24.1 million, a \$3.4 million increase from the FY2025 Budget. Parking rates remain unchanged in the FY2026 Proposed Budget from the FY2025 budget to encourage use of available capacity at parking facilities and bolster growth in long-distance Metro commutes. In addition, Metro bicycle lockers have been equipped with an hourly rental feature for fares of \$0.05 per hour up to \$1.00 per day.

Advertising

Total advertising revenue in FY2026 is budgeted at \$20.5 million, a \$0.5 million decrease from the FY2025 budget.

Fifty-seven Metrorail stations include digital advertising display panels. This technology has not only broadened Metro's advertising base but also provided a platform to communicate important Metro-specific information to customers.

Joint Development

Metro actively employs its Joint Development program to maximize our real estate assets and support regional economic growth. Since 1978, Metro has delivered more than 55 buildings at 30 Metro stations totaling 17 million square feet of mixed-use development. The fiscal benefits

of these projects generate annual property, sales, and income taxes for state and local governments. Joint development revenues are estimated to be \$15.9 million.

Advancing Regional Partnership and Opportunity

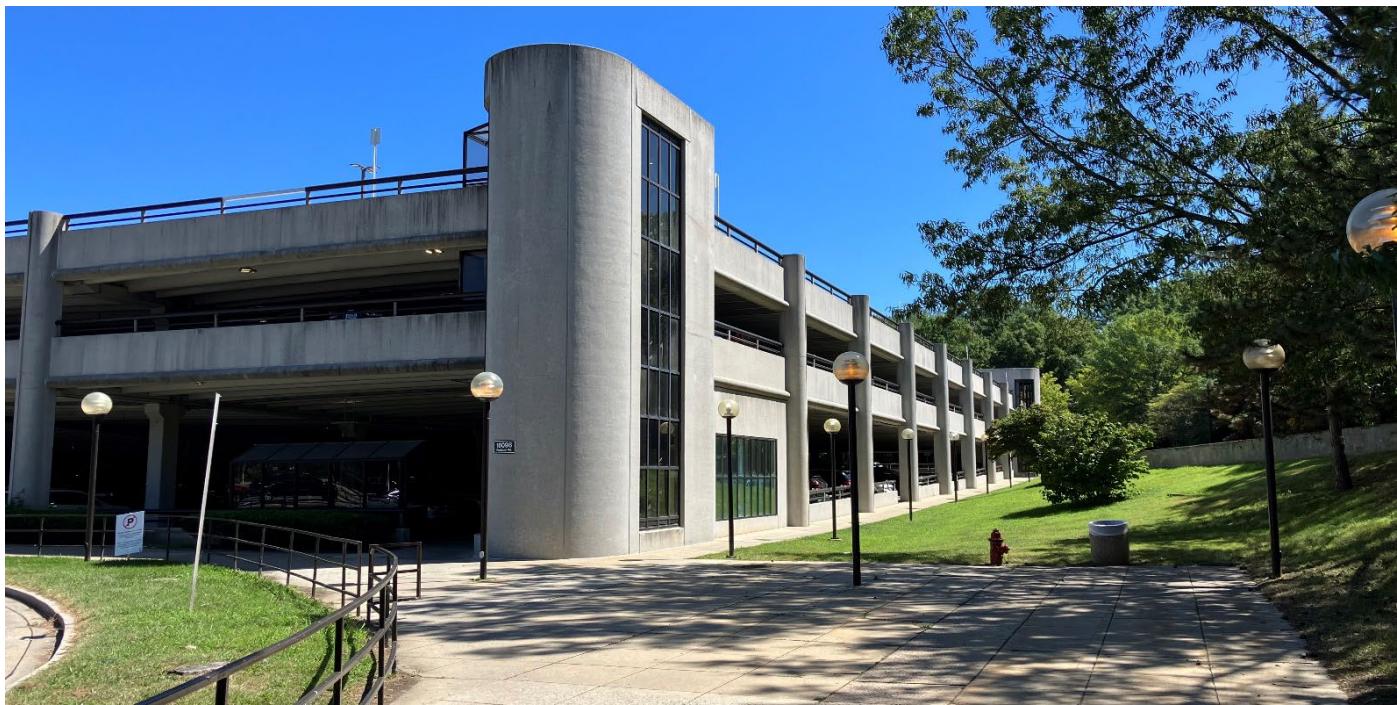

Metro's 10-year Strategic Plan for Joint Development identifies 40 stations with land available for development to attract investment and prioritize future station opportunities.

Fiber Optics

The Metro Fiber Optic Program, initiated in September 1986, allows for the installation, operation, and maintenance of fiber optic cables in Metro's right-of-way. Under these lease agreements, Metro receives revenue from telecommunications companies as well as fiber optic lines for its own use. For FY2026, the fiber optic revenue budget is \$17.2 million.

Other Revenue

Other revenues total \$23.2 million in FY2026 and include lost revenue from capital projects as well as proceeds from agreements with cellular service providers, vending machine companies, surplus asset disposals and employee parking.

Pictured: Metrorail parking structure

Capital Funding

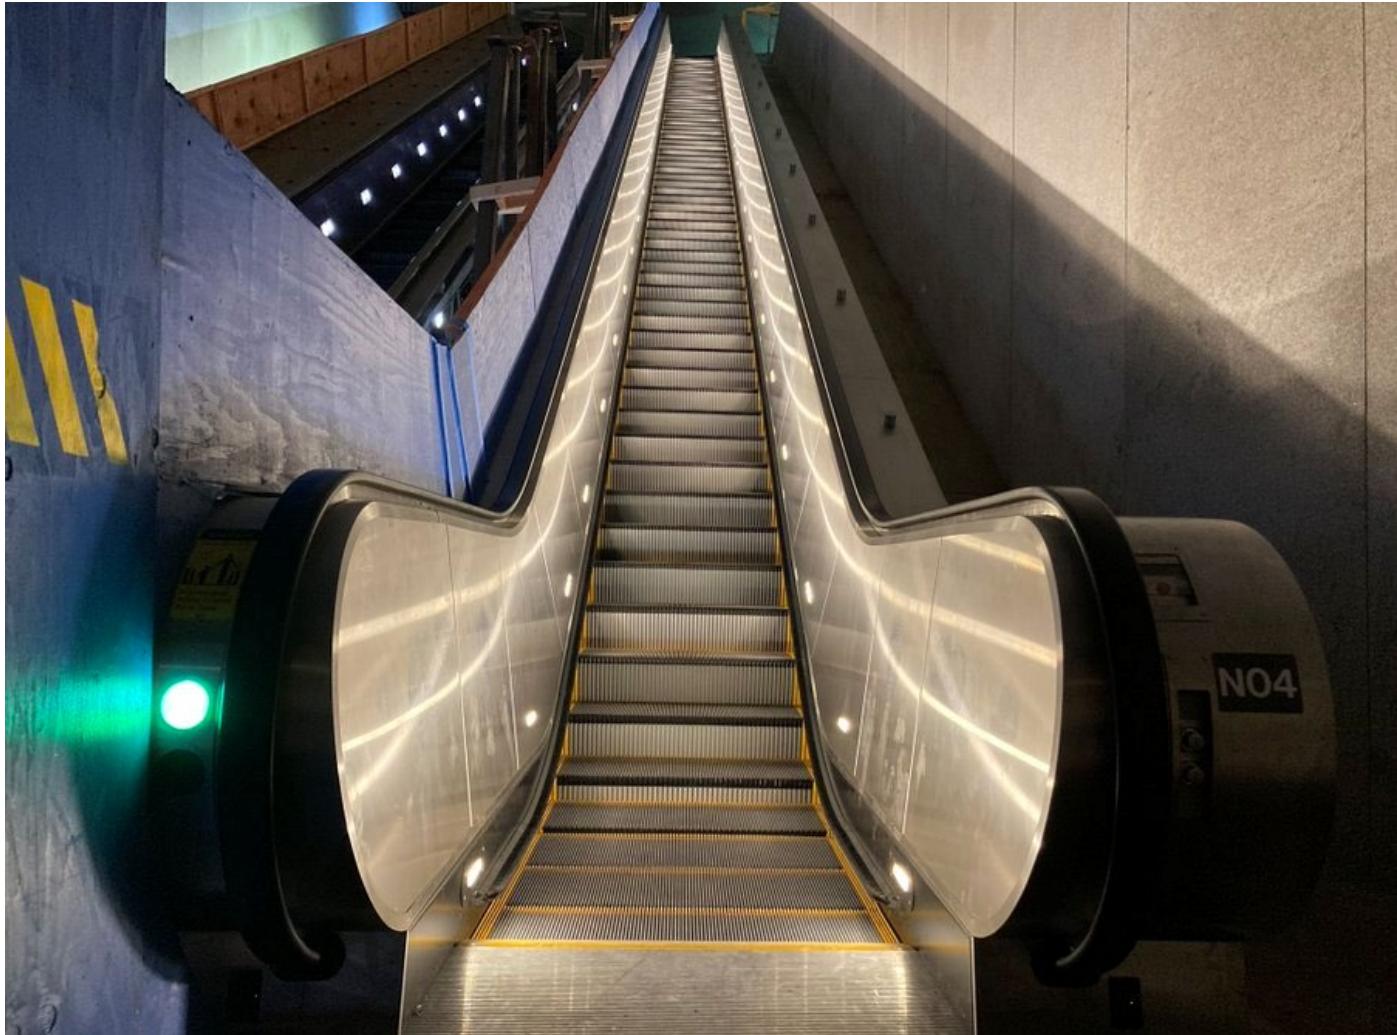

Metro's six-year CIP investments of \$10.5 billion requires total funding of \$12.5 billion from the federal government, state and local government partners and other sources due to an expected \$10.0 million cost for revenue loss from service shutdowns for capital projects and \$2.1 billion of debt service.

Within the \$12.5 billion six-year funding plan, Metro is projecting:

- \$4.0 billion from federal grant funding, based on the IIJA authorization for formula and PRIIA funding

- State and local contributions for matching of federal grants and system performance funds \$2.9 billion, of which \$10.0 million is expected to fund revenue losses from long-term service shutdowns due to major capital projects
- State dedicated funding of \$3.0 billion
- Debt, secured by dedicated funding, of \$2.5 billion
- Other local sources in the amount of \$126.1 million

Additional information about capital funding sources is included in Chapter 4 – Capital Budget.

Chapter 2 – Metro Officers

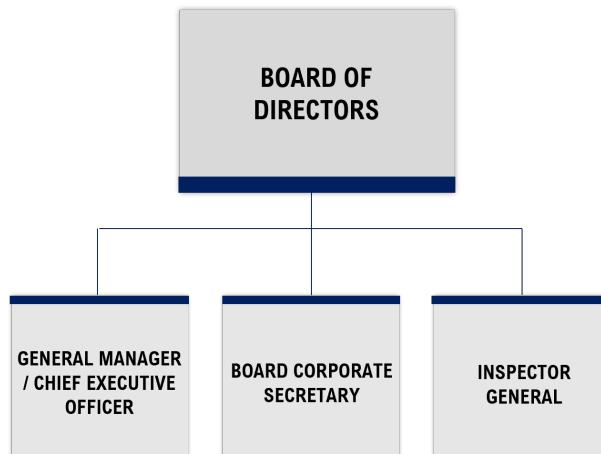

Metro enhances the region – helping to achieve and sustain economic, environmental and equity improvements.

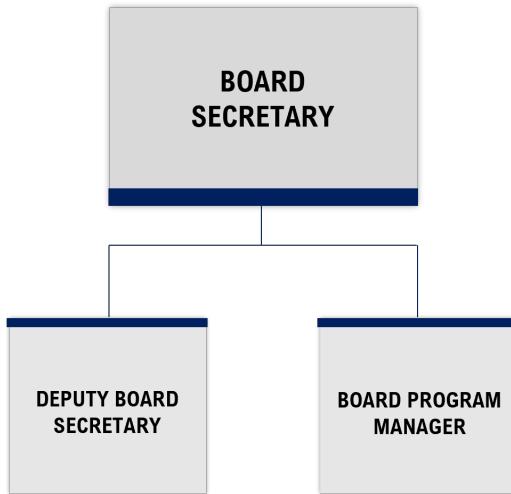

Pictured: Station ceiling view

Board Reporting Structure

The Metro Board of Directors Bylaws designate three Metro officers as direct reports to the Board: the General Manager and Chief Executive Officer (GM/CEO), the Inspector General, and the Board Corporate Secretary. The latter two officers are appointed by, and may only be removed by, the Metro Board of Directors and they operate independently of the GM/CEO. This chapter includes budget information for the departments that support the Board Corporate Secretary, Inspector General, and GM/CEO. The Authority-wide operating figures in Chapter 3 include the costs of these three departments in order to present a complete budget for the Authority.

Board Corporate Secretary

Authorized Positions	4	4	4	4	-	-

1. Personnel figures include the department's share of total fringe expenses

2. Total operating budget cost for each fiscal year is based on Metro's organizational structure at the time of budget approval or proposal

The Office of the Board Corporate Secretary is an independent office that reports to the Metro Board of Directors and serves as a resource to advance the Board's goals, policies, and strategic plan.

The Office of the Board Corporate Secretary is responsible for managing the Board's activities across the Authority in support of executive decision-making. The office works with the Board on policy issues and provides guidance, represents the Board in policy matters, and advises on communications and governance best practices. The office also works proactively with management to carry out the policies, goals and initiatives

of the Board; and serves as liaison between the Board, the Authority, Board advisory bodies and customers.

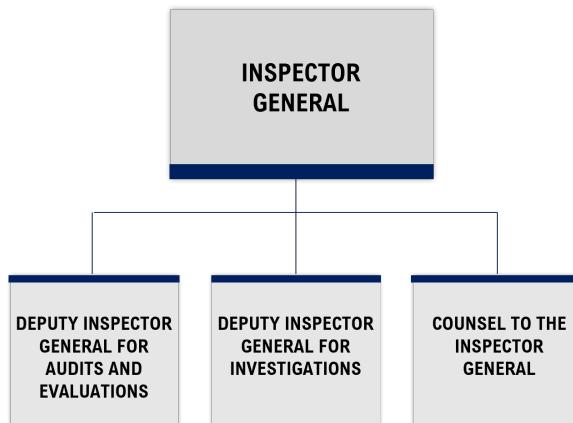

Other responsibilities include Board training and professional development; regulatory compliance and ethics; the coordination, review and distribution of Metro Board materials; maintaining official records of Board actions and resolutions; publishing legal notices and arranging public hearings approved by the Board; and representing the Board on a variety of issues relating to stakeholder groups.

Board Corporate Secretary – FY2026 Business Initiatives and Priorities

The Office of the Board Corporate Secretary will:

- Ensure Board operations and materials maintain a strategic focus and that the Board's work aligns with its priorities set forth in the Strategic Transformation Plan
- Support Board Members in their work on DMV Moves through communications and policy counsel
- Create and implement opportunities for the Board to develop and continually refine its priorities, including through retreats and updated committee work plans
- Provide policy, governance and communications counsel and recommendations regarding Board initiatives and policies on an ongoing basis
- Facilitate public access to Board meetings and other public events that provide riders an opportunity to offer feedback
- Manage the Compact public hearing process, including the administration of hearings and coordination with Metro's outreach processes under the Public Participation Plan to encourage and facilitate customer engagement and input
- Support the Board in fulfilling the requirements of dedicated funding legislation, the WMATA Compact and the Board's Bylaws
- Develop and lead Board orientation for new members as appointed
- Promote continuous learning through training and other educational and developmental opportunities for Board members, including mandatory trainings
- Ensure completion of Board members' annual Ethics Disclosure process and support continued adherence to the Board's Code of Ethics
- Continue to expand functions of the Board's Ethics Portal to streamline the required disclosure reporting process
- Support Board member participation in Metro events with communications support and logistical assistance
- Oversee annual performance evaluation process for Board direct reports
- Provide policy and logistical support for the Riders' Advisory Council
- Provide support to the Board Liaison for the Youth Advisory Council
- Conduct recruitment for the Riders' Advisory Council and Metro Transit Police Department Investigations Review Panel to fill vacancies
- Review recommendations by the Metro Transit Police Department Investigations Review
- Fulfill all Board-related Public Access to Records requests
- Continue working with appropriate staff to improve audio-visual capabilities for Board room and virtual access to Board meetings and Board-related events
- Leverage new technologies to improve efficiency in managing board activities, including implementing a new board portal

Inspector General

INSPECTOR GENERAL

Authorized Positions	48	48	48	48	-	-

1. The Inspector General's FY2023 - FY2026 budgets each include \$5 million of PRIA funding

2. Personnel figures include the department's share of total fringe expenses

3. The total operating budget cost for each fiscal year is based on Metro's organizational structure at the time of budget approval or proposal

The Office of Inspector General (OIG) is an independent office that reports to the WMATA Board of Directors (Board). Under the WMATA Compact, the Office of Inspector General is:

[an] independent and objective unit of the Authority that conducts and supervises audits, program evaluations, and investigations relating to Authority activities; promotes economy, efficiency, and effectiveness in Authority activities; detects and prevents fraud and abuse in Authority activities; and keeps the Board fully and currently informed about deficiencies in Authority activities as well as the necessity for and progress of corrective action.

Independence of Inspector General

In a significant move to strengthen the independence of the Inspector General's Office, Congress passed, and the President signed into law, the Infrastructure Investment and Jobs Act of 2021 (Act) on November 15, 2021. As a condition of funding for WMATA, Section 30019(c) of the Act required that the Board adopt specific reforms to the Inspector General's authorities. These reforms include:

- Greater independence in the annual budgeting process, ensuring that the Office of Inspector General will independently determine its annual budget request that is then submitted to the Board for its review and approval;
- Improved procurement authority, requiring WMATA to delegate contracting authority to the Inspector General;
- Greater independence in selecting and appointing the Office of the Inspector General's officers and employees, by delegating to the Inspector General the authority to select, appoint, and employ personnel as necessary for carrying out the duties of the Inspector General's office;
- Assurance that the Inspector General obtains legal advice from a counsel reporting directly to the Inspector General; and

- Specified reporting requirements and measures to assure the public dissemination of the Inspector General's office reports - in particular:
 - Any Inspector General's office report containing a recommendation for corrective action must be posted to the Inspector General's website not later than three days after the report is submitted in final form to the Board (subject to redactions of privileged or other protected information).
 - The Office of the Inspector General must submit semiannual reports to the Board, which in turn must transmit them to specified recipients including the Congress and the signatories to the WMATA Compact (Virginia, Maryland, and the District of Columbia).

On December 9, 2021, the Board passed Board Resolution 2021-46, adopting and directing WMATA staff to implement the reforms set out in the Act.

On March 14, 2024, the WMATA General Manager and Acting Inspector General jointly signed and issued a Staff Notice recognizing OIG's unique procurement and human capital independence requirements. This Staff Notice sets forth mandatory guidance for compliance with the Act.

On September 11, 2024, the WMATA General Manager and the Inspector General jointly signed and issued a Staff Notice recognizing OIG's unique budget independence requirements. This Staff Notice sets forth mandatory guidance for compliance with the Act.

On September 26, 2024, the Board passed Board Resolution 2024-26, amending the Inspector General's term and implementing further reforms to strengthen OIG independence by instructing the WMATA staff to implement the measures outlined in those staff notices and amendments to Policy/Instruction 13.3/4, the Office of Inspector General.

Office of Inspector General -- FY2026 Business Initiatives and Priorities

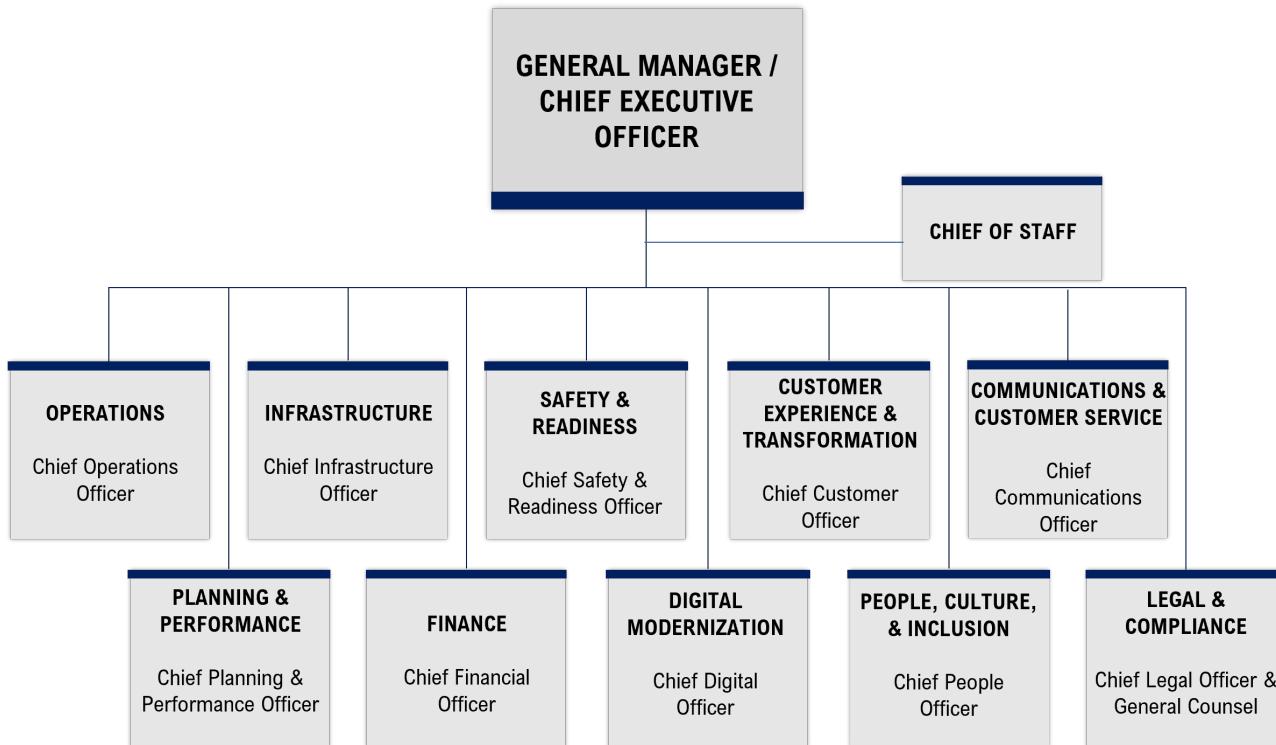

The Inspector General's Office of Investigations will:

- Conduct criminal, civil and administrative investigations and refer them for prosecution or other resolution, as appropriate
- Handle and issue confidential reports of investigations involving fraud, waste, abuse, misconduct, gross mismanagement, or any investigation of Authority activities deemed necessary or desirable by the Inspector General
- Provide all oversight and administration of the Office of Inspector General's hotline, including timely referral of non-investigative matters to the appropriate WMATA departments for review and action as they deem appropriate
- Oversee and administer WMATA's whistleblower retaliation program, administer the OIG's Whistleblower Award Program, and provide confidential and timely investigative reports to the Whistleblower Panel
- Issue management alerts to the GM/CEO on matters with time sensitivity and requiring management action
- Provide fraud awareness training to WMATA departments, offices, new staff, and staff with fiduciary responsibilities
- Oversee forensic and data analytics initiatives to identify fraud, waste, or abuse

The Inspector General's Office of Audits and Evaluations will:

- Conduct risk-based performance audits and evaluations to promote the economy, efficiency, and effectiveness of WMATA programs, operations, and activities
- Perform reviews and analyses of contractor proposals to determine the reasonableness of cost/pricing information and compliance with the Buy America Act
- Oversee the independent public accounting firm conducting WMATA's annual financial statement audit
- Keep the Board fully and currently informed about the progress of corrective actions on audit and evaluation recommendations
- Issue management alerts to the GM/CEO for matters with time sensitivity and those requiring management action

The Strategic Transformation Plan, *Your Metro, the Way Forward*, provides a roadmap toward Metro's future as a world-class transit agency. The Strategic Transportation Plan is being implemented through initiatives organized into two Action Programs categories: Administration and Operations. These Action Programs give Metro staff, leadership, and external partners a high-level schedule of projects and programs we will undertake to transform Metro over the next decade. This comprehensive long-term planning ensures that Metro's capital investments, service plans, and business operations align with and advance the plan's goals and objectives. Metro's Action Programs span multiple years, providing a long-term strategy for business continuity. Each Action Program consists of specific initiatives with associated actions, milestones, and key performance indicators.

The preface of this document outlines Metro's high-level initiatives.

Chapter 3 – Operating Budget

Metro is vital to the nation's capital - supporting special events and the economy.

Pictured: Train at Ronald Reagan Washington National Airport station platform

Introduction

Metro plays a pivotal role in the economic vitality of the National Capital Region, connecting customers to new activity centers. As the region grows, public transportation is critical to local businesses, residents and visitors. Fundamental changes in commuting and travel patterns, as well as unprecedented inflationary pressures in recent years have significantly impacted Metro's operating budget which funds expenses associated with Metrobus, Metrorail, and MetroAccess operations. To help sustain affordable and accessible public transit services for the region, Metro relies on jurisdictional subsidy funding. The FY2026 Proposed Operating Budget is \$2,498.2 million (excluding debt service and reimbursables). The FY2026 Proposed Budget also includes reimbursable projects budget of \$13.5 million and \$72.3 million in debt service.

Sources of Funds

Metro operations are funded by passenger fares and other revenues, as well as state and local subsidies. Federal relief funding provided in the wake of the Covid-19 pandemic allowed transit agencies nationwide to sustain operations and offset lost revenue. Metro will spend its remaining federal relief funding in FY2025. In addition, Metro projects \$28.4 million in prior year savings to apply to FY2026.

- Net operating subsidy of \$1,924.5 million (excluding debt service) funds 77.0 percent of the operating budget
- Passenger fare revenue of \$444.5 million and parking revenue of \$24.1 million together represent 18.8 percent of the operating budget
- Collectively, advertising, joint development projects, fiber optic and property leases, and other revenues fund the remaining \$76.7 million of operating revenue

FY2026 OPERATING EXPENSE BUDGET

Total \$2,498.2M

Note: Increase in net expense of seven percent due to the factors above
Amounts may not sum due to independent rounding

Uses of Funds

Total operating expense for the FY2026 Proposed Budget is \$2,498.2 million. This budget is based on a three percent year-over-year increase for gross expenses achieved through robust financial management continues to identify operating and administrative efficiencies. In addition, this operating expense budget includes \$11 million to support rail optimization efforts, which is offset by \$11 million in additional operating revenue, as well as \$25 million in jurisdictionally-sponsored bus enhancements included in Year One of the Better Bus Network implementation. Historically Metro has budgeted approximately \$60 million in preventive maintenance transfers from the operating budget to the capital budget. In recent years, however, Metro has incorporated preventive maintenance transfers above the historical \$60 million to alleviate strain on the operating budget. The FY2026 budget begins to reduce this reliance on the capital budget. While the FY2025 Approved Budget included an additional \$121 million over the historical \$60 million, the FY2026 Proposed Budget includes only \$69 million in additional preventive maintenance transfers above the historical \$60 million.

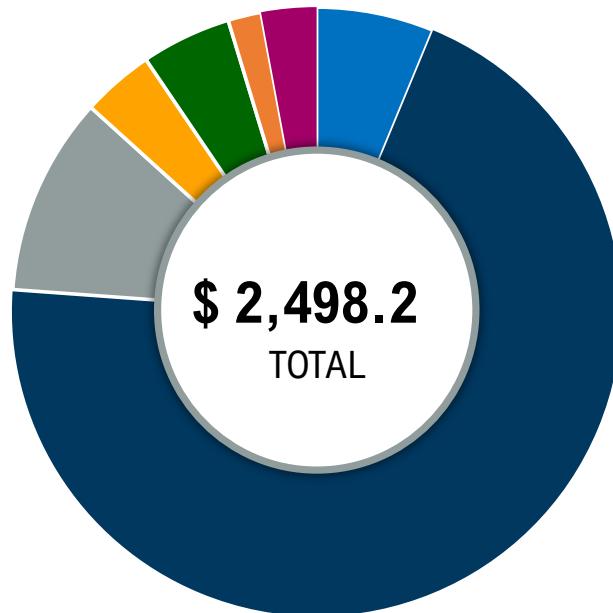

- Personnel expenses, including labor, fringe benefits and capital overhead allocation, are the largest operating budget expense category at \$1,746.5 million or 69.9 percent of total expenses. Operating personnel expenses are projected to increase by \$134.5 million in FY2026 relative to the FY2025 Budget and supports 11,447 positions

- Total Services, to include Paratransit Services, are projected to be \$419.7 million and account for 16.8 percent of total budgeted operating expense for FY2026. Paratransit expense is projected to be \$156.0 million in FY2026, an increase of \$3.9 million relative to the FY2025 Approved Budget. Other items reflected in the Services budget are expenses related to professional and technical services, contract maintenance, custodial services and temporary labor services. In FY2026, the Total Services budget of \$419.7 million is an increase of \$45.4 million compared to the FY2025 Budget
- Materials and Supplies budget consists primarily of maintenance parts for buses and railcars, track and structure maintenance, elevator and escalator, and general fleet repair for non-revenue vehicles. In the FY2026 Proposed Budget, expenses for materials and supplies total \$95.6 million, a decrease of \$28.4 million, or 22.9 percent, from the FY2025 Budget
- Metro's energy budget (fuel, utilities, propulsion) consists of propulsion usage by the Metrorail system; diesel and compressed natural gas for Metrobuses; gasoline for MetroAccess and non-revenue vehicles; and utilities at Metro facilities. Collectively, these costs are projected to increase by \$8.5 million relative to the FY2025 Budget.
- Other expenses include casualty and liability insurance, leases, capital overhead allocation credit and miscellaneous costs.

Operating Budget by Mode: Metrobus

Pictured: Metrobus at bus stop

Profile

Metrobus provides a vital component of public transportation to the region through its extensive network of bus routes connecting neighborhoods, commercial districts and key transit hubs. With flexible and affordable means of travel for commuters, students, and visitors alike, the system emphasizes accessibility, service excellence and sustainability. Metrobus plays a crucial role in reducing traffic congestion and promoting sustainable urban mobility. Service is provided on a combination of local, limited-stop (MetroExtra) and express routes connecting the region. All buses are accessible to people with disabilities, and bike racks are available for use on all buses.

The Better Bus Network Redesign is a key initiative in the Strategic Transformation Plan, advancing core objectives in Service Excellence, Regional Opportunities and Partnership, and Sustainability. In June 2022, Metro launched the Better Bus Network Redesign to create a bus network to better match the region's travel needs;

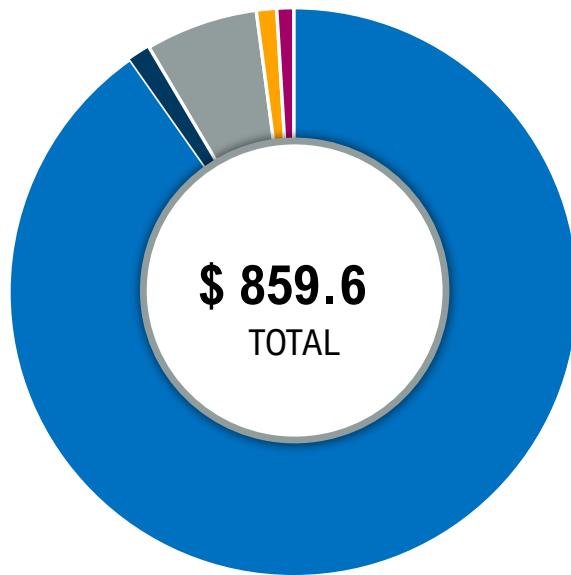

provide fast, frequent and reliable service; and promote equity, inclusiveness and access to opportunity. To inform the network redesign, Metro combined customer input with data about its current network and future transit demand. Metro held 50 events, interacted with more than 15,000 people and gathered over 13,500 comments on routes during the spring of 2024. This overarching initiative to improve Metrobus for the region will span multiple years and incorporate new facilities, the expansion of the zero-emission fleet and improved bus communications.

The FY2026 Proposed Budget will implement Year One of the Better Bus Network redesign, the first phase of its visionary network, as part of its commitment to improve service and connections using current resources. Service enhancements will include 11 more routes in the Frequent Service Network, as well as new connections and increased midday, evening and weekend service.

Sources of Funds

SOURCES OF FUNDS – METROBUS (\$ in millions)

\$ 8.2 (1.0%)	ADVERTISING
\$ 9.9 (1.2%)	OTHER
\$ 54.8 (6.4%)	PASSENGER
\$ 10.9 (1.3%)	PRIOR YEAR SAVINGS
\$ 775.8 (90.3%)	NET SUBSIDY

Metrobus sources of funds consist primarily of revenue from fares and advertising, as well as the subsidy from Metro's jurisdictional partners. The subsidy is \$775.8 million, or 90.3 percent of the total funding need for Metrobus.

Operating revenue for Metrobus (revenue excluding federal funding and subsidy) for FY2026 is projected at \$72.9 million. The largest revenue source, passenger revenues, is estimated at \$54.8 million which includes fares and passes. The FY2026 Proposed Budget projects passenger revenue will increase \$1.1 million from the FY2025 Budget for Metrobus due to ridership growth. Metro is actively pursuing methods to decrease fare evasion and increase the average fare in FY2026.

Metrobus is projected to receive advertising revenue of \$8.2 million, a decrease of 1.7 percent when compared to FY2025 Budget.

Other Metrobus revenue, which includes interest, property disposal, and miscellaneous revenue, is projected to total \$9.9 million.

In addition, Metro projects prior year savings available to fund the FY2026 Budget, with \$10.9 million allocated to Metrobus.

Uses of Funds

USES OF FUNDS – METROBUS

(\$ in millions)

\$ 18.1 (2.1%)	OTHER
\$ 39.1 (4.5%)	FUEL
\$ 10.4 (1.2%)	UTILITIES & PROPULSION
\$ 33.2 (3.9%)	MATERIALS & SUPPLIES
\$ 61.2 (7.1%)	SERVICES
\$ 697.5 (81.1%)	PERSONNEL

Personnel

Personnel expenses are the largest portion of the Metrobus budget. For FY2026, personnel costs are estimated at \$697.5 million or 81.1 percent of the Metrobus budget. From FY2023 to FY2024, actual personnel expenses increased by \$2.1 million, or 0.3 percent. Relative to the FY2025 Budget, FY2026 personnel expenses are projected to increase by \$47.0 million.

A wage freeze enacted in the FY2025 Approved Budget held salaries and wages at FY2024 levels for non-represented and Local-689 members. The new Collective Bargaining Agreement (CBA) negotiated with the Local-689 union includes a three percent general wage increase for FY2026. The new CBA also minimizes the impact from future inflationary spikes with limits on total wage (general wage increase and cost-of-living adjustment) increases. Results from upcoming negotiations for other CBAs are also incorporated into the FY2026 Proposed Budget. Additionally, the Metrobus personnel budget includes additional personnel to support jurisdictionally-sponsored services included in the Better Bus Network implementation.

Non-Personnel

The FY2026 Proposed Budget projects Services costs of \$61.2 million. Services costs decreased by \$1.7 million, or 3.3 percent, from FY2023 to FY2024. The FY2026 Proposed Budget is expected to decrease by \$0.3 million, or 0.5 percent, relative to the FY2025 Budget.

Materials and Supplies increased from FY2023 to FY2024 by \$3.2 million or 8.9 percent. In FY2026, these costs are budgeted at \$33.2 million, a decrease of \$34.2 million, or 50.7 percent, from the FY2025 Budget.

Energy costs, including both fuel and utilities, are projected to increase by \$11.8 million from the FY2025 Budget primarily driven by increases in propulsion and electricity. Fuel costs, which include diesel, compressed natural gas and gasoline, are budgeted at \$39.1 million, a \$3.6 million increase from the FY2025 Budget. Utilities costs of \$10.4 million are projected to increase by \$8.1 million relative to the FY2025 Budget.

Other expenses total \$18.1 million for FY2026, a decrease of \$5.2 million versus the FY2025 Budget.

Operating Budget by Mode: Metrorail

Pictured: Aerial view of Silver line

Profile

The Metrorail system is a rapid transit system that consists of 128 route miles with three main types of structures: underground, surface and elevated. Recent additions in 2022 included six new stations and 12 additional route miles, as well as the augmentation to the Blue and Yellow Lines with an in-fill station at Potomac Yard in May 2023. With the addition of the Potomac Yard station, Metro began operating 98 stations across the region. All Metrorail stations and railcars provide accessibility to passengers in compliance with ADA standards.

Metrorail is enhancing its system through key improvements in automation and security, including resuming Automatic Door Operations (ADO), advancing Automatic Train Operations (ATO), and the installation of upgraded faregates to boost service reliability and deter fare evasion. During FY2025, Metro resumed ADO systemwide, a critical step in Metro's rail automation program. Upgrading and restoring the technology for Auto Doors enables Metro to safely automate door openings systemwide. Throughout FY2025, Metro will continue to advance plans to initiate ATO which will increase reliability, safety and efficiency. In addition, Metro completed the installation of more secure, retrofitted faregates to deter fare evasion. These

investments promote safe and sustainable operations, focused on service excellence.

Metrorail's design is highly reliant on vertical mobility through the utilization of elevators and escalators. Most customers access Metrorail via escalators to the train platform, while elevators provide accessibility for persons with disabilities, seniors, customers with strollers, travelers carrying luggage and other riders.

Federal relief funding enabled sustained service throughout the pandemic and recovery. As this pivotal source of funding ends, Metro must rely on jurisdictional subsidies to continue service at these levels. The FY2026 Proposed Budget focuses on service optimization to maximize the value of the network by most efficiently using available resources. As rail ridership continues its strong year-over-year recovery, Metrorail will implement targeted service improvements to address ridership growth and anticipate upcoming needs for future capacity. The FY2026 Proposed Budget will extend half of Yellow Line trains to Greenbelt, realign Silver Line service patterns to balance demand at New Carrollton and Downtown Largo, add additional trains during the business periods on the Red and Silver Lines and expand the weekend hours of operation for the Metrorail system to better align with regional travel demands.

NET SUBSIDY

Metrorail sources of funds consist of operating revenue including passenger fares, parking fees, advertising and lease revenues, as well as subsidy from Metro's jurisdictional partners. The subsidy for FY2026 is \$974.7 million or 66.9 percent of the Metrorail funding need.

Operating revenue for Metrorail (revenue excluding federal funding and subsidy) for FY2026 is projected at \$467.3 million. Passenger revenues, including fares and passes, are projected at \$384.7 million. Passenger revenue is expected to increase 17.0 percent from the FY2025 Approved Budget due to increases in paid rail ridership.

Parking revenue at Metrorail facilities will contribute \$24.1 million in revenue, a 16.4 percent increase from FY2025 budget to FY2026.

Advertising revenue applied to Metrorail will contribute \$12.3 million to revenue in FY2026, a \$0.3 million decrease from the FY2025 budget.

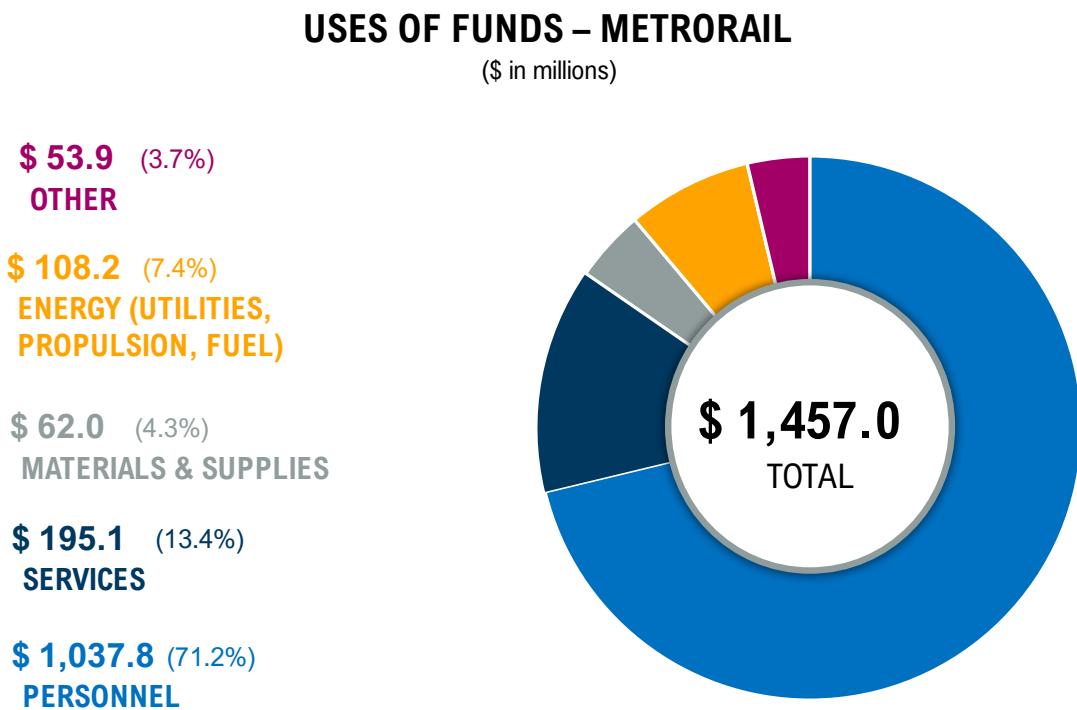

Other revenue, which includes joint development, fiber optics, and other non-transit revenue is projected to contribute \$46.2 million in FY2026.

In addition, Metro projects prior year savings available to fund the FY2026 Budget, with \$15.0 million allocated to Metrorail.

Pictured: Busy Metrorail platform at Gallery Place Chinatown

Uses of Funds

Personnel

Personnel expenses are the largest portion of the FY2026 Metrorail budget, estimated at \$1,037.8 million, or 71.2 percent of total Metrorail expenses. Personnel expenses increased by \$34.6 million, or 3.9 percent, from FY2023 to FY2024 as post-pandemic service recovered. Personnel expenses are projected to increase \$86.3 million in FY2026 from the FY2025 Budget.

Non-Personnel

Services are budgeted at \$195.1 million in FY2026. Services increased from FY2023 to FY2024 by \$6.6 million or 4.1 percent. The FY2026 Proposed Budget projects Services expenses will increase by \$41.2 million relative to the FY2025 Budget.

Materials and Supplies are budgeted at \$62.0 million in FY2026. Actual materials and supplies expenses decreased \$10.6 million from FY2023 to FY2024. The FY2026 Proposed Budget projects an increase of \$5.7 million, or 10.1 percent, from the FY2025 Budget.

Utilities and Propulsion expenses of \$108.2 million are projected to decrease by \$2.6 million, or 2.4 percent, from the FY2025 Budget.

Other expenses consisting of Casualty and Liability insurance, leases and miscellaneous expenses total \$53.9 million, which is a \$7.7 million increase over the FY2025 Budget.

Pictured: MetroAccess van parked in front of L'Enfant Headquarters

Profile

Metro ensures the ongoing accessibility of Metrobus and Metrorail for customers with disabilities and, in accord with ADA standards, provides MetroAccess paratransit service for passengers unable to use Metrobus and Metrorail. MetroAccess, a shared-ride door-to-door service, is offered for the same days, hours, and locations as fixed-route transit. Service contractors operate the van service and manage the operations control center and quality assurance functions.

Demand for paratransit service is increasing as the population of people with disabilities in the region grows. Metro provides travel training to assist customers with disabilities in navigating the Metrobus and Metrorail systems, while encouraging customers to take full advantage of the many accessibility and safety features. MetroAccess partners with Metrobus and Metrorail to provide group orientations and workshops to educate organizations on providing travel training to their clients. Metro also partners with the jurisdictions to improve the accessibility of bus stops in the region, further enhancing customers' ability to use the fixed-route system.

Current MetroAccess service and fare policies surpass federal minimum requirements and include providing trips to some customers traveling outside of the federally mandated ADA service area as well as supporting

MetroAccess trips equivalent to Metrobus routes no longer in service. Federal law requires paratransit service be provided to areas within three-quarters of a mile of fixed-route bus service and rail stations throughout the same hours as those services. Current MetroAccess fares will remain at FY2025 levels.

Metro also facilitates the use of lower-cost alternatives and more convenient options through the following programs:

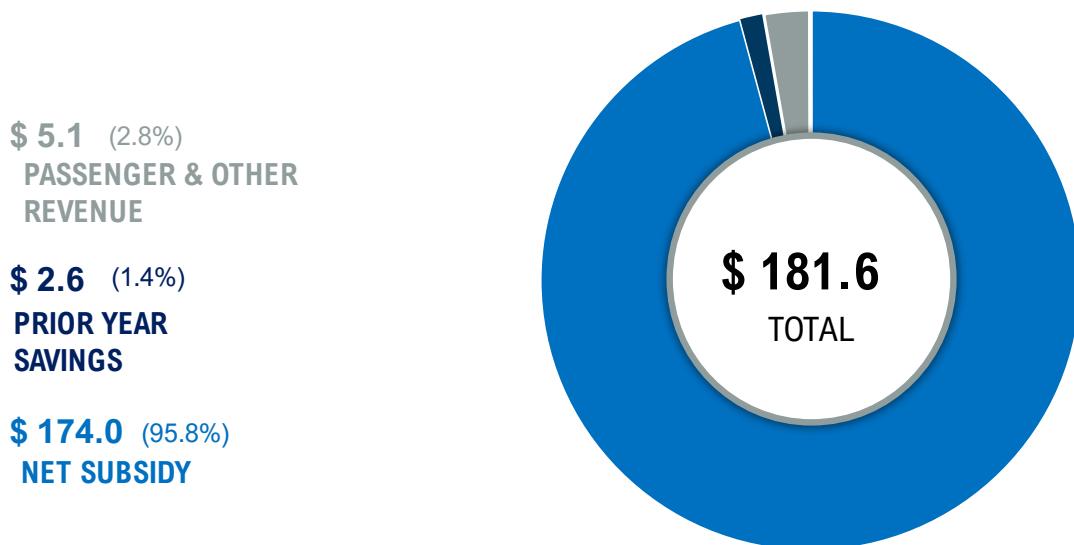

- Coordinated Alternatives to Paratransit Services (CAPS), established in 2013, provides transportation service for clients of two human services agencies (HSA) in Maryland between the HSAs' main facilities and clients' homes at a lower per trip cost relative to MetroAccess.
- The Abilities-Ride program is a public-private partnership to provide generally available on-demand and reserve trip service to MetroAccess customers for trips throughout the MetroAccess service area.

MetroAccess will continue to facilitate these more convenient, lower-cost paratransit alternatives as appropriate to best serve the needs of customers.

Sources of Funds

SOURCES OF FUNDS – METROACCESS

(\$ in millions)

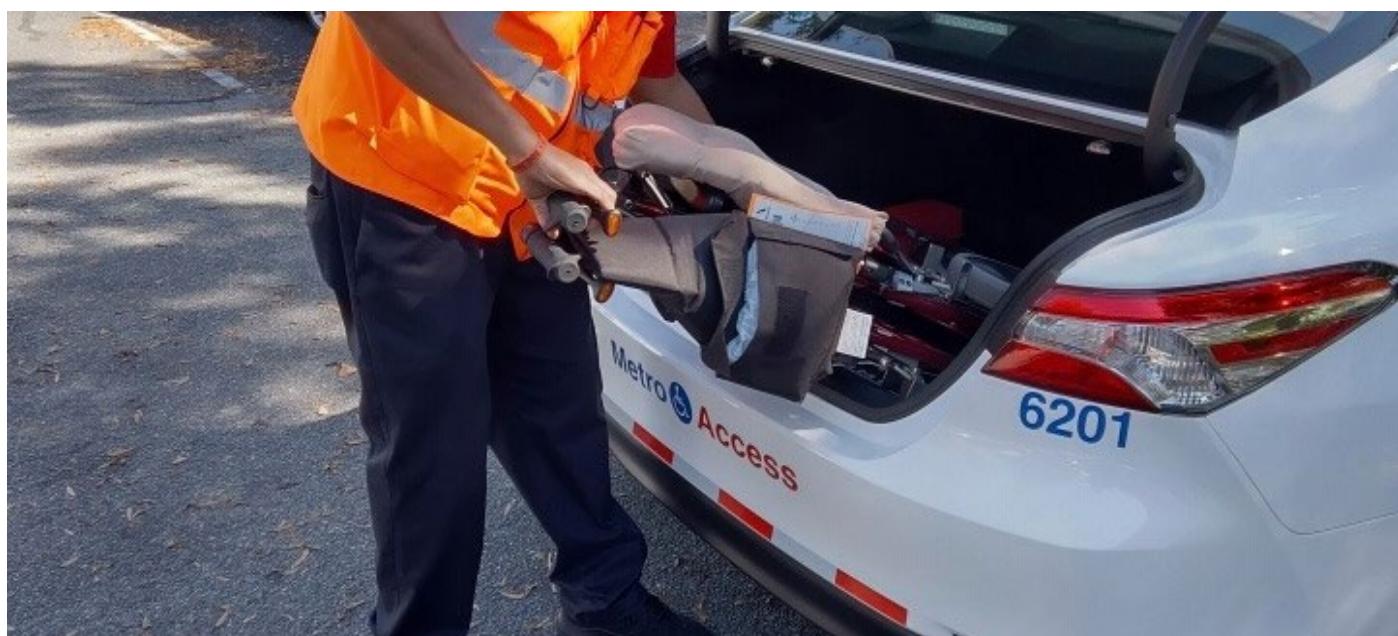

MetroAccess sources of funds include operating revenue and subsidy from Metro's jurisdictional partners.

- Jurisdictional subsidies of \$174.0 million support 95.8 percent of the MetroAccess budget
- Operating revenues are projected at \$5.1 million and cover 2.8 percent of Metro's paratransit costs.

MetroAccess passenger revenues are \$4.9 million in the FY2026 Proposed Budget, an increase of 10.1 percent when compared to FY2025 budget

- In addition, Metro projects prior year savings available to fund the FY2026 Budget, with \$2.6 million allocated to MetroAccess

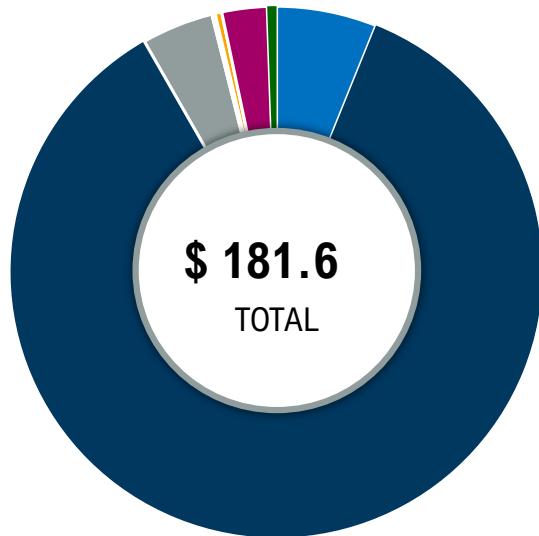

Pictured MetroAccess Sedan in parking lot

\$ 11.1	(6.1%)
PERSONNEL	

Personnel costs are budgeted at \$11.1 million, which is a \$1.2 million increase relative to the FY2025 Approved Budget.

Services expenses, which include Paratransit service expenses, account for the largest portion of the MetroAccess budget. From FY2023 to FY2024, these costs increased by \$12.6 million or 8.0 percent. In FY2026, total Services expenses are budgeted at \$163.4 million, an increase of \$4.4 million or 2.8 percent from

FY2025. At \$155.5 million for FY2026, Paratransit service expenses account for the majority of MetroAccess Service expenses. Many alternative carriers offer MetroAccess passengers more convenient options at lower cost. MetroAccess continues to facilitate the use of these alternative providers when available.

Energy costs, consisting of fuel and utilities, are projected to increase by 25.5 percent from FY2025 to FY2026.

Reimbursable Budget

Reimbursable projects are those unique services, programs and projects for which separate funding is provided by a jurisdiction or third-party entity. Metro is reimbursed on a dollar-for-dollar basis to provide the arranged services. Overall, the FY2026 Metro Reimbursable budget is \$13.5 million, a decrease of 12 percent from the FY2025 Board approved budget.

Pictured: Metrofest (2024) MTPD Exhibit

FUNDING SOURCES FOR REIMBURSABLE PROJECTS

(Dollars in Millions)	FY2024 Actual	FY2025 Budget	FY2026 Budget	\$ Change
Federal Grant Funding				
Safety and Security Grants	\$2.4	\$5.1	\$3.4	(\$1.6)

Overnight Bus	\$6.7	\$2.3	\$0.0	(\$2.3)
Total	\$15.0	\$15.3	\$13.5	(\$1.8)

Safety and Security Grants

Metro has been awarded several grants under the Transit Security Grant Program (TSGP) from the Department of Homeland Security (DHS). The security grants provide funding for capital and operational security activities. The funding enhances the ability of the Metropolitan Transit Police Department (MTPD) to detect and deter potential attacks of international and homegrown terrorism through increased visibility, unpredictable presence, security assessments, and employee/public awareness. As Federal appropriations become available, Metro

continues to pursue new funding to further enhance security activities.

Joint Development and Adjacent Construction Projects

Metro's Office of Joint Development and Adjacent Construction reviews and approves construction activities for projects adjacent to Metrorail and Metrobus property, facilities, and operational right of way to ensure that:

- Metro facilities and operations are not damaged or affected during and after the project's construction

- The requesting private entity or jurisdiction reimburses Joint Development expenditures

The Joint Development office performs the following activities for the entities:

- Provides internal Authority departmental coordination with the project's owner/developer/contractor (ODC), including external agencies, jurisdictions, property owners, consultants, developers, utilities, and/or anyone who impacts Metro property, facilities, and/or operations
- Prepares project agreements in conjunction with Real Estate and Station Area Planning and the General Counsel
- Provides coordination/oversight for all aspects of a project, including design, safety, operations, constructability, compliance with Metro standards, monitoring/coordinating construction activities, and acceptance of on-site installations and facilities
- Provides oversight and acceptance for joint development and jurisdictional reimbursable projects that Metro will ultimately own and operate

Metrobus Lane Violation Detection

To deter vehicle operators in the District of Columbia from blocking Metro's bus lanes, Metro entered an agreement with the District of Columbia Department of Transportation to enforce tickets and fines on violators who obstruct bus movement along the routes. Metro and the District Department of Transportation (DDOT) employ an automated camera-based enforcement system, the Metrobus Detection System. Metro has acquired and mounted cameras on its buses operating within the District Bus Priority Infrastructure (bus zones and lanes). Metro has no enforcement rights for bus lane violations in the District of Columbia. Metro provides the necessary administrative and maintenance services on the violation detection system and photo equipment, including administrative services, installation, testing support, recordkeeping, and related maintenance of the vehicle detection system equipment and data. Additionally, Metro manages applicable vendor system requirements. DDOT, in return for Metro's services, pre-deposits funds based on a projected annual cost to cover Metro's upkeep of the violation detective system. Staff periodically reconciles the account as required and submits it to DDOT to replenish the account. The covered expenses are as follows:

- Vehicle base licensing
- Vehicle cellular data and vehicle base systems software licensing

- Other fees and possible vendor incentive

National Explosive Detection Canine Team Program

Metro participated in the National Explosive Detection Canine Team Program (NEDCTP), a training program for transit agencies by the Federal Transportation Security Administration (TSA). However, this award was withdrawn due to TSA program cancelation in FY2025, and no funding is budgeted for FY2026 for related Canine Patrol Operation expenditures.

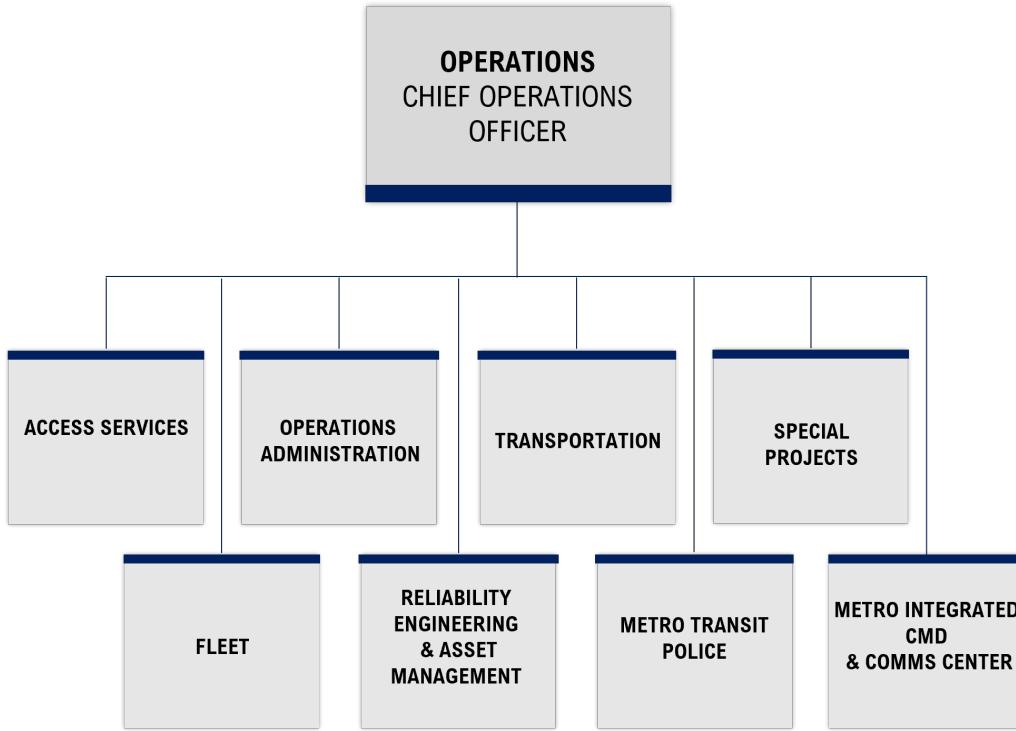

Overnight Bus Program

Metro operates an overnight bus program to provide 24-hour enhanced service in the District of Columbia along selected routes. The District of Columbia funds all incremental operating costs for operations, security and communications. The overnight bus program provides bus ridership services at late hours to meet customer and public demand for a safe, reliable, and equitable customer experience. Beginning with the FY2026 Budget, funding for this program is moved to the Operating Budget to ensure appropriate functional reporting. All costs continue to be fully funded through the District of Columbia.

Pictured: Buses picking up customers at Rhode Island Avenue station

Operations

Operations staff operate buses and trains; maintain Metro vehicle fleets; and ensure a safe and secure environment for passengers and employees.

The offices within Operations are **Transportation**, **Fleet**, **Access Services**, **Metro Transit Police Department**, **Metro Integrated Command & Communications Center**, **Reliability Engineering & Asset Management**, **Operations Administration**, and **Special Projects**.

Transportation provides bus and rail service in the District of Columbia, Maryland and Virginia. The department manages operators, station managers, supervisors and administrative functions for all bus and rail transportation divisions, including bus operations, bus division operations, station operations, train operations and rail division operations.

Fleet maintains and procures vehicles for rail and bus passenger and non-revenue use, including related engineering, quality, and administrative functions.

Access Services provides paratransit service to eligible customers through overseeing contracted services and assessing eligibility for MetroAccess Service and the Reduced Fare Program.

The **Metro Transit Police Department (MTPD)** is responsible for the security of Metro customers, personnel, and transit facilities throughout the 2,000-square-mile Transit Zone that includes the District of

Columbia, State of Maryland, and Commonwealth of Virginia.

The **Metro Integrated Command & Communications Center** safely and efficiently moves people, via buses and trains, throughout the system seven days a week. The Metro Integrated Command & Communications Center has four main functions: controlling bus and rail traffic, coordinating system information for both internal and external stakeholders, overseeing the safety and security of the system, and managing maintenance requests.

Reliability Engineering & Asset Management takes advantage of the many synergies and efficiencies provided by having complementary individual elements of maintenance planning, reliability and asset management under one centralized office.

Operations Administration ensures Metro's internal clients are well-equipped, providing direct support and managing oversight of financials, resources, policies, workforce availability, and administrative functions within Operations to ensure that all activities are accomplished.

Special Projects supports the Chief Operations Officer in project management and coordination between departments throughout Metro to advance the goals of the Strategic Transformation Plan, focusing on the core transit services and supporting functions.

FY2026 Key Efforts

Operations continues to support Metro's Strategic Transformation Plan goals and have identified the following key efforts for FY2026 to advance these goals.

Service Excellence

- Continue implementation and continuous improvement following re-introduction of Automatic Train Operations and Return to Design Speeds
- Advance the 8000-series railcar procurement
- Continue focus on problem-oriented policing
- Continue to imbed the Rules Compliance program across Operations and Infrastructure

Talented Teams

- Grow MTPD recruitment and training efforts through the Cadet Program and Criminal Justice Academy

- Expand enhanced supervisory management training

Regional Opportunity and Partnership

- Continue implementation and continuous improvement following the launch of the Better Bus Network Redesign

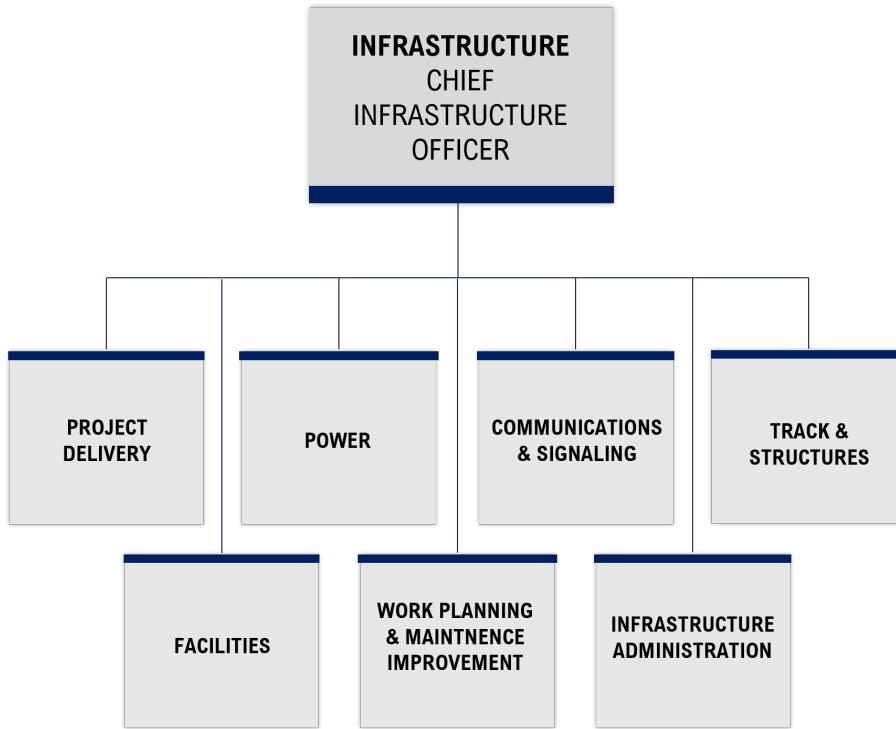

Sustainability

- Continue implementation of the Zero-Emissions Vehicle strategy for Bus and MetroAccess
- Continue to transition to digital forms in operational and administrative functions

Pictured: Metro Integrated Command and Communications Center (MICC)

Infrastructure

The Department of Infrastructure executes the inspection, maintenance, and rehabilitation of all fixed assets throughout Metro and delivers the capital construction program from development of implementation strategy for all approved projects through daily oversight of project execution.

The Department of Infrastructure's organizational structure consists of seven main divisions: Project Delivery, Power, Communications & Signaling, Track & Structures, Facilities, Work Planning & Maintenance Improvement, Infrastructure Administration, and Rail Transformation. The Department continues to implement processes to support the organizational realignment to focus on asset types (e.g., power) and the stages of the infrastructure life cycle (design, build, maintenance, etc.).

Communications and Signaling ensures the seamless functioning of Metro, safeguarding communication, movement, and the well-being of our employees and passengers. Communications and Signaling manages and plans the signaling and communication system operations, maintenance, and quality assurance for bus, rail, and MetroAccess service, including the engineering required to complete the work and technical projects to support the future state of Computer Based Train Control.

Facilities inspects, maintains, and rehabilitates system-wide facilities and related infrastructure assets to include Plant, Systems, Elevators/Escalators, Mechanical, and

Architecture. In addition, Facilities coordinates weather-related activities for infrastructure stations, parking lots, and buildings.

Project Delivery delivers the Authority's capital program for all approved projects, from development of implementation strategy through daily oversight of project execution until assets are turned over to Operations.

Power inspects, maintains, and rehabilitates power assets throughout the Authority to include low voltage assets, hundreds of AC Rooms, Tie Breaker Stations, Traction Power Substations, and a High Voltage cable plant of over 10,000 High Voltage cables.

Track & Structures inspects and maintains the state of good repair and capital delivery program for 260 miles of mainline track, 100 miles of tunnel, and 35 miles of aerial structures. Responsibilities include the development and execution of inspections, repairs, and the engineering required to complete this work.

Work Planning & Maintenance Improvement delivers efficient use of track occupancy by planning and coordinating track access, maintenance improvement strategies of all fixed assets, and developing long-range maintenance plans.

Infrastructure Administration delivers strategic direction and management of Infrastructure by establishing guidelines and processes for administrative

functions. Infrastructure Administration directs strategic priorities for infrastructure leadership and a diverse workforce of approximately 4,000 Infrastructure employees.

FY2026 Key Efforts

The Infrastructure Organization continues to support Metro's Strategic Transformation Plan goals and have identified the following key efforts for FY2026 to advance these goals.

Service Excellence

- Complete transition to the new track inspection frequency program to increase inspection efficiencies
- Execute planned major outages in the Summer and Winter 2025 to deliver major infrastructure improvements. Planned major outages include work on the Blue Line from Franconia-Springfield to Van

Dorn Street, the Green Line from Branch Ave to Congress Heights, and the Green Line in the area of Georgia Ave-Petworth to Archives

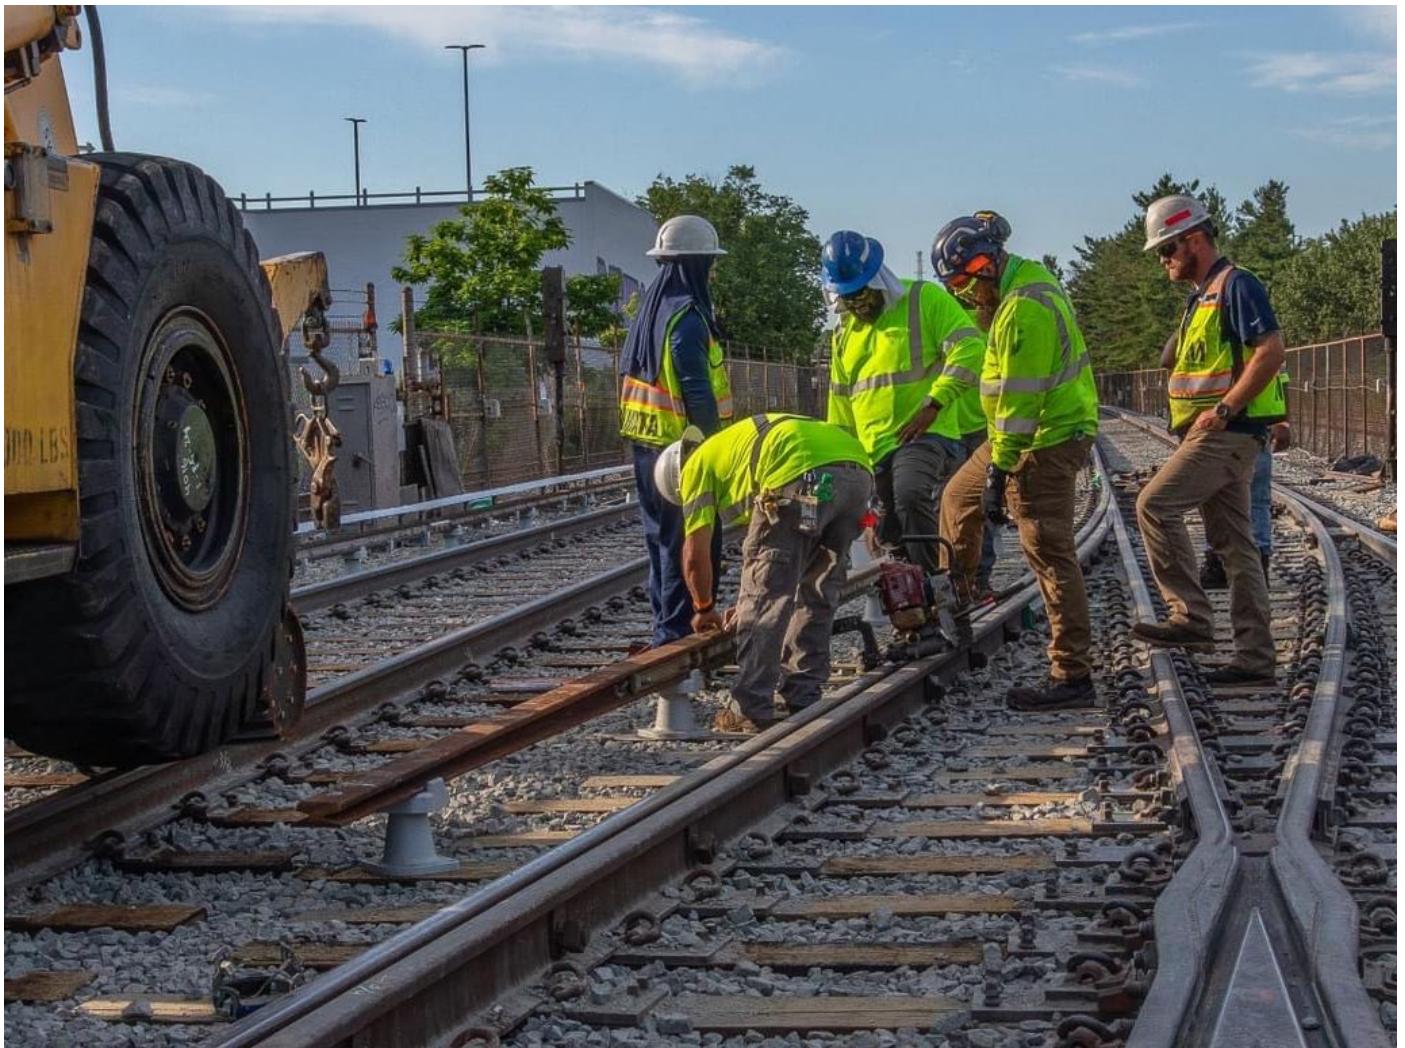

- Increase wrench time in the overnight, non-revenue hours to maximize the time work crews have to complete work each night
- Continue to advance the next generation signaling program, to include implementation of Automatic Train Control on Metrorail lines

Talented Teams

- Continue increased recruitment of interns and recent college graduates to train the next generation of Metro employees and leaders

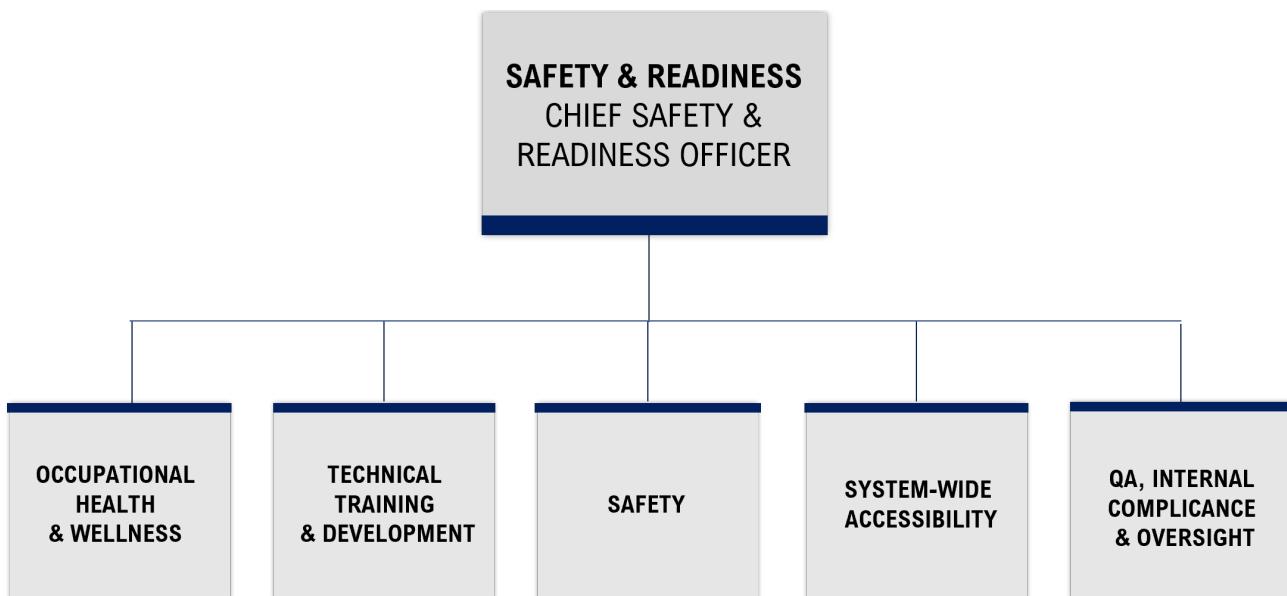

Regional Opportunity and Partnership

- Advance planning and preparation for a station closure around Bethesda to build the Maryland Purple Line Second Entrance in Summer 2026

Pictured: Metrorail workers performing necessary track rehabilitation

Safety & Readiness

Safety & Readiness ensures Metrobus, Metrorail, MetroAccess and Metro's facilities are operationally safe and environmentally sound for all employees, customers and surrounding communities, as well as provides internal occupational health and regulatory safety services. In collaboration with all other departments, Safety & Readiness promotes Metro's safety culture throughout the organization from the Board of Directors to every employee, regardless of position or location. Safety & Readiness is responsible for the management and compliance of policies and procedures in the following areas:

- Hazard identification and mitigation
- Incident and accident investigation
- Emergency preparedness
- Safety and security certification
- Oversight of construction safety
- Occupational safety and health
- Environmental management and compliance
- Quality business practices for Metro's overall quality, efficiency, reliability, and safety
- All-inclusive operational and safety training
- Accessibility standards to improve customer and workplace safety

Safety & Readiness is organized into five offices:

Safety: Safety leads the strategic implementation of a safety management system (SMS), a systematic way to continuously identify and monitor hazards and control risks while maintaining assurance that these risk controls are effective. Safety's main responsibilities include Safety Assurance (to include Safety Certification, Investigations, Oversight and Data Analytics); Safety Risk Management (to include Operating Practices, Occupational Safety & Health, and Environmental Management and Compliance); Safety Policy and Promotion; and Emergency Preparedness.

Occupational Health and Wellness: Occupational Health and Wellness provides occupational health services (clinical, drug and alcohol, etc.) to employees and prospective employees, as well as employee support programs to current employees to include health and wellness offerings, lactation support and reasonable accommodations in compliance with Title I of the Americans with Disabilities Act (ADA). Occupational Health and Wellness promotes and monitors health and wellness to encourage a healthy workforce, as well as supports public safety by ensuring Metro employees meet physical and psychological standards for safety sensitive duties; monitoring Metro's compliance with FTA Regulations in the prevention of alcohol misuse and prohibited drug use; endeavoring to improve and monitor employees' overall health and quality of life to include support programs, health and wellness offerings, as well as lactation support; and ensure compliance with Title I of the Americans with Disabilities Act of 1990 and any associated regulations pertaining to individuals with disabilities.

Quality Assurance, Internal Compliance & Oversight:

The department manages a system of internal controls to elevate Metro's overall quality, efficiency, reliability and safety through unbiased internal reviews and assessments of service delivery, new railcar commissioning, engineering & maintenance, capital program management and safety functions. This department is also responsible for the coordination and oversight of the closure of corrective/preventive actions that address internal and regulatory safety recommendations and required actions. Finally, this department manages Metro's Policy Instruction (P/I) Manual and leads the development and implementation of Metro's Quality Management System Plan (QMSP).

Technical Training & Development: The Office of Technical Training & Development addresses operational readiness by centralizing and streamlining operational and safety training and certifications across the organization. Additionally, the office manages the Technical Skills Program to recruit, train and graduate new employees into hard to source skill-based areas such as elevator/escalator, railcar and automatic train control maintenance. Technical Training and Development is also responsible for developing the Training Center of Excellence implementation plan.

System-Wide Accessibility: The Office of System-Wide Accessibility establishes enhanced accessibility standards to improve customer and workplace safety by consolidating all accessibility related roles, working in partnership with Metro Departments to promote accessibility for people with disabilities.

FY2026 Key Efforts

The Safety and Readiness Organization continues to support Metro's Strategic Transformation Plan goals and

have identified the following key efforts for FY2026 to advance these goals.

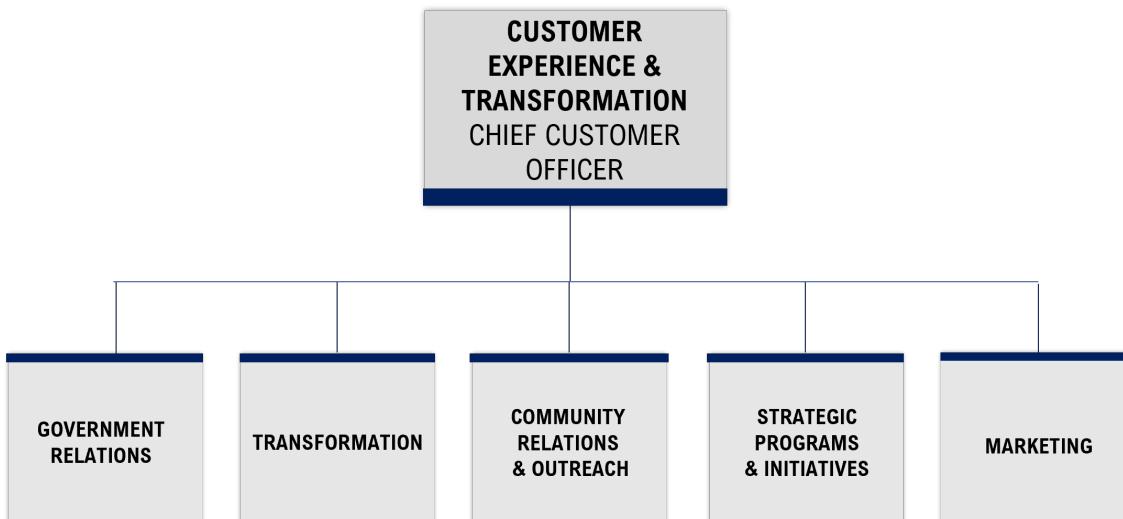

Service Excellence

- Establish a comprehensive framework where management and staff collaborate to continuously improve how safety risks are identified, assessed, and mitigated. The Safety Management System (SMS) initiative will evolve Metro's approach to safety and risk management with an improved, enterprise-wide SMS

Talented Teams

- Establish a comprehensive, incentive-based wellness program to drive employee engagement, as well as strengthen employee health and wellness programs
- Define measurable goals and standards consistent across the agency to enable all employees to contribute to the quality, safety, and reliability of work and services through the Authority-Wide implementation of the Quality Management System (QMS) program by the Quality Continuous Improvement team
- Build a dedicated facility for the new Metro Training Center which will be the hub for Operations, Infrastructure, and Safety Training for Metro. It will incorporate non-revenue assets for technical trainings (railcars, bus maintenance equipment, etc.) and multiple learning modalities (simulated, hands-on applied, class instruction, etc.)
- Update and standardize departmental policies and procedures to incorporate Instructional System Design for adult learners throughout all technical training and development training materials

Customer Experience & Transformation

The mission of the Department of Customer Experience & Transformation is to grow and sustain a satisfied customer base. At the core, our primary goal is to deliver better service, market and explain that service and provide helpful information to customers along their journey. Whether customers are deciding to take a train, bus or car, or on a train platform viewing information displays, at a bus stop looking for real time arrival data, planning a trip with Google Maps, getting email alerts about a specific line/bus route, or following us on social media – our messaging should be accurate and helpful.

This team extends and leverages efforts to employees, stakeholders, elected officials, the public and the media using a variety of tools within five complementary divisions.

The five divisions include: **Government Relations**; **Community Relations & Outreach**; **Strategic Programs & Initiatives**; **Marketing**; and **Transformation**. Partnering with other departments, this team develops strategies, processes, messaging and programs informed by customer insights to improve and resolve pain points. This department champions what customers value through insightful, data-driven research to deliver customer satisfaction. Together, this team is tasked with building and maintaining strong relationships with Metro's stakeholders, partners, customers, employees, regional elected officials, business and community groups, and the Board of Directors. A key priority includes engagement of stakeholders in support of Metro's Strategic Transformation Plan, *Your Metro, The Way Forward*, which helps drive business goals and objectives. Tracking progress and mitigating risks helps ensure widespread

understanding of where we stand in relation to the key priorities.

Through collaboration within the Customer Experience & Transformation organization, collectively our teams are the voice of the customer. Actively we drive cultural shifts toward a more customer-centric approach to what we do.

Each of our divisions makes key contributions:

Government Relations engages stakeholders in support of our business goals and objectives, coordinating with federal agencies, safety oversight organizations, jurisdictions, and Congress to ensure needed operating and capital funding support and foster collaboration with regional transportation providers.

Community Relations & Outreach provides proactive customer outreach to all, regarding planned events impacting service, fare increases, annual budgets and strategic community outreach as part of the public participation plan aimed at Limited English Proficiency (LEP) and American with Disabilities Act (ADA) customers.

Strategic Initiatives & Programs leverages technology, in conjunction with thoughtful customer research, to resolve and reduce pain points across the entire customer journey.

Marketing improves public confidence and helps grow ridership and non-fare revenue through advertising programs, merchandise development and informational campaigns.

Transformation engages stakeholders in support of Metro's Strategic Transformation Plan, *Your Metro, The*

Way Forward, with the goal of driving business goals and objectives, tracking progress and mitigating risks.

FY2026 Key Efforts

The Customer Experience and Transformation Organization continues to evolve and supports Metro's Strategic Transformation Plan goals and has identified the following key efforts for FY2026 to advance these goals.

Service Excellence

- Launch Contact Center as a Solution (CCaaS) technology that reduces call times by providing self-service options for customers and modern tools for staff while offering customers a vanity number (202-GO-METRO) to reach Metro
- Expand strategic wayfinding efforts to create a unified system of screens, signs, maps, and real-time information at key moments throughout the customer journey
- Ensure a customer first approach to all new and existing product/service design. This is achieved by incorporating a "Service Design" operating framework into new product launches as well as ongoing initiatives such as: 8000-Series railcars, MetroPulse app, and development of a new www.wmata.com website

Talented Teams

- Partner with operations training department to launch an updated customer experience (CX)

training program for bus and rail front-line employees organization-wide

- Pilot new WMATA frontline uniforms

Regional Opportunity and Partnership

- Support Better Bus Network Redesign Program implementation, including aligning regional signage system, marketing, community outreach, and training for customer service staff
- Grow merchandising and licensing opportunities through events and online promotions
- Engage stakeholders, including Metro's regional Congressional delegation and business leaders, in support of Metro's business goals and objectives; coordinate with federal agencies and safety oversight organizations

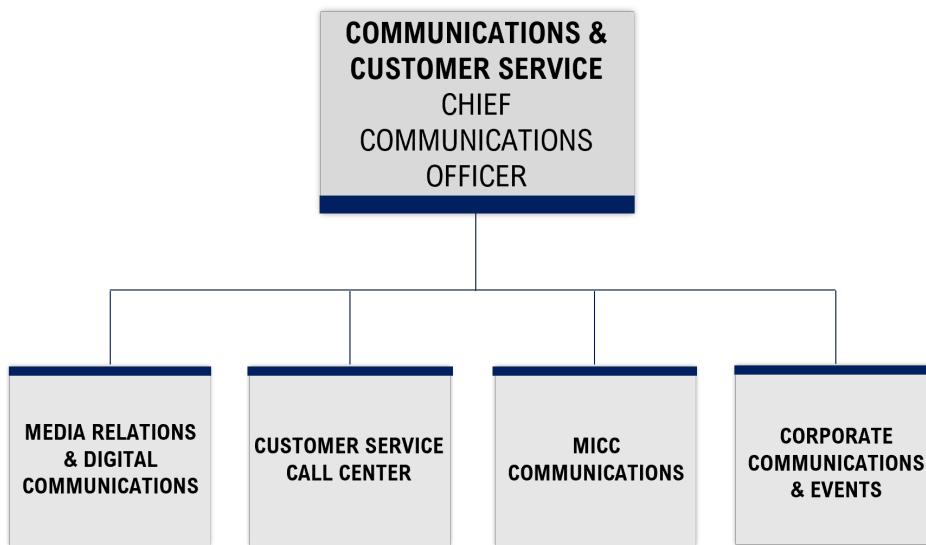

Sustainability

- Support DMVMoves: In partnership with the Metropolitan Washington Council of Governments, to advance a unified vision and sustainable funding model for public transit in our region
- Drive, market and incorporate a customer centric approach to implementing Open Payment system to transform how Metro collects fares.
- Introduce a minimum of two marketing communication campaigns designed to reach visitors and increase off-peak ridership

Pictured: Metro Fest (2024) customer on a vintage Metrobus

Communications & Customer Service

The Organization of Communications and Customer Service's primary function is to grow and sustain a satisfied customer base, maintaining historic satisfaction numbers through clear, concise messaging. Our focus is delivering accurate, timely and helpful information to customers that guides their decision-making during every part of their transit journey. Whether our customers are on the platform viewing information displays, at a bus stop looking for real-time arrival data, planning a trip through [wmata.com](#), or following us on social media – our service messaging should be accurate and a source of helpful information. This unified approach helps us build trust and transparency in the community, improving the customer's journey throughout our system.

To accomplish synchronization of customer messaging, we leverage owned and earned channels within four complementary divisions: **Media Relations & Digital Communications**; **Customer Service Call Center**; **MICC Communications**; and **Corporate Communications & Events**.

Working collaboratively with other departments to support the voice of employees and customers, this team develops strategies, processes, messaging, and programs informed by customer insights to enhance customer experiences and resolve pain points. Collectively, this team is tasked with building and maintaining strong relationships with Metro's Board of Directors, employees, customers, partners and stakeholders, regional elected officials, business and community groups.

We craft impactful messages, report relevant metrics, implement tracking mechanisms, provide positive

reinforcements, offer recommendations for recognition and actively drive our culture towards a more customer-centric approach.

Integrating these diverse channels is paramount in supporting our Strategic Transformation Plan priorities: Service Excellence, Talented Teams, Regional Opportunity and Partnership and Sustainability

The following are key areas of focus for each group:

Media Relations & Digital Communications engages new customers by growing all social media channels and relationships with local, regional and national media. This group works to elevate positive narratives that educate and inform customers about new initiatives, emphasizing accurate reporting to ensure Metro is shown in the best light.

Customer Service Call Center supports the procurement, implementation and launch of Contact Center as a Solution (CCaaS). This team will also focus on updating and integrating new customer relationship management (CRM) functions to provide a better customer experience for SmarTrip and trip planning.

Metro Integrated Command and Communications Section will continue building support of the Metro Integrated Command and Communications Center to fully support operational communications 24/7. This team also monitors and responds to social inquiries, investigates and documents issues and provides immediate responses to inquiries from customers and up-to-date information for executives.

Corporate Communications & Events engages frontline and administrative employees to ensure knowledge and awareness of Metro initiatives, as well as elevates Metro employee accomplishments through programs and award opportunities using storytelling through owned channels to highlight Talented Teams. This team focuses on The Communications and Customer Service Organization continues to support Metro's Strategic Transformation Plan goals and have identified the following key efforts for FY2026.

Service Excellence

- Implement and launch Contact Center as a Solution (CCaaS) program that reduces call times by providing self-service options for customers and modern tools for staff
- Continue building the Communications Section of the Metro Integrated Command and Communications Center to fully support operational communications 24/7
- Highlight wayfinding efforts through narratives that showcase continuous improvements in the customer's journey
- Execute one-stop shop for customer initiatives through call center support, lost and found services and merchandise promotions

fostering cross-departmental and external collaboration to ensure operational support matches large-scale regional events.

FY2026 Key Efforts

Talented Teams

- Build new organizational channels to support employee engagement and highlight initiatives
- Continue to build support that expands Communications and Customer Service

Regional Opportunity and Partnership

- Support Better Bus Program implementation by pitching in-depth media stories and creating robust public education campaigns
- Collaborate with regional partners to ensure understanding of Metro initiatives: Metro Pulse, Open Payment, World Pride 2025, Better Bus, Smartrip operations

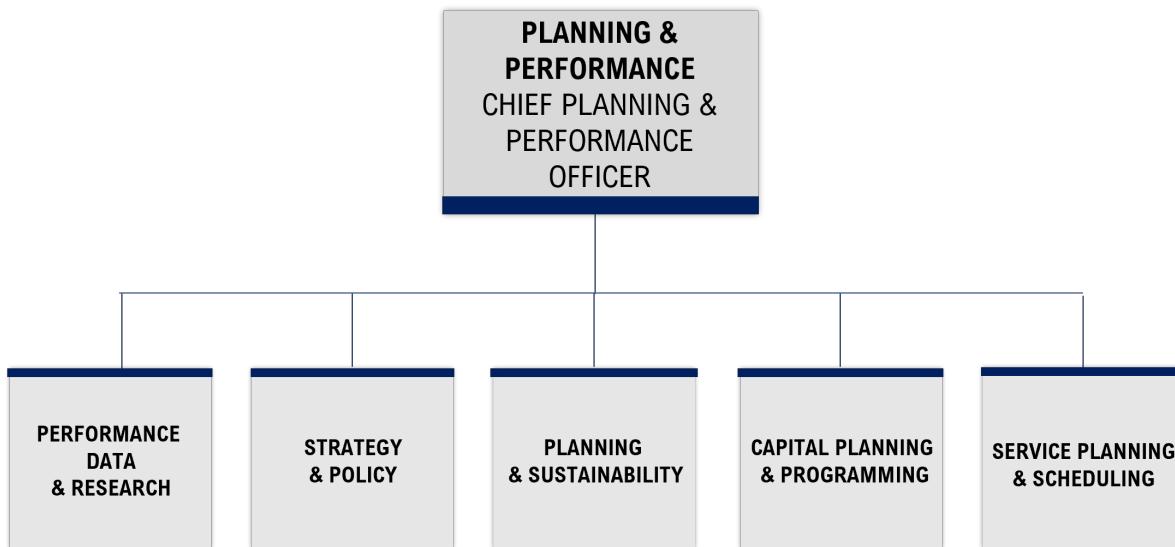

Sustainability

- Support DMVMoves: In partnership with the Metropolitan Washington Council of Governments, to advance a unified vision and sustainable funding model for public transit in our region

Pictured: Better Bus launch party celebration with balloons

Planning & Performance

The Planning and Performance Organization drives Metro's strategy; plans new and on-going programs and projects; develops bus and rail service schedules; and measures Metro's success at delivering against those plans. Planning and Performance includes five Departments: **Performance Data & Research**, **Planning & Sustainability**, **Strategy & Policy**, **Service Planning and Scheduling**, and **Capital Planning & Programming**.

The **Performance, Data, and Research** department leverages research, data, and analysis to inform, propose, and implement strategic recommendations that enhance Metro's performance and drive its transformation.

The **Service Planning and Scheduling** department prepares bus and rail service plans and schedules to ensure adequate capacity and reliability with the most efficient use of Metro's resources for new vehicle and operator schedules, including special events and planned service disruptions.

The **Planning & Sustainability** department develops medium and long-range transformational plans and projects and injects the value of environmental sustainability into Metro's programs and projects.

The **Strategy & Policy** department develops long range and overarching visions for the Authority while also assisting in the tactical implementation of those goals.

The **Department of Capital Planning & Programming** builds and oversees Metro's prioritized capital program. The programs and projects delivered by Metro advance the strategic transformation plan associated with Service

Excellence, Talented Teams, Regional Opportunity and Partnership, and Sustainability.

FY2026 Key Efforts

The Planning and Performance Organization continues to support Metro's Strategic Transformation Plan goals and have identified the following key efforts for FY2026 to advance these goals.

Service Excellence

- Implement 2025 Better Bus Network: Facilitate delivery and communication of the new network in the summer of 2025 and transform bus data to enable analysis of new network
- Transform Business and Operations: Continue to elevate the impact of dashboards, performance and ridership reports, open data portal, the STAT program, and industry benchmarking by aligning them with annual agency strategies priorities and initiatives
- Lead in Data Science: Develop reliable data tools and provide essential technical resources to support researchers and analysts, fostering a robust data science environment. Develop and refine quantitative models to forecast, optimize, and refine service delivery

Talented Teams

- Support Business Operations and Staff Management: Equip leaders with advanced tools and methods, such as new budget and training

dashboards, centralized contractor management, and expedited hiring and onboarding. Boost morale by measuring staff sentiment through annual and pulse surveys and implement engagement action plans to enhance workplace satisfaction

- Foster Employee Innovation: Continue to support testing and evaluation of new technology and practices that improve resource- and cost-efficiency through the Sustainability Lab and host the annual Sustainability Challenge to celebrate and highlight employees who go above and beyond to advance social, economic, and environmental sustainability for Metro and the region
- Modernize Fare Payment: Continue to advance projects that make it easier for customers to pay fares using their credit/debit card, mobile wallet, or smart watch. Develop fare policies and collections infrastructure designed to increase fare payments while increasing accessibility to the system

Regional Opportunity and Partnership

- Develop and Publish Metro's Capital Improvement Program (CIP) and Long-Range Plan: Inform the community and regional stakeholders of future investments and the performance of ongoing investments, including related community and service impacts
- Prioritize Buses on Region's Roads: Continue to work with local and state road owners to advance red painted bus lanes, expand Clear Lanes, and analyze benefits and impacts of bus priority measures

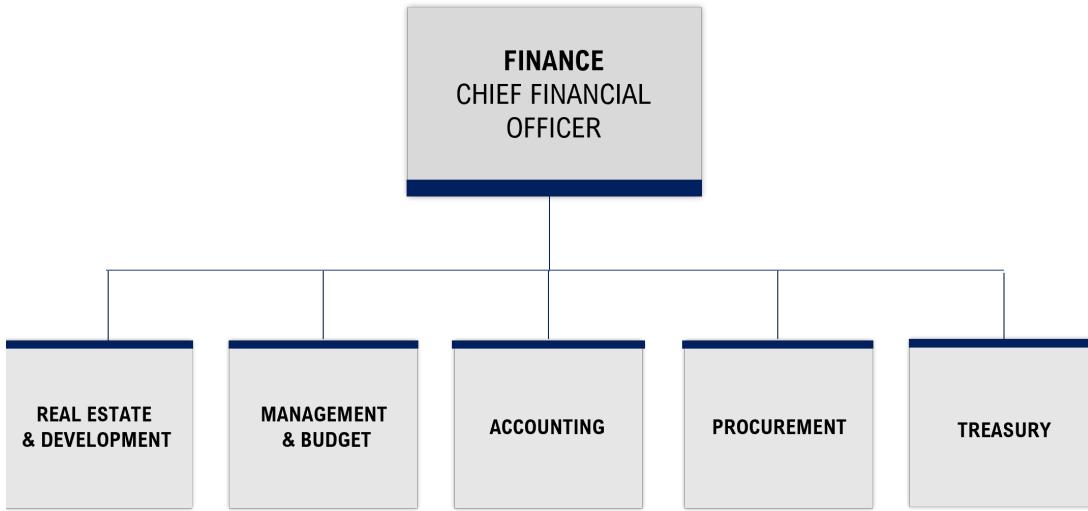

Sustainability

- Efficiencies in the Capital Program: Continue to review capital investments to identify efficiencies and free up resources for capital initiatives by identifying overhead cost savings and simplifying standards, requirements and practices to drive long term capital cost savings
- Formulate Metro's Capital Program: Capital Planning and Programming ensures Metro's resources are prioritized by undertaking a State of Good Repair Needs Outlook to inform the proposed capital program and completing Performance Outcome Measures to evaluate how well the capital program helps Metro reach its overall goals
- Sustainably Advance Energy Strategy: Continue strategic engagement in the energy sector – including though onsite solar generation, multiple year energy contracts, and energy efficiency rebates – to meet Board-adopted energy goals, control costs, and support the regional clean energy transition
- Plan for Climate Risk: Continue to develop tools and provide technical resources to integrate into agency wide risk management, support cost effective incremental investment to minimize future cost, and work with jurisdictional partners to resolve problems upstream
- Support DMVMoves: In partnership with the Metropolitan Washington Council of Governments, advance a unified vision and sustainable funding model for public transit in our region

Finance

The Finance organization ensures Metro moves the region forward through safe, reliable, and equitable public transportation, improved service and enhanced customer experience in a fiscally responsible manner. Finance advances fiscal integrity through budget development and management; financial planning, reporting and analysis; resource management and allocation; cash flow and investment management; quality procurement; and ensuring compliance with accounting standards and regulatory requirements. Finance enhances the Authority's fiscal sustainability by maximizing capital program funding through capital budget management and pursuit of grant opportunities, facilitating revenue collection and fare programs and managing Metro's real estate portfolio.

Finance comprises offices of **Management and Budget**, **Accounting**, **Real Estate and Development**, **Treasury**, and **Procurement and Materials**.

Management and Budget formulates and manages the annual operating and capital budget, conducts long-range financial planning and reporting, including ridership and revenue forecasts, and manages revenue, while leveraging data analysis of Metro initiatives to optimize performance and service to customers. Management and Budget also manages all Federal, State and local formula and competitive grant opportunities and provides oversight of awards from application to closeout including compliance with federal rules and regulations.

Accounting manages payroll operations, accounts payable and receivables, asset management, Metro's travel program (MetroTravel) and labor certification. Accounting directs the annual financial statements and single audits, as well as SmarTrip audits and tax filings.

Real Estate and Development optimizes the Authority's real estate and parking portfolios, as well as identifies and pursues joint development opportunities to enhance sustainability and livability of the region.

Treasury is responsible for risk management, revenue collection, liquidity management, corporate investments, debt management and fare media sales and distribution. Regional fare programs are an essential component of Metro's product offerings. The diverse range of fare discounts promotes ridership across age, income status, and reason for commute. Treasury provides support to key Metro initiatives such as Metro Lift, Senior Cards, University Pass (UPass) and Kids Ride Free, as well as facilitates relationships with local banks that directly support the regional economy.

Procurement and Materials manages Authority-wide acquisition services and is responsible for managing the acquisition of all goods and services for Metro. Procurement and Materials plays a critical role in ensuring the Authority has the resources necessary for efficient and effective operations, as well as provides a direct link supporting local vendors and fosters relationships with the small and minority vendor communities.

FY2026 Key Efforts

The Finance Organization continues to support Metro's Strategic Transformation Plan goals.

Financial Sustainability

- Implement MetroSync, Enterprise Resource Planning (ERP) software system, for Human Capital Management, Finance and Digital Modernization

- Leverage dedicated funding revenues via capital market opportunities and utilize short and long-term debt instruments including Transportation Infrastructure Finance and Innovation Act (TIFIA), lines of credit and direct purchase borrowings to complement and increase efficiencies as needed to bridge funding gaps
- Support DMVMoves: In partnership with the Metropolitan Washington Council of Governments, to advance a unified vision and sustainable funding model for public transit in our region
- Implement long-term financial planning and refine cost control and budget management processes for operating and capital budgets
- Streamline procurement process to improve customer service, procurement times, costs and inclusive contracting
- Implement new discretionary grants council to maximize Metro's pursuit of grant funding opportunities
- Support implementation of a strategy to minimize WMATA's warehouse footprint, resulting in financial savings

Regional Opportunity and Partnership

- Increase joint development readiness through strategic site and transit facility planning to generate new revenue and ridership as identified in the Ten-Year Strategic Plan for Joint Development, which set a goal of 20 new joint development agreements by 2032
- Strengthen partnerships with the small and minority vendor community by implementing a new socio-economic program funded with local funds
- Implement the UPass regional growth strategy by engaging diverse student populations in academic settings.

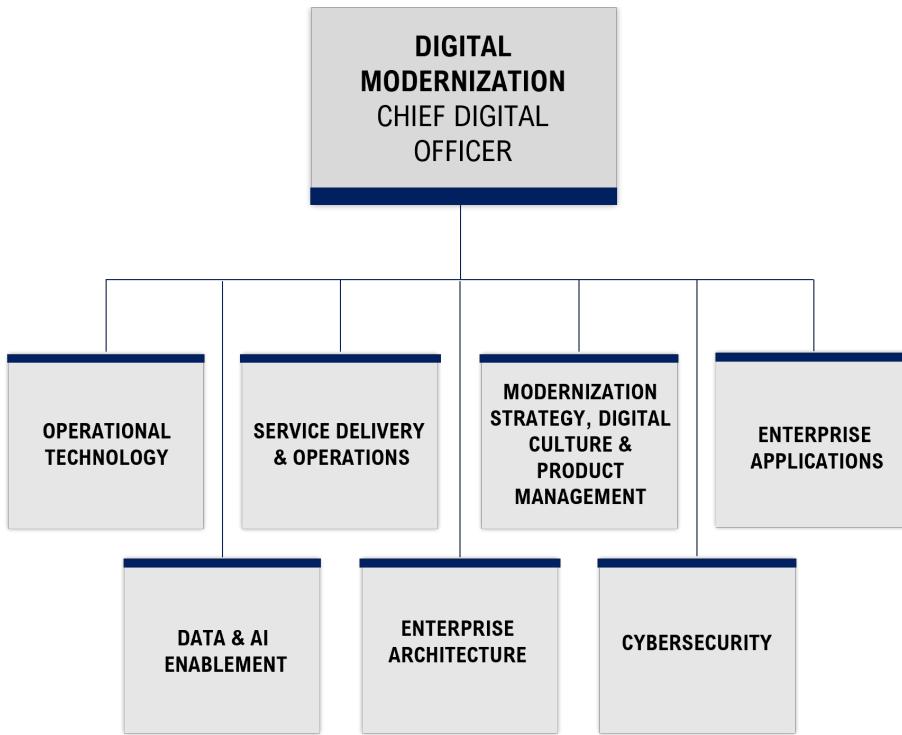

Service Excellence

- Provide support to the Better Bus Network redesign and Open Payment initiatives
- Begin implementation of upgraded cloud-based Parking Access Revenue Control System with License Plate Recognition at phase one stations
- Install on-demand bicycle lockers and secured racks systemwide to be completed by Fall 2027

Pictured: Bicycle Locker in front of station

Digital Modernization

Digital Modernization supports all operating components of Metro by providing technology solutions to provide, protect, maintain and support Metro's daily operations. This department provides a safeguard to Metro data and network access and promotes the security, compatibility, integration and interoperability of information and operational technologies. Additionally, incorporating Enterprise Architecture industry standards ensures the maintainability, affordability, scalability and performance of all digital assets and infrastructure.

Digital Modernization includes the offices of: **Cybersecurity**; **Data & Artificial Intelligence (AI) Enablement**; **Enterprise Applications**; **Enterprise Architecture**; **Modernization Strategy, Digital Culture & Product Management**; **Operational Technology**; and **Service Delivery & Operations**.

The **Office of Cybersecurity** enhances the safety, security, and reliability of Metro's operations through innovative, resilient, risk-based, and intelligence-driven cybersecurity programs, standards, and guidelines in partnership with departments Authority-wide and Metro's employees.

The vision of the **Data and AI Center of Excellence** is to establish, institutionalize, and advance the digital transformation and continual modernization of Metro's technology by leveraging artificial intelligence, machine

learning, robotic process automation, data science, and other technologies. We offer Metro the capability for advanced analytics, data visualization, and cognitive intelligence to facilitate informed decision-making to increase the effectiveness and efficiency of our business operations.

The **Enterprise Applications** team supports key business functions in modernizing Metro's key business functions through strategic collaboration, digital technology enhancement, and continuous innovation and improvement.

The **Office of Enterprise Architecture** partners with stakeholders throughout the authority to co-create Metro's technology vision and drive innovation to support business goals and actualize the Strategic Transformation Plan. The team guides Metro's digital transformation toward the technology vision through collaborative development and continuous improvement of technology roadmaps, strategic architectures, and standards-driven governance frameworks. This transformation will enable a "digital-first, customer-focused" Metro.

The **Modernization Strategy, Digital Culture & Product Management** enables digital platforms and the delivery of digital experiences through strategic planning, budgeting, policy development, continual innovation and

incorporating departmental strategy into our project and program delivery.

The **Office of Operational Technology** enhances the technology that powers our Rail, Bus, and Paratransit services, ensuring efficient, reliable, and innovative transit solutions for the national capital region through strategic collaboration, digital technology enhancement, and continuous innovation and improvement.

Service Delivery & Operations enables robust rail, bus, metro access and business services by enabling an integrated network and digital infrastructure, also providing responsive, reliable, automated customer service to support our internal customers.

FY2026 Key Efforts

The Digital Modernization Organization continues to support Metro's Strategic Transformation Plan goals and has identified the following key efforts for FY2026 to advance these goals.

Service Excellence

- Improved customer experience to include modernized fare payment, mobile schedules and trip prediction, and more accessible wayfinding in cooperation with our regional partners

Talented Teams

- Front line operations digitization to include more automation of critical operational workflows, forms and processes to better enable our teams to efficiently do their jobs

Regional Opportunity and Partnership

- Enterprise-wide video to improve safety, security and collaboration in regional law enforcement

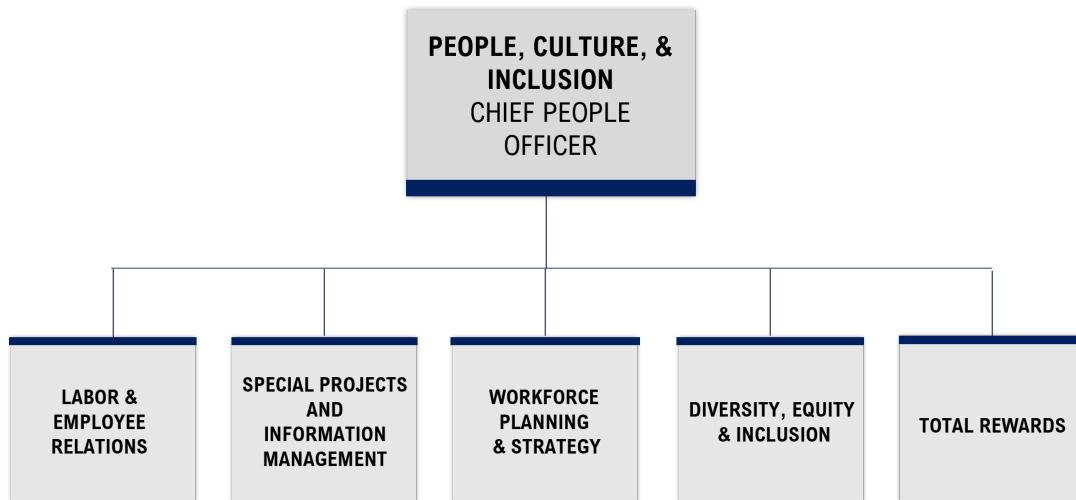

Sustainability

- Advance robust asset management, both work order standardization management and IT asset management to improve state of good repair of our vehicles
- Streamlined and enhanced business processes through digital workflows and electronic signatures, use of artificial intelligence to enable business processes, in particular through modernized Enterprise Resource Planning and timekeeping/scheduling systems which will provide modern enterprise analytics capabilities
- Implementation of a Zero-based Trust architecture for our cyber protections to enhance Metro's ability to protect customer data and safety
- Modernization of our information technology network and migration to a cloud-based architecture to provide a more robust foundation for continued digital innovation

Pictured: SmarTrip Tap to pay on a faregate

People, Culture, & Inclusion

People, Culture, and Inclusion supports all operating units within Metro, building Talented Teams where individuals feel valued, supported, and proud of their contributions. People, Culture, & Inclusion supports employee and labor relations matters; thereby, developing, maintaining, and improving employee relationships through communication and performance management, as well as interpreting and conveying Metro's policies and collective bargaining agreements. The department is also responsible for sourcing and supporting the selection of highly qualified talent; thus, delivering customer-friendly onboarding, implementing employee performance management programs, providing employee development, and learning opportunities, and promoting an engaged, diverse, and inclusive organization free from discrimination.

People, Culture, & Inclusion focuses on business innovation through organizational transformation and integrating strategic priorities across functions with the goal of establishing a culture of high performance at all levels of the organization. The People, Culture, & Inclusion portfolio includes **Workforce Planning and Strategy**, **Special Projects and Information Management**, **Labor and Employee Relations**, **Total Rewards**, and **Diversity, Equity, and Inclusion**.

The **Office of Workforce Planning and Strategy** supports talent acquisition, compensation, human capital solutions, and performance and learning. Drawing on the skills and talents of a team of certified professional recruiters and sourcing specialists, Talent Acquisition facilitates Metro's recruitment efforts for new talent, promotes a positive employment brand, and enables employee mobility through the employee job posting

process. Human Capital Solutions drives transformational change by formulating workforce and talent strategies and redefining practices, including the enterprise-wide workforce planning and the refinement of competency architecture and its integration into Human Capital processes.

The **Office of Special Projects and Information Management** is responsible for the strategic oversight, development, and management of the department's human capital information systems. This office plays a critical role in supporting workforce management by ensuring that Human Resource data systems are accurate, secure, and accessible. The Office of Special Projects and Information Management manages employee records, payroll information, benefits administration, and other personnel data.

The **Office of Labor and Employee Relations** is responsible for fostering a positive, productive, and compliant workplace environment that supports both organizational objectives and employees' rights. This office strengthens the employer-employee relationship and serve as a liaison to management for both non-represented and represented (unionized) employees. This office manages all aspects of labor relation, including negotiations, contract administration, dispute resolution and adherence to labor laws and regulations.

The **Office of Total Rewards** is dedicated to designing, implementing and managing a comprehensive compensation and benefits program that supports the Authority's mission, values and strategic objectives. This office focuses on creating a balanced mix of health and wellness benefits and retirement planning. It also

manages all aspects of Family and Medical Leave Act administration and provides guidance to both employees and managers. By maintaining transparency and equity, this office plays a pivotal role in building a culture of trust, engagement, and shared success.

The **Office of Diversity, Equity, and Inclusion (DEI)** supports WMATA's Strategic Goal for Talented Teams by engaging and promoting diverse talent at all levels and functions throughout the organization. DEI initiatives are essential to fostering a positive work culture by increasing employee morale, employee engagement and innovation from diverse perspectives. The Office of Equal Employment Opportunity (EEO) provides oversight, monitoring, and compliance with federal regulations, WMATA's EEO and Title VI plans. It provides advice and guidance on equal employment opportunity issues, review policies and procedures for barriers to equal employment opportunity, conducts workforce utilization analysis, sets goals to achieve a diverse workforce and investigates complaints of discrimination from employees and customers.

FY2026 Key Efforts

The People, Culture, and Inclusion organization continues to support Metro's Strategic Transformation Plan goals and have identified the following key efforts for FY2026 to advance these goals.

Service Excellence

- Launch improved Exit Surveys and Exit Interviews framework and processes
- Develop DEI programs and initiatives to recognize and celebrate WMATA's staff to foster an environment of trust and respect through townhalls, Employee Resource Group (ERG) sponsored events, and engagement opportunities. Provide updates to top leadership that identifies issues and solutions that enhance the work environment

Talented Teams

- Advance programs authority-wide that were piloted in FY2025, including the Mentoring Program, Manager Coaching Program, an updated Staged Retirement Program and New Hire Orientation 2.0
- Partner with Learning and Development to identify opportunity for ERG leadership development and growth. Design and launch an ERG Summit with collaboration across authority and external partner relationships
- Design and deliver an authority wide engagement strategy through a cross-departmental committee and create a role for engagement champions.
- Create a comprehensive diversity learning strategy focused on inclusion leadership, psychological safety, and bias. Work closely with learning and development for implementation.
- Launch newly designed recruiting module in partnership with MetroSync PMO launch that will leverage to move forward with several strategic advantages such as enhanced integration and data consistency with our third-party background check vendor, improved accessibility for candidates to include mobile devices, enhanced proactive talent sourcing and management, and improved candidate experience

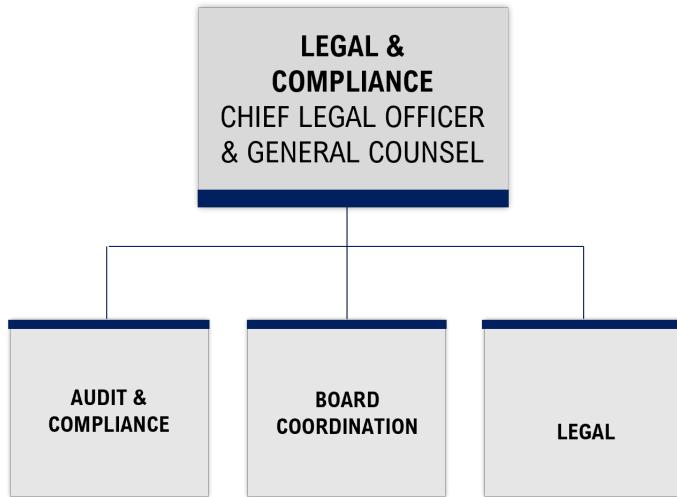

Regional Opportunity and Partnership

- Establish WMATA Learning and Development Council and increase ERG engagement and partner with Community Engagement to increase awareness of WMATA opportunities

Sustainability

- Roll-out Metro Elevate Succession Management Program organization-wide and finalize the cleanup of Competency Architecture (structure, definitions)
- Eliminate paper training guides, resources, and materials by 40 percent

Legal & Compliance

Metro's Legal & Compliance organization includes Legal, Audit & Compliance, and Board Coordination. The **Legal** department is responsible for all legal affairs of Metro and provides high-quality legal advice and counsel to the Board of Directors, executive management, and all Metro departments and offices. The **Audit & Compliance** department conducts internal audits, reviews, and assessments of Metro's internal controls and business processes to help Metro more effectively manage risks. The **Board Coordination** office coordinates all activities between staff and the Board of Directors.

FY2026 Key Efforts

The Legal and Compliance Organization continues to support Metro's Strategic Transformation Plan goals and have identified the following key efforts for FY2026 to advance these goals.

Service Excellence

- Continue to understand, manage, and mitigate legal and operational risks
- Optimize legal services to departments and types of matters to align with Enterprise Risk Management framework
- Fully execute the FY2025 Internal Audit Plan that supports Metro's Strategic Transformation Plan

Talented Teams

- Continue to support the professional development of the entire Legal & Compliance team, including through continuing education courses
- Optimize legal services to departments and types of matters to align with Enterprise Risk Management framework
- Continue to partner with Digital Modernization to ensure appropriate governance, risk management, and compliance to implement and scale AI across the Authority

Regional Opportunity and Partnership

- Provide legal support to departments for new and existing jurisdictional agreements such as Kids Ride Free, UPass, DC 24-hour Bus, and reimbursable construction agreements

Sustainability

- Continue to understand, manage, and mitigate legal and operational risks
- Provide legal support to departments for funding and financing agreements for operating and capital budgets, as needed

Chapter 4 – Capital Budget

Metro looks to the future – planning to provide the world-class transit system the region deserves.

Pictured: Metrobus operator greeting customer boarding bus

Overview

The Washington Metropolitan Area Transit Authority (Metro) FY2026 Capital Budget includes \$2.1 billion in capital investments and the FY2026-2031 Capital Improvement Program (CIP) totals \$10.5 billion in capital investments. This does not include debt service and revenue loss from capital projects. Metro's capital investments focus on state of good repair and reliability of MetroAccess, Metrobus, and Metrorail assets. The CIP is constrained and acknowledges limited capital funding capacity due to exhaustion of dedicated funding used to issue debt by the end of FY2029. The CIP includes investments to improve the cost effectiveness of Metro's operations and reduction of asset lifecycle costs.

Highlights of the budget include:

- Continued state of good repair investments

- Replacement of Northern & Bladensburg Bus Divisions and facility investments to run electric vehicles
- Lifecycle replacement of Bus and Paratransit vehicles
- Initial 8000-Series Railcar acquisition
- Continued planning for an advanced signaling system, including the installation of platform screen doors at one Metrorail station.

There is limited capacity to advance new capital projects between FY2026 – FY2031. Lack of funding will force Metro to adopt a primarily reactive capital investment strategy. To best position Metro to support this strategy a limited number of major capital investments, with a focus on both customer facing and back-office operation cost effectiveness, are recommended to

move from project development into execution between FY2026-FY2031 including:

- A Metro Training Center to enhance operational and safety training for Metro's workforce in an integrated and cost-effective manner
- Re-investment in the backup Metro Integrated Control Center
- Facility improvements / retrofits at railyards to partially mitigate near-term railcar maintenance facility constraints and improve operational efficiencies
- Continued project development of the new advanced signaling system, including a demonstration of platform screen doors at one station
- Replacing legacy systems with modern technology to establish a modern, flexible digital ecosystem to support efficient operations
- Allocations for primarily reactive state of good repair needs to address assets as performance or inspection data requires in lieu of full-scale proactive replacement

Additional information regarding Metro's 10-Year Capital Needs can be found online at: www.wmata.com/initiatives/capital-improvement-program/

CAPITAL INVESTMENT STRATEGY

Metro's Value to the Region and the Need for Capital Investment

Metro is the public transportation backbone of the National Capital Region, connecting residents and visitors across the area to jobs, housing, food, education, healthcare, essential services, opportunities, and entertainment. The system supports the sustainability, livability, and the economy of the region, protects the environment and helps advance racial and social equity in our community. Metro also plays a critical role in supporting the federal government.

The Metro system is the result of substantial regional and federal infrastructure investment. Continued capital reinvestment is vital to providing safe and efficient service to customers who depend on Metro. Through the CIP, Metro advances capital projects and programs to restore and sustain the system.

Metro has an adopted strategic plan, #YourMetro, The Way Forward, that guides Metro and the CIP. It defines the organization's top priorities, including commitment to

customers, safety, service reliability and financial responsibility.

Capital Strategy

Metro's Capital Strategy is to:

- Invest in efforts to improve cost efficiency of operations
- Address state of good repair needs
- Invest in the system to provide safe, efficient, and reliable service for customers, employees, and the region
- Sustain safety and reliability through recurring maintenance, rehabilitation, and replacement programs

Metro's capital program focuses on providing safe and reliable service while maintaining the system in a state of good repair. After decades of deferred maintenance and underinvestment, Metro accumulated a significant backlog of overdue safety and state of good repair needs. Capital investments implemented over the last several years such as track rehabilitation, replacement of legacy vehicles and equipment, and the Platform Improvement Program have successfully reduced the backlog, improved performance and reliability, and have started to address the impact of years of underinvestment. Metro is seeing a significant improvement in performance, including sustained escalator availability rates, a continued steady decrease in smoke and fire events in the rail system and 17 percent growth in railcar reliability rates, compared to FY2023. Improvements to the performance and reliability of assets has a direct impact on the quality of Metro's service. Metro is seeing the highest levels of customer satisfaction in several years and 21 percent ridership growth in FY2024 compared to FY2023.

Pictured: Newly repaired escalator

Capital Investment Priorities

Metro's strategy in this constrained resource environment is to:

- Advance investments to reduce long-term operational costs
- Address near-term essential state of good repair needs
- Continue ongoing contract commitments (projects that are underway)
- Identify cost savings within underway capital investments
- Move forward with targeted investments to improve reliability and maintenance activities

Metro's typical planning cycle includes:

- Identification and submission of new investment needs for funding
- Annual evaluation of capital needs against organizational constraints impacting ability to execute (i.e., maturity of project development, track access requirements, and other operational constraints)
- Alignment of investments with strategic organizational goals and restriction of six-year capital program to available funding envelope

The FY2026 – FY2031 CIP continues to face budget constraints over the next six years, delaying the initiation of investments and placing recent progress of reducing the state of good repair backlog in jeopardy. This includes new investments necessary for maintaining a state of good repair. Consequently, Metro is forced to shift from a proactive asset replacement program to a reactive maintenance strategy. This six-year program postpones ~\$5 billion worth of state of good repair investments. To support the move to a primarily reactive state of good repair program, new allocations have been set aside for reactionary investments into Infrastructure, Facilities, Equipment, and Rolling Stock based on priority and the value of deferred state of good repair in those asset categories.

In response to limited funding capacity, Metro is acting now to reduce capital program costs and administrative-related functions to reallocate future funding to advance additional state of good repair work for critical assets. Since February 2024, approximately \$170 million in program and project management cost savings have been identified and redirected back into the capital program. In parallel, efforts to deliver projects more efficiently through reviewing standards and improving efficiency have started and since February 2024, over \$100 million has been identified. These cost savings, which have not impacted the outcomes to be achieved by these capital investments, have been redirected to advance capital investments.

Supporting Metro's Goals

Metro's Strategic Transformation Plan (STP), #YourMetro, The Way Forward [[click here](#)], provides a long-term strategy and directs Metro's day-to-day decision making over the next five-plus years. The plan established four goals:

- *Service Excellence:* Deliver safe, reliable, convenient, accessible, equitable, and enjoyable services for all customers
- *Talented Teams:* Attract, develop, and retain top talent where individuals feel valued, supported, and proud of their contributions
- *Regional Opportunity & Partnership:* Design transit service to serve more people and equitably connect a growing region
- *Sustainability:* Manage resources responsibly to achieve a sustainable operating, capital, and environmental model

Service Excellence

Metro customers rely on aging infrastructure and equipment that requires constant attention to remain in good working order and prevent major disruptions. Failures of any of these assets can jeopardize customer safety or reduce the system's reliability. Metro's CIP includes investments that support delivering safe, reliable, convenient, accessible, equitable, and enjoyable services for all customers, including investing in:

- Robust camera and monitoring systems to quickly identify and respond to incidents
- Escalator rehabilitations and replacements increase availability for customers and reduce the risk of slips, trips, and falls due to asset failures.
- Cybersecurity system upgrades to secure data, software, and applications
- Bus and rail vehicle overhauls and maintenance to reduce failures and extend the useful service life and enhanced customer comforts through upgraded amenities.
- Train control rooms and signaling systems to prevent service disruption and improve on-time performance, while exploring a new advanced signaling system
- Body-worn cameras for Metro's police force to improve officer safety, increase evidence quality, and reinforce accountability
- Traction power systems to improve rail service reliability contributing to on-time performance

Talented Teams

The Capital Program will contribute to progress in talented teams by investing in projects to support this initiative, including:

- Employee training facility investments to address Metro's challenges with preparing our staff to provide operational and maintenance services to support the system
- MetroSync, an advanced platform that will support more seamless and efficient business operations

Regional Opportunity and Partnership

The Capital Program will contribute to progress in regional opportunity and partnership by investing in the following activities:

- Bus shelters and bus customer information
- Planning support for the District of Columbia, Maryland, and Virginia to explore potential future projects.
- Supporting design and construction efforts to integrate the Purple Line with the Metrorail system

Sustainability

Notable investments will help reduce Metro's energy cost profile, reducing expenses and helping Metro become more cost effective. Metro plays a significant role in promoting a cleaner environment by reducing car usage and mitigating CO₂ emissions. The following initiatives contribute to progress in improving infrastructure efficiency:

- Continuing the initial phase to transition the bus fleet to zero-emission vehicles
- Northern and Bladensburg bus garage replacements with capabilities to support electric fleets
- Cinder Bed bus garage conversion to support electric fleets

State of Good Repair Investments

Significant progress has been made since FY2016 to address state of good repair needs. Metro reduced the state of good repair backlog from \$7 billion to \$4 billion, increasing customer satisfaction and ridership. Even with this notable effort, Metro has more work to do to continue that progress

Metro's largest state of good repair needs in backlog include the signaling system and passenger facility systems. Metro's signaling system operates with equipment that is past its useful life. The capital strategy for the signaling system is to continue to fund near-term

investments to bridge this critical system until funding can be acquired for replacement with a new advanced signaling system. The six-year program includes funding for planning and development to advance this investment.

Passenger facility needs continue to grow as many long-life assets begin to exceed their useful life; including station power equipment, public address systems, and structural components routinely exposed to water. By the end of FY2031, Metro will have made progress in both signaling systems and passenger facility investments, but significant needs will remain in both asset categories. Additionally, Metro is predicting the facilities, equipment, and traction power asset categories, will require significant investment by FY2031 without capital resources to address them.

At the beginning of FY2026, the total estimated capital state of good repair need will reach \$5 billion, and the state of good repair backlog is estimated at \$4.2 billion. At the end of FY2031, the state of good repair backlog is estimated to hold steady at \$4 billion. A demonstration of the continued commitment to use available capital resources to reinvest in the system.

However, funding for reinvestment into the Metro system is declining and the state of good repair backlog is predicted to begin to significantly increase starting after FY2031. Metro's 2024 State of Good Repair Needs Outlook has identified a minimum 10-year need of \$15 billion for direct state of good repair reinvestments to rehabilitate and replace aging assets and address past due capital needs.

The FY2026 – FY2031 capital program is recommending deferral of ~ \$5 billion of direct and indirect state of good repair investments into the future. Although different assets will regress on different timelines, this budget recommendation is forcing Metro to a reactive asset replacement strategy where assets will be rehabilitated or replaced as performance or near-term inspection data begin to indicate near-term failure. This strategy will lead to decreases in reliability and increases in incidents. The backlog is not predicted to grow between FY2026 and FY2031. More details are provided in the State of Good Repair Needs Outlook contained in Metro's 10-Year Capital Plan.

Safety Investments

Metro's commitment to the region is to run safe and reliable service for customers and employees. To support this commitment, a federally compliant Safety Management System (SMS) and Agency Safety Plan (ASP) have been established and are updated regularly. As priority risks are identified, they are quickly mitigated to ensure the continued safety of customers and employees. These types of safety risks are addressed

through changes to budgets (operating or capital) when necessary. Once the immediate safety hazard is mitigated, a long-term mitigation may require capital investment. These mitigations are identified and included for inclusion in the Capital Program based on assigned priority as established through the ASP.

In addition, the Capital Program includes long-term investments to reduce the likelihood or prevent failures of assets and equipment that could potentially create a future safety risk. As articulated in the Strategic Transformation Plan and Metro's agency safety plan, there are key performance metrics to monitor Metro's safety progress. Capital investments that impact these metrics are identified through the capital planning process. Safety and security are key objectives of the Service Excellence goal, and the capital project pages identify which initiatives meet this goal.

Financial Stewardship

Metro is committed to responsible stewardship of federal, state and local capital investments that have enabled the progress made over the past six years. Following through on that commitment, Metro continues to improve its development of:

- A structured process for capital planning, prioritization, and decision-making
- The capital program website and frequent progress updates
- Detailed and timely capital program financial reporting for funding partners
- Reduced capital program costs and administrative-related functions
- Identify more cost-effective procurement and contracting strategies

Capital Program Performance

Metro has developed and implemented a program to measure the performance outcomes of its capital investments and the overall capital program. The primary overall measure used by Metro to evaluate the success of its capital program is the reduction of the state of good repair backlog. In addition, capital investments are assessed on how they support Metro's strategic goals. To achieve this, Metro assesses how capital investments benefit customers, employees, stakeholders, and the region. This initiative enhances transparency in the investment process and promotes the efficient use of resources.

The Capital Investment Performance Outcome Measures Program measures investment-specific outcomes, identifying and assessing the benefits and impacts of

capital investments, and demonstrating their alignment with Metro's Strategic Transformation Plan, #YourMetro, The Way Forward. Data and results will be used to inform future capital investment decisions and support overall operational efficiency and effectiveness.

More details about Metro's Capital Investment Performance Outcome Measures Program are included in Metro's 10-Year Capital Plan.

CAPITAL PROGRAM HIGHLIGHTS

Capital Improvement Program Highlights

Metro's \$2.1 billion FY2026 capital investments and \$10.5 billion FY2026-2031 Capital Improvement Program (CIP) focus capital investments on service reliability, safety, security, and state of good repair of MetroAccess, Metrobus, and Metrorail, and systems that support the transit network. Metro is advancing investments that support efforts to improve efficiency of operations and reduce costs. Highlights of priority CIP investments to restore, modernize, and sustain the system include:

Metrorail

- Rehabilitation of Bridges & Aerial Structures
- Rehabilitation of Train Control Equipment & Planning for an Advanced Signaling System
- Rehabilitation & Upgrade of Rail Power Systems
- Railcar Fleet Management Facility
- Replacement & Upgrade of Communications Systems – Including Radio Infrastructure & Equipment
- Track Rehabilitation & Maintenance
- Ventilation Improvements – Red Line Pilot
- Initial 8000-Series Railcar Acquisition
- Railcar Rehabilitation & Maintenance
- Replacement & Rehabilitation of Elevators & Escalators
- Deployment of Open Fare Payment & Replacement of fare vending machines

Metrobus

- Bus Vehicle Replacement and Rehabilitation
- Replacement of Bus Divisions at Northern & Bladensburg and investments to enable them to support electric fleets
- Upgrades to the Cinder Bed Bus Division to support electric fleets

- Bus Customer Facility Improvements – Bus Shelters and Customer Information Displays
- Roadway and Signal Improvements for Bus Priority (with jurisdictions)

MetroAccess

- Lifecycle Replacement of Paratransit Vehicles
- Paratransit Technology Scheduling System Replacement

Operations and Business Support

Priority investments to restore, modernize and sustain support functions include:

- Information Technology Hardware & Software Replacement, System Preservation
- Asset Management Software Replacement
- New Business system, MetroSync, to replace current enterprise resource planning system
- Replacement of legacy systems with modern technology to accelerate efficient service delivery

Metro's CIP is grouped into six major investment categories: Railcars and Railcar Facilities; Rail Systems; Track & Structures; Stations & Passenger Facilities; Bus, Bus Facilities & Paratransit; and Business & Operations Support. Detailed CIP project and program information is available in Appendix D.

FINANCIAL PLAN BY INVESTMENT CATEGORY

<i>(Dollars in Millions)</i>	FY2026 Budget	FY2027 Plan	FY2028 Plan	FY2029 Plan	FY2030 Plan	FY2031 Plan	6-Year Total
Railcar & Railcar Facilities	\$434.2	\$524.8	\$447.3	\$449.6	\$400.5	\$373.1	\$2,629.5

CAPITAL PROGRAM DEVELOPMENT

Capital Planning and Program Development

Metro's capital program includes the 10-year Capital Plan, Six-Year Capital Improvement Program (CIP), annual Capital Budget, Capital Investment Performance Outcome Measures Program, and State of Good Repair Needs Outlook that will be updated at select intervals. Collectively, these form the framework for the development, evaluation, strategic alignment and delivery of capital investments with a focus on improved operational efficiency and cost effectiveness.

To ensure capital needs are addressed, and that capital funding is invested wisely, Metro has established and improved a structured and centralized approach to identify, develop, evaluate, align, select, and approve capital investments to advance through the capital program. Metro is also analyzing and implementing best practices and approaches to deliver these investments more cost efficiently.

Metro's capital program process begins each year with a review of state of good repair needs, updates to current and ongoing projects and programs, as well as known potential investments still in development. Management then utilizes best available information and works with internal operations, maintenance, and business support leads as well as oversight entities and the jurisdictions to identify potential investment needs that might have emerged.

For significant new and emerging needs, Metro applies a structured approach to develop and evaluate potential major capital investments.

This approach includes:

- An objective assessment of the need
- An evaluation of alternatives and development of business cases to assess financial impacts and customer and public benefits of a potential investment
- Development of project implementation plans and charters to select a delivery strategy; establish project scopes, schedules, and budgets
- Utilization of performance outcome evaluations to identify and address best practices and areas for improvement
- Alignment of potential capital investments to measurable strategic goals and objectives, expected outcomes, benefits, and impacts.

- Develop the most cost-effective approach to implement capital investments that deliver the goals of Metro and serve customers

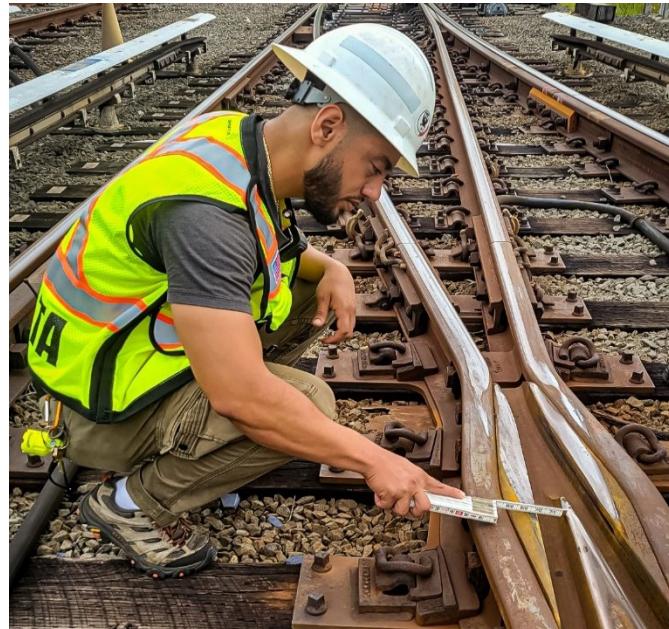

Annual Capital Expenditure Budget

In accordance with Article VIII, paragraph 26 of Metro's Compact, the Board adopts an annual Capital Budget. This budget identifies capital investments by category that are expected to expend during the budget period. The budget also includes the anticipated funding sources for the upcoming year.

Metro's capital program and annual budget are managed on an expenditure basis – program and project costs, including costs for programs and projects that will occur over multiple fiscal years, are budgeted and planned in the fiscal year that they are forecasted to be expended. Metro's fiscal year begins on July 1 and ends on June 30.

Metro's CIP and Capital Budget include estimated costs for capital expenditures to procure or construct fixed assets, or to improve and extend the useful life of an existing fixed asset. The CIP and Capital Budget also include estimated costs for planning, program management, and preventive maintenance costs.

The Metro Board of Directors has delegated authority to the General Manager (GM)/CEO to move capital budget and funding between programs, projects, and investment categories to adjust for changed schedules and to address emergency or unanticipated needs.

Pictured: Track maintenance worker checking Metrorail track

Annual Schedule

Metro's 10-year Capital Plan, Six-Year CIP, and Capital Budget are formally updated through the annual budget

process. The process begins each summer/fall with the development of a preliminary proposal for Metro's Senior Executive Team's consideration. The GM/CEO then submits the proposed CIP to the Board of Directors in the fall/winter of each year.

The Board authorizes public hearings on the budget and Metro initiates a public input process. The Board considers the GM/CEO's proposal and typically adopts the six-year CIP and Capital Budget in March or April each year. Adoption of the Capital Budget by March allows Metro to start the process to apply for Federal Transit Administration (FTA) grants before the beginning of the fiscal year.

CAPITAL PROGRAM FUNDING SOURCES

Metro's CIP is primarily funded by contributions from the region and federal grant programs. Current regional and federal funding sources are for restoring and sustaining safety, security, reliability, and state of good repair. The value of Metro's capital funding has eroded over time and Metro is approaching the end of its debt issuance capacity to support the capital program, limiting available resources for the capital program. The table on the following page details the proposed FY2026 funding plan and six-year funding outlook.

Federal Grant Programs

Metro receives federal formula grant funding from the Federal Transit Administration (FTA) through 49 U.S.C. 5307 Urbanized Area Formula grants, 49 U.S.C. 5337 State of Good Repair grants, and 49 U.S.C. 5339 Bus and Bus Facilities grants. Metro also competes for federal discretionary grant programs for specific investments. Metro expects to receive about \$625 million in FTA grants for FY2026 and the six-year program assumes continued FTA funding, adjusted for inflation.

Passenger Rail Investment and Improvement Act (PRIIA) Funding

PRIIA provides annual funding in federal grants for Metro's CIP, which is matched with funding from Maryland, the District of Columbia, and Virginia for Metro's safety and state of good repair capital program. These grants are subject to a one percent holdback for FTA administration and oversight.

The proposed FY2026 Capital Budget assumes \$144 million of federal PRIIA funding matched by funding from the region. The six-year program assumes federal PRIIA funding through FY2031, as PRIIA has been reauthorized through that period. Metro's capacity to support state of good repair programs is dependent on continued Federal and State support of this program.

Dedicated Capital Funding

In 2018, Virginia, Maryland, and the District of Columbia approved a combined \$500 million per year in new dedicated capital funding to restore the system to a state of good repair and improve safety and reliability. Dedicated funding is limited to capital projects.

Metro is leveraging dedicated funding in the capital markets, issuing bonds to fund the capital program. The proposed FY2026 budget assumes approximately \$772 million of dedicated funding-backed debt. Over the next few years, as Metro issues debt to address overdue and ongoing capital needs, a growing share of the annual \$500 million of dedicated funding will be committed to debt service, reducing funding capacity for future capital needs, and driving a need for new capital funding sources. Metro anticipates reaching the debt limit in FY2029, impacting the ability to issue new debt and further restricting Metro's capital program and hindering the progress made to reduce the state of good repair backlog.

Jurisdictional Contributions

Maryland, the District of Columbia, and the local governments in Northern Virginia provide annual capital funding in the form of "allocated contributions." These contributions provide the required local match to federal formula, competitive and other grants and system performance funding. Allocated contributions are governed by the Capital Funding Agreement (CFA) for FY2022 to FY2027. Proposed FY2026 allocated contributions total \$961 million. The six-year program assumes a total of \$5.91 billion.

Jurisdiction Sponsored Projects

Metro also advances projects sponsored and funded by jurisdictions. These "reimbursable projects" are typically improvements to the system. One example is the second entrance to the Crystal City Metrorail Station that is under construction, sponsored and funded by Arlington County.

FINANCIAL PLAN - ALLOCATION OF STATE AND LOCAL CONTRIBUTIONS

(Dollars in Millions)		FY2026 Budget	FY2027 Plan	FY2028 Plan	FY2029 Plan	FY2030 Plan	FY2031 Plan	6-Year Total

Appendix A – Metro Profile

Pictured: Historic photo of former Metro General Manager Richard S. Page (1979-1983) riding brand new 2000-series Metrorail train

Metro Introduction

The Washington Metropolitan Area Transit Authority (WMATA) was created in 1967 through an interstate compact among Washington, D.C., Maryland, and Virginia. Construction of the Metrorail system began in 1969 and the first phase of Metrorail operation began in 1976.

Metro added a second transit service to its network in 1973 when, under direction from the United States Congress, it acquired four Washington-area bus systems and merged them to create Metrobus.

In 1994, as mandated by the Americans with Disabilities Act (ADA), Metro began providing MetroAccess paratransit service for people with disabilities who are unable to use the fixed route transit service.

Metro completed the originally planned 103-mile Metrorail system in 2001.

In 2004, Metro expanded the rail system, opening the Blue Line extension to Largo Town Center station (now Downtown Largo), as well as the NoMa-Gallaudet U station on the Red Line. These expansions increased the Metrorail system to 86 stations and 106 miles.

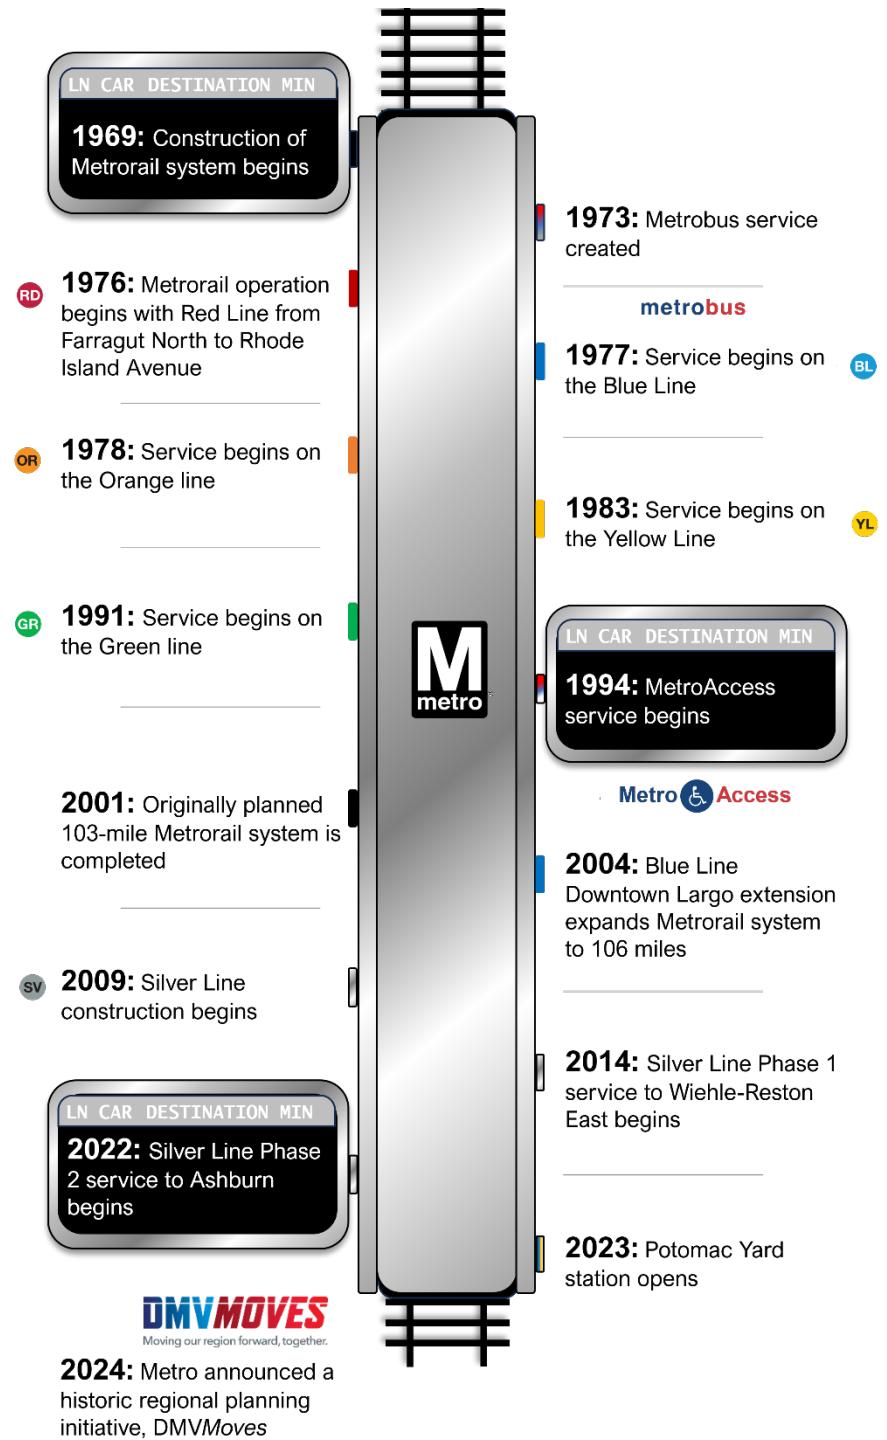

In March 2009, Metropolitan Washington Airports Authority (MWAA) started construction on the Silver Line, a 23-mile rail extension in Fairfax and Loudoun Counties in Virginia. Supported by a Full-Funding Grant Agreement from the Federal Transit Administration (FTA) plus toll and other revenues from funding partners, Phase 1 opened in 2014 with 11.6 miles and five new stations, extending service to Tysons Corner and Reston. Phase 2 opened on November 15, 2022, with an additional 11.4 miles and six new stations, providing service to Dulles International Airport and Loudoun County.

In addition, Metro opened the new Potomac Yard infill station on the Blue and Yellow lines in Alexandria, Virginia in 2023.

Key Metro Facts

- Metro's service area size is approximately 1,500 square miles with a population of over four million
- Metro's transit zone consists of Washington D.C., the Maryland counties of Prince George's and Montgomery, and the Northern Virginia counties of Arlington, Fairfax and Loudoun, and the cities of Alexandria, Fairfax and Falls Church
- Metrorail currently comprises approximately 128 miles of track, six rail lines, 98 stations and 1,204 railcars in the active fleet
- Metrobus serves over 9,000 bus stops throughout the region with over 1,500 buses
- Metro is the second busiest heavy rail transit system and the sixth largest bus network in the country.¹
- More than a quarter of the region's property tax base is located within a half mile of a Metrorail station
- More than half of the region's jobs are located within a half mile of a Metro station or a Metrobus stop
- More than half of Metrorail stations serve federal facilities and approximately one-third of Metrorail's peak period commuters are federal employees
- Metro moves more than three times the amount of people each year as the region's three major airports combined

In preparation for the opening of revenue service on Silver Line Phase 2, Metro welcomed Loudoun County as a contributing jurisdiction in FY2021. The Silver Line is Metro's largest rail expansion project since the opening of the Ronald Reagan Washington National Airport to Stadium-Armory segment in 1977.

Oversight

A variety of internal and external offices, committees, and administrations provide oversight of Metro. These oversight entities include, but are not limited to, the Federal Transit Administration (FTA), the Washington Metrorail Safety Commission (WMSC), the Office of Inspector General, the Office of Quality Assurance, Internal Compliance & Oversight, the Office of Audit & Compliance, and various advisory entities.

Federal Transit Administration

The FTA is the agency of the United States Department of Transportation that provides financial and technical assistance to local public transit systems. The FTA also establishes safety measures and helps develop next-generation technology research.

The Federal Government, through the FTA, provides financial assistance to develop new transit systems and improve, maintain, and operate existing systems. In addition, the FTA provides and monitors grants to state and local transit providers.

Washington Metrorail Safety Commission

The WMSC serves as Metro's State Safety Oversight Agency (SSOA) and enforces transit safety requirements for Metro's Metrorail system. The Moving Ahead for Progress in the 21st Century Act (MAP-21) established the requirement for the creation of an SSOA.

In 2017, Washington D.C., Maryland and Virginia passed legislation to create the WMSC. Following Congressional consent and approval by the President through Public Law No: 115-54, the WMSC began directly overseeing the safety of the Metrorail system on March 18, 2019, upon its oversight program receiving federal certification.

Office of the Inspector General

Authorized by Metro's Board of Directors in April 2006, the Office of the Inspector General serves as an independent office reporting directly to the Board. The Office of the Inspector General supervises and conducts independent audits, investigations and reviews of Metro programs and operations to promote efficiency and financial integrity. This office also provides oversight to prevent and detect fraud, waste and abuse in such programs and operations.

Office of Quality Assurance, Internal Compliance & Oversight

The Office of Quality Assurance, Internal Compliance & Oversight provides independent reviews of Metro's operational and engineering processes and assets to promote compliance with internal and external regulatory requirements and advance quality improvement initiatives.

Office of Audit & Compliance

The Office of Audit & Compliance is Metro's internal audit function. It provides independent and objective audits, reviews and assessments of Metro's system of internal controls and related business processes designed to add value and improve Metro's operations.

Advisors

Metro has four primary advisory groups: the Riders' Advisory Council (RAC), the Accessibility Advisory Committee (AAC), the Amplify Community and the Joint Coordinating Committee (JCC). These advisory entities focus on specific issues as described in the following sections.

Riders' Advisory Council

In September 2005, the Metro Board of Directors established RAC. The Council provides Metro customers a forum to provide input on Metrobus, Metrorail and paratransit services. The 11-member council includes six representatives from Washington D.C., Maryland and Virginia, four at-large members, and the chair of Metro's AAC.

Accessibility Advisory Committee

Metro's AAC was created to address the needs of senior citizens and customers with disabilities. Its efforts have resulted in numerous service upgrades including gap reducers, which make it easier for customers who use wheelchairs or for visually impaired riders to board Metrorail trains.

Amplify by Metro

Metro is leveraging a new web-based platform called Amplify to engage and solicit input from riders in the community. As Metro's first ever customer community, Amplify brings together riders, transit advocates, and transit experts in an on-going digital forum. Through a structured environment of online surveys, polls, and discussion forums, Amplify community members share their experiences as riders and influence how Metro

responds to issues affecting those who use the system. People who live in the national capital region and ride any bus, train, or on paratransit at least once a month may sign up to participate at amplifybymetro.com.

Joint Coordinating Committee

The JCC consists of staff members from the jurisdictions supporting Metro. The JCC was established by the Metro Board of Directors to facilitate the exchange of information between jurisdictions and Metro staff. Meeting agendas are developed by Metro staff and the JCC chair and include items referred by the Board or Metro staff, as well as items requested by JCC members.

Regional Transit Planning

According to 2020 U.S. Census data², the greater Washington D.C. Metropolitan Area is home to more than six million people, two million households, and three million jobs. As the primary transit provider in the region, Metro is integral to the regional transportation planning process. The WMATA Compact allows the Authority to adopt a Mass Transit Plan as part of the region's continuous, comprehensive transportation planning process. Metro's regional planning function encompasses preparing transit system plans in partnership with other regional transit providers, conducting system planning analysis and transportation studies, communicating transit needs to regional planning bodies, and participating in planning processes at the regional and sub-regional levels. Metro has a special responsibility to ensure that the needs of the region's transit providers, both capital and operating, are reflected during the establishment of the Mass Transit Plan and that the region achieves a balanced transportation system.

Metro coordinates with its regional partners to determine transit-based priorities and projects. The WMATA Board of Directors, composed of members from the Compact jurisdictions and federal government, helps determine those priorities and provides policy direction. The JCC brings together jurisdictional staff to coordinate various budget and operational issues with Board Committee meetings. Internal planning and programming are designed to work within this institutional framework.

The National Capital Region Transportation Planning Board (TPB) is the federally designated Metropolitan Planning Organization (MPO) to coordinate transportation planning and funding for the Washington region. The TPB serves as a forum for the region to develop transportation plans, policies and actions, as well as to set regional

transportation priorities through the Constrained Long-Range Plan (CLRP) and the six-year Transportation Improvement Plan (TIP). The TPB also provides technical resources for planning and policymaking. As an implementing agency in the TPB planning process and a TPB voting member, Metro remains an active member of the TPB Technical Committee and several subcommittees such as Travel Forecasting, Bicycle and Pedestrian, Regional Bus, Regional Transportation Demand Management Marketing, and Human Services Subcommittee.

The Northern Virginia Transportation Commission (NVTC) administers transit finance and operations in Northern Virginia and coordinates transit service across jurisdictional boundaries. The Northern Virginia Transportation Authority (NVTA) is responsible for developing a Northern Virginia Regional Transportation Plan which provides long-range planning and inter-agency coordination in Northern Virginia. Metro collaborates with NVTC and NVTA on essential transit funding and corridor development initiatives, aiming to enhance public transit service and integrate transit solutions into highway investments and the Department of Transportation (DOT) projects. Metro also collaborates with its local jurisdictions in Washington D.C., Maryland, and Virginia on critical local plans and project development initiatives to integrate service and planning opportunities.

In May 2024, the Metropolitan Washington Council of Governments (COG) and Metro launched DMVMoves, a joint initiative to create a unified vision and sustainable funding model for the region's transit network. The Task Force is being advised by two groups – a Government Partners Advisory Group representing area jurisdictions and transit service providers as well as a Community Partners Advisory Group representing business, labor, and community organizations.

Demographics

Within the greater Washington D.C. Metropolitan area is Metro's Compact area comprised of five counties (Montgomery and Prince George's in Maryland, Fairfax, Arlington and Loudoun in Virginia), three cities (Alexandria, Falls Church, and Fairfax in Virginia), and one federal district. According to the American Community Survey (ACS)³, the population of the Metro Compact jurisdictions is 4.7 million people with a demographic profile of:

- 38.8 percent of the population is non-Hispanic white

² US Census Data. 2020: ACS 5-Year Estimates Data Profile.
Retrieved from: <https://data.census.gov>

³ US Census Data. 2021: ACS 5-Year Estimates Data Profile.
Retrieved from <https://data.census.gov>

- 26.9 percent is Black or African American
- 17.0 percent is Hispanic or Latino
- 12.4 percent is Asian
- 4.7 percent is Mixed-Other

The median income of households residing in these jurisdictions is approximately \$124,429, with a mean income of \$163,480. Of the 1.8 million households living in the jurisdictions served by Metro, 58.5 percent reside in single family homes, 41.1 percent in apartments or multi-unit structures, and 0.3 percent in mobile homes and other housing forms. Over 40 percent of households in the Metro Compact area reside in multi-unit structures, exceeding both the national average and offering density supportive of mass transit opportunities. Further, this same ACS data reports that of the 2.5 million workers in the Compact area, 11 percent commute to work using public transportation (excluding taxicabs) and 12.4 percent of workers do not have access to a vehicle.

Economy

Metro's ridership and overall financial outlook are directly influenced by the population, economic conditions, and employment growth in the greater Washington D.C. Metropolitan area. Covid-19 had broad and significant global, national and regional impacts; the lasting consequences in terms of changes to work and commuting patterns remain unclear.

Job Growth in Metropolitan Washington

Econometric modeling published in May 2023 by the Metropolitan Washington Council of Governments (COG)⁴ predicts that by 2050 the Metropolitan Washington area will add one million jobs (31 percent) over its base year of 2020. The model also projects similar increases in population and households, rising 25 percent and 32 percent respectively by 2050.

Over Metro's previous fiscal year, the greater Washington D.C. Metropolitan area experienced improvements in key economic indicators, including employment and pricing data, with unemployment rates returning to pre-pandemic

levels. According to data from the Bureau of Labor Statistics (BLS) Current Employment Statistics (CES), the unemployment rate for the Metropolitan Washington area was 3.1 percent in October 2024, remaining below the national average of 3.9 percent⁵. While inflation remains an ongoing economic concern, the year-over-year inflation rate for this area as measured by the Consumer Price Index for All Urban Wage Earners and Clerical Workers (CPI-W) has fallen from 7.9 percent in October 2022 to 2.4 percent in October 2024⁶.

Changing Federal Presence

Transporting the federal workforce has always been one of Metro's core tasks. From the earliest days of planning the system, regional leaders designed stations to serve key government facilities (such as the Capitol and the Pentagon), enabling federal employees to efficiently commute to work. With Metro's growth, the federal government prioritized new office locations next to Metro stations. While the federal government remains a dominant employer in the region, the greater Washington D.C. Metropolitan area is experiencing changes in its industry composition of jobs and job growth. Historically growth in the federal sector has served as a catalyst for overall regional job growth. Between 2000 and 2010 the number of federal workers in the Washington D.C. Metropolitan area grew by 19.3 percent⁷. However, in recent years the structure of the regional economy has started to change. The number of federal workers has fallen or remained stagnant since 2010, with an overall 4.5 percent decrease in the number of federal workers from its height in July 2010. Historically, between 11 and 13 percent of employment in metropolitan Washington has been federal; however, a recent COG⁸ model predicts the portion of federal employment will decline from 12 percent of employment in 2015 to eight percent in 2045. Further, while the model forecasts a 31 percent growth rate for overall employment between 2020 and 2050, the COG model predicts only three percent growth in the federal government sector over the same period, indicating a more diverse composition of jobs for the region.

⁸ Metropolitan Washington Council of Governments. June 2022. Round 9.2 Growth Trends. Washington DC.

The Rise of Remote Work

Business activity and workforce trends continue to evolve yet have settled into a new normal significantly different than a decade ago. This paradigm shift in how and where people work, specifically in the shift to remote work, has significantly impacted the labor market, commuter and tourist activities, the demand for office space, and the location of economic activity in the region. The greater Washington D.C. Metropolitan region has a highly skilled and educated workforce including many occupations that have transitioned exceptionally well to remote work, thus resulting in changes to Metro ridership patterns.

The impact to public transit ridership and revenue is not isolated to the Washington D.C. Metropolitan region. Transit systems nationwide are facing drastic changes to work and transit patterns. According to 2022 ridership data collected by American Public Transportation Association (APTA), transit agencies across the US and Canada have observed similar decreases in ridership across heavy rail and bus. Data from the Survey of Working Arrangements and Attitudes (SWAA)⁹ show the percentage of full workdays supplied from home has more than tripled since January 2019. Current discussions surround the extent to which workers will continue to work from home in the post-pandemic era. These trends impact the public transit industry not only through full remote working arrangements, but also hybrid working arrangement trends in which work is supplied partially from home and partially in a traditional office or client setting. Enhanced SWAA datasets now allow for separation between full remote working arrangements and hybrid working arrangements. As of September 2024, 43.2 percent of workers with remote-eligible jobs report hybrid working arrangements and another 22.9 percent report full remote working arrangements. As such, only 33.8 percent of workers with remote-eligible jobs report full onsite working arrangements. Additionally, time series data supplied by SWAA indicates employers are planning for workers to supply, on average, 2.35 days per week

from home post-pandemic. While the share of remote work has declined since the height of the pandemic, data suggests employers remain more accepting of hybrid work environments supporting the persistence of these fundamental changes in work and commuting patterns and the ongoing impact of these changes on commuting and ridership patterns.

Where is Metropolitan Washington's Economy Headed?

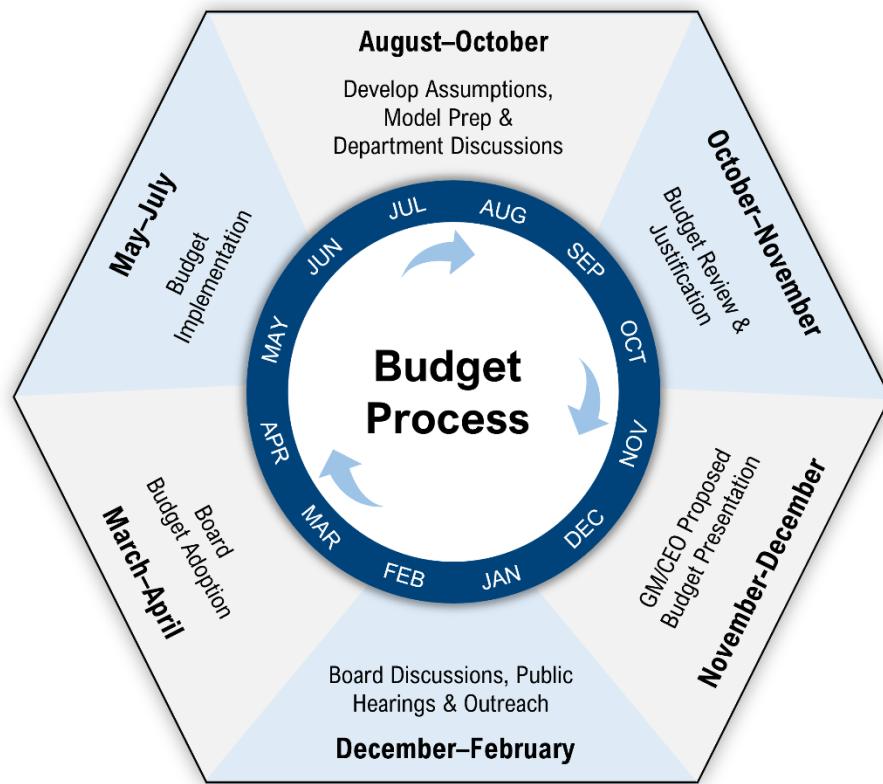

Economic factors such as slow federal job growth and the outlook for future federal government spending have long impacted Metro's forecast for Metrorail and Metrobus ridership. Significant efforts are currently underway to diversify the region's economy, partially in response to slower growth in federal jobs. The Roadmap for the Washington Region's Economic Future identified industrial clusters beyond the federal government with the potential to drive the region's economic growth over the next decade. Two of these drivers, professional and business services, have expanded the region's economy. Recent growth in the hospitality and service sectors has recently outpaced the national growth rate for that sector further supporting the region's job growth.

These consistent patterns of regular telework schedules may continue to impact the Metropolitan Washington economy in unintended ways. The trend of hybrid and full telework arrangements by employers suggests lower average office occupancy that is unlikely to change without further action from the federal government. These changes in work patterns and occupancy will continue to impact public transit ridership and revenue despite job growth recovery. While employment growth continues across key sectors, the composition and attributes of jobs in the region is changing. Metro will continue to advance service options that adapt to the emerging needs of workers and the regional economy.

⁹ Barrero, Jose Maria, Nicholas Bloom, and Steven J. Davis, 2021. "Why working from home will stick," National Bureau of

Economic Research Working Paper 28731.

Appendix B – Budget Process

Metro's annual budget serves as the foundation for its financial planning and control. The General Manager/Chief Executive Officer (GM/CEO), Chief Financial Officer, and staff prepare and submit the budget to the Metro Board of Directors for consideration and approval. The annual budget consists of two components: operating and capital. Each department is responsible for operating in such a manner to ensure the use of the funds is consistent with the goals and programs authorized by the Board and spending remains within approved levels. Metro's budget planning begins in August of the preceding fiscal year with the development of budget priorities and assumptions for the plan year. The budget must be adopted and implemented by June 30th for the fiscal year beginning on July 1st. The budget process consists of six major phases:

1. Development of key assumptions and drivers, model preparation, and budget formulation which includes department submissions
2. Budget review/justification
3. GM/CEO's submission of the proposed budget to the Board
4. Board discussions, public hearings and outreach
5. Budget adoption by the Board
6. Budget implementation

Budget Development and Departmental Submissions

Metro begins its annual budget development shortly following the adoption of the previous year's budget. The annual budget is significantly influenced by the current economic climate, funding sources and legislative action. Staff collect and analyze economic data, regional workforce trends, changes to funding and the legislative landscape to inform budget assumptions. Key factors influencing assumptions in the FY2026 Proposed Budget include:

- Strong regional employment and potential growth opportunities for the region
- Robust year-over-year ridership growth
- Persistent trends in hybrid and remote work
- Decrease in inflationary pressure relative to recent years
- New Collective Bargaining Agreements for Metro's represented workforce
- Conclusion of federal relief funding in FY2025
- Increases to jurisdictional subsidies contingent upon legislative action across multiple jurisdictions

For its FY2026 Proposed Budget, Metro used the FY2025 Budget with specific programmatic changes as the baseline for FY2026 budget development. As additional information became available during the budget development process, ridership and revenue assumptions and scenarios were refined. Staff also evaluated expense data from the FY2025 Approved Budget and the FY2024 actuals to establish cost baselines for personnel and other expenses. Position data from the current approved FY2025 Budget and benefits obligations established the baseline for personnel related costs. Next, staff modified pertinent assumptions, including contractually obligated union wages and benefits, fuel prices, service levels, and ridership and revenue projections to refine budgeted expenses, as required. Based on the analysis of the data, Metro assigned targets to each department.

Metro's Strategic Transformation Plan (STP), *Your Metro, The Way Forward*, adopted in February 2023, steers the development of both the Operating and Capital budget and the execution of Metro's mission. The STP defines Metro's priorities and connects the mission, vision, and goals with actionable initiatives to drive progress, enhance transparency, and build trust with customers, staff, and stakeholders.

In addition, the General Manager's Business Plan identifies Metro's priorities, provides the foundation for department-specific work plans, and keeps the agency focused on the long-term goals described in the STP. It outlines necessary actions to achieve priorities, provides measures to monitor success and offers the Board and public with a transparent and accountable framework. The resulting budgets and multi-year capital investment plans reflect these priorities.

The Office of Management and Budget staff develops guidelines and assumptions in line with the STP and General Manager's Business Plan that are incorporated into department budgets and systematically drive the budgeting process.

- The initial planning, development of assumptions, and preparation of instructions and training materials are conducted in August
- The annual budget kickoff meeting is held in September with department leaders and budget staff to develop new budget initiative requests

The annual budget is developed based on two budget methodologies – current services-level and zero-based. Staff use current services-level budgeting to develop the funding and resources necessary to sustain multi-year critical operations, special programs, and previously approved capital projects for the FY2026 budget.

Metro uses a hybrid zero-based budgeting strategy to develop additional sections of the FY2026 operating budget, specifically utilizing the zero-based approach to determine resources for anticipated changes to service levels and new programs.

Budget Review and Proposal

Metro develops its proposed Capital Improvement Program (CIP) concurrently with its proposed operating budget. Starting in July, operations, maintenance, engineering and other stakeholders submit capital investment need requests. In addition, Metro utilizes available asset condition data, fleet management plans, and other documents to identify capital investment needs. In the fall, Metro evaluates all identified needs, in concert with ongoing projects and programs, and strategically aligns these priorities to develop Metro's CIP. Funding constraints are then applied to the capital program and results are presented to the Senior Executive Team and GM/CEO for their review.

The Office of Management & Budget, the Office of Planning & Performance, and the Senior Executive Team review all operating and capital budget requests. The proposed budget recommendations are presented to the GM/CEO in the second quarter of the fiscal year.

Following review by the GM/CEO, the annual budget proposal and multi-year plans are presented to the Metro Board of Directors and the public.

Budget Discussion and Adoption

Metro is required to adopt an annual capital and operating budget for each fiscal year, prior to the conclusion of the preceding fiscal year.

- The proposed budget is presented and reviewed in the Finance and Capital Committee. The Board deliberates through early spring
- Metro engages in significant outreach efforts regarding the budget, particularly for any proposed service and fare changes, prior to adoption. The outreach occurs in three key areas:
 - Public hearings: During the budget process, Metro holds at least one public hearing to review any proposed service or fare changes, as well as the proposed use of federal funding in the CIP. To meet Virginia Dedicated Funding Legislation requirements, one hearing must be held in a jurisdiction supported by the Northern Virginia Transportation Commission. The comments and feedback received from residents throughout the region are presented to the Board for consideration
 - Public participation: Metro's Public Participation Plan guides substantial additional outreach efforts beyond the public hearings through open houses, station pop-ups, and community events. The outreach provides specific and convenient opportunities for riders and local organizations to provide input and discuss their views. It ensures full and fair participation for all potentially affected communities, including minority, low-income, and limited English proficient populations
 - Rider survey: Metro periodically conducts online surveys to solicit rider input on key questions regarding the budget
- Metro staff summarizes data collected from these efforts, as well as all public comments and feedback received during the outreach process in a staff report delivered to the Board for review
- Collectively, Metro's outreach efforts meet or exceed the requirements of both the WMATA Compact and the Federal Transit Administration's Title VI guidelines

Amendments

When necessary, amendments to the budget are presented to the Finance and Capital Committee. The committee then advances the amendments to the Board for review and adoption.

Budget Implementation

Metro begins budget implementation planning prior to the beginning of the new fiscal year and monitors budget compliance throughout the year to ensure transparency.

- The FY2026 Budget is effective July 1, 2025
- The Office of Management & Budget prepares monthly budget variance reports to monitor and control expenses and revenues
- Quarterly financial reports are prepared by the Office of Management & Budget and presented to the Board of Directors to monitor financial performance and ensure compliance with the approved budget

The underlying financial statements informing this budget process have been prepared in accordance with Generally Accepted Accounting Principles (GAAP) per the Governmental Accounting Standards Board (GASB) Statement No. 34 (Basic Financial Statements and Management's Discussion and Analysis - for State and Local Governments). All financial information is consolidated into business-type activities that comprise Metro's Enterprise Fund. These business-type activities include transit operating and capital costs, infrastructure construction and debt activities. The budget is based on the provisions of GAAP, as applicable to government entities in the United States. Annual budgets are adopted in accordance with GAAP with the following exceptions:

- Depreciation and amortization are excluded
- Net actuarial determined post-employment benefit obligation recognized under GASB Statement No. 45, which was implemented by Metro in FY2008, has been excluded from the budget expenses; such costs are included in operating expenses in the annual financial statements but are not budgeted

In accord with the Financial Standards and good business practices, the Office of Management & Budget monitors revenues and budget expenditures throughout the fiscal year.

Balanced Operating Budget

Each year Metro must propose and adopt an operating budget that balances predicted operating expenses for

the fiscal year with the expected operating revenues and subsidies for that year. The Board annually approves a current expense budget for the fiscal year in accordance with Article VIII of WMATA's Compact. Based on the Compact, this balanced budget includes the Board's estimated expenditures for administration, operation, maintenance and repairs, debt service requirements and payments into any required funds.

Total expenditures are balanced with estimated revenues and receipts from all sources, excluding funds included in the capital budget or otherwise earmarked for other purposes. Board Resolution 2020-09, adopting the FY2021 Budget, revised the Board's policy regarding budget surplus and shortfall to comply with Dedicated Funding legislation.

The operating budget focuses on the personnel, material/supplies and services necessary to operate Metrobus, Metrorail, and MetroAccess. Budgetary issues for the operating budget pertain to the cost of continuing operations, expanding services to meet demand, and improving the efficiency of service.

Capital Budget

In accordance with Article VIII, paragraph 26 of WMATA's Compact, the Board adopts an annual capital budget. This budget identifies capital investments by category that are expected to commence or continue during the budget period. The budget provides the planned funding sources for the program.

The primary focus of the capital budget is to ensure reliable, efficient, and safe service while maintaining the condition of Metro's current assets and infrastructure in a state of good repair. The capital budget supports the reliable, continuous and safe operation of each mode (Metrobus, Metrorail and MetroAccess).

Capital Expenditures

Capital expenditures are expenses leading to a future benefit beyond the current fiscal year. Expenditures are classified as capital when an entity spends money to procure or construct fixed assets or to maintain, improve or extend the useful life of an existing fixed asset.

The capital programming process assists Metro's leadership in decisions regarding the assets and infrastructure required to support and/or grow the bus, rail, and paratransit operations. Metro's assets and infrastructure include, but are not limited to: Paratransit and service vehicles; Buses and bus facilities; Railcars; Stations and tunnels; Track and wayside; Signal and power systems and Administration and maintenance facilities

Enterprise Fund

The Enterprise Fund is the sole fund for Metro. Within this Fund, income sources are classified in one of seven categories: passenger fares and parking fees, federal funds, state and local funds, dedicated funding, business revenues, other sources and debt. Passenger fares and parking fees support the operating budget. Beginning in FY2020, federal grants partially funded the operating budget to offset lost revenue and increased expenses from the Covid-19 pandemic. Metro will spend its remaining ARPA federal relief funding in FY2025. Other federal funds consist of federal grants to support the capital program. State and local funds support the capital program, as well as jurisdictional contributions for debt service and the operating budget subsidy. Legislation passed in 2018 by Washington D.C., Maryland, and Virginia established annual dedicated capital funding of \$500 million. Debt proceeds serviced by the annual dedicated funding further support the capital program. Business revenues include advertising and joint development, among other funding sources.

The following table projects the Enterprise Fund activity for FY2025 and FY2026. Chapter 1 provides additional information on funding sources and changes greater than 10 percent from FY2025.

<i>(\$ in millions)</i>	FY2025 Budget	FY2026 Budget
Unrestricted Beginning Balance	\$0	\$0
Operating Revenue	\$488	\$545
Jurisdictional Operating Subsidy ¹	\$1,753	\$1,924
State and Local Funding - Capital	\$951	\$960
Federal Funding	\$715	\$626
Prior Year Savings	-	\$28
Debt	\$1,035	\$844
Reimbursable Projects	\$48	\$56
Subtotal Projected Sources²	\$4,989	\$4,984
Operating Expense ³	\$2,350	\$2,512
CIP Investment	\$2,319	\$2,137
Revenue Loss	\$10	\$10
Debt Service ⁴	\$310	\$326
Subtotal Projected Uses	\$4,989	\$4,984
Unrestricted Ending Balance	\$0	\$0

1. Subsidy payments from jurisdictions per WMATA Compact

2. For additional details on funding sources, see Chapter 1

3. Includes operating expense of reimbursable projects

4. Debt Service includes current debt payments to service CIP budget

Appendix C – Human Capital Summary

Human capital management defines and categorizes employees' skills and abilities to ensure alignment with the objectives of the organization. At Metro, the management of human capital involves workforce planning and investment in support of Metro's strategic plan and core mission to operate and maintain a safe, reliable, and affordable transit system.

One measure of human capital is the number of positions to be employed and the various costs associated with such employment, referred to as personnel costs. Metro's personnel costs fall into three categories: labor, fringe benefits, and capital allocation. Capital allocation is a net zero-dollar adjustment between operating and capital.

Labor costs include regular wage and overtime pay for operations employees and salary expense for management, professional, and administrative personnel. For FY2026, the Authority-wide labor budget for operating

and capital is \$1,536.7 million, an increase of \$79.9 million from the previous year.

Fringe benefit costs are personnel-related expenses that are in addition to the direct cost of employee wages and salaries. Metro's fringe benefits are comprised of health insurance and pension plan costs, as well as government mandated expenses including unemployment insurance and payroll taxes. The Authority-wide FY2026 fringe benefit budget for operating and capital is \$703.4 million, which is a \$50.5 million or 7.7 percent increase from the prior year.

The following tables compare human capital staffing levels and personnel costs for the FY2025 Approved Budget and FY2026 Proposed Budget. The staffing projection for FY2026 is 13,646 positions, consisting of 11,447 operating positions and 2,199 capital positions. This staffing level represents an overall increase of 149 positions from the FY2025 Approved Budget.

HUMAN CAPITAL BY DEPARTMENT¹

	FY2025 Budget	FY2026 Budget	Change
Board Corporate Secretary	4	4	-
Office of Inspector General	48	48	-
General Manager & CEO¹	5	5	-
Your Metro Transformation Office¹	-	-	-
Safety & Readiness	591	591	-

CAPITAL IMPROVEMENT PROGRAM INVESTMENT PAGES

Metro's planned CIP investments are presented in this document in one-page CIP investment summaries..

How to Read CIP Investment Pages

- 1 Investment Title & Overview**
 - **Title** Each investment has a title and CIP number.
 -  Indicates shift from proactive investment to primarily reactive approach.
 - **Initiative Type** assigns the investment as either a **Project** – typically a major investment with a defined beginning and end or a **Program** – an ongoing, recurring, or cyclical investment.
 - **Category** assigns the investment category: Railcar & Railcar Facilities, Rail Systems, Track & Structure Rehabilitation; Stations & Passenger Facilities; Bus, Bus Facilities & Paratransit; or Business & Operations Support.
 - **Location** assigns the geographic location of the investment. Most investments are “Systemwide”. When a specific location is known, the jurisdiction is listed. Many location-specific investments also have region-wide benefits.
 - **Mode** assigns the service the investment supports: Bus, Rail, Paratransit, or Systemwide.
 - **Program** shows the grouping of the investment within the broader investment category.
 - **Federal Participation (all years)** indicates if the investment is or will be funded by federal grants.
- 2 Metro's Goals** highlight the STP goals that are measurable and most closely align with the expected outcome of the CIP investment, including Service Excellence, Talented Teams, Regional Opportunity and Partnership, and Sustainability. While multiple goals may apply,
- the primary strategic goal is highlighted with an orange circle.
- 3 Description** provides a basic summary of the scope of the investment.
- 4 Expected Performance Outcome** describes how the investment benefits Service Excellence, Talented Teams, Regional Opportunity & Partnership, and/or Sustainability. CIP pages include a primary strategic goal, objective, measure, and expected performance outcome and additional impacts for funded capital investments. Assessments of completed investments can be found in the Capital Investment Performance Outcome Measures section.
- 5 Near Term Deliverables** show anticipated activities over the next 12 to 24 months.
- 6 Anticipated Funding Source** indicates how Metro currently expects to fund an investment in FY2026. Anticipated funding sources are subject to change.
- 7 Schedule** is included on CIP Project pages including three project phases: Development and Evaluation, Implementation/Construction, and Operations Activation. Schedules show how projects are expected to progress over the next ten years. CIP **Programs** do not include schedules as they are ongoing.
- 8 Cost** displays the estimated cost of the investment. The estimated cost of **Programs** shows forecasted investment for the current year, upcoming six-year period, and 10-Year Plan. The estimated cost of **Projects** displays life-to-date costs and forecasted investment for the current year, upcoming six-year period, 10-Year Plan, and beyond. **Projects** also include an estimate of the total cost of the project, labeled “**Total Estimated Investment**.”

8000-Series Railcars (CIP0059)

1

Initiative Type: Project
Category: Railcar Investments
Location: Systemwide

Mode: Rail
Program: Acquisition
Federal Participation (all years): No

2

Metro's
Goals
• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

3

Description

This project involves the initial delivery of 360 new 8000-series railcars, out of a total of 800 available under all contract options, to replace the legacy fleet. Future unfunded 8000-series options (beyond Option 2) have been removed from the Beyond FY35 budget to better align with DMV Moves discussions.

4

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

↑ Improve Safety and Security

↑ Improve On-Time Performance

Additional Impacts:

↑ Improve Customer Satisfaction

↑ Promote Financial and Environmental
Stewardship

5

Near Term Deliverables

Cost (\$M)

8

Metro will continue final railcar design and Pilot Car Production of the 8000-series railcars. Approval is required to execute Option 1 by Summer 2026.

Bus Onboard Location Equipment and Software Program (CIP0002)

Initiative Type: Program

Category: Bus and Paratransit Investments

Location: Systemwide

Mode: Bus

Program: Maintenance/Overhaul

Federal Participation (all years): Yes

Metro's

Goals

• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This program supports the design and replacement of automatic vehicle location (AVL) and related equipment on buses. This equipment is vital to bus operations, bus location tracking via Global Positioning System (GPS), and generating reliable bus customer information.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

Additional Impacts:

↑ Improve Operational Efficiency

↑ Improve Employee Sentiment About Working for Metro

↑ Promote Financial Sustainability

Near Term Deliverables

Metro will continue replacement of equipment with new investments in software systems and onboard ancillary equipment.

Cost (\$M)

Bus Maintenance Facility and Equipment State of Good Repair Program (CIP0004)

Initiative Type: Program

Category: Bus and Paratransit Investments

Location: Systemwide

Mode: Bus

Program: Maintenance/Overhaul

Federal Participation (all years): Yes

Metro's
Goals
• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This program replaces existing equipment past their useful life and provides new equipment to support the repair and maintenance of the bus and non-revenue fleets. It also supports the implementation of minor bus garage improvements.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Safety & Security

Expected Outcome Measure: ↑ Improve Employee Safety

Additional Impacts: ↑ Improve Reliability

↑ Improve Employee Sentiment

↑ Improve Customer Satisfaction

↑ Promote Environmental Sustainability

Near Term Deliverables

Scheduled replacement of bus maintenance equipment including forklifts, toolbox kits, bus diagnostic equipment, and mechanic training equipment.

Cost (\$M)

Bus Vehicle Rehabilitation Program (CIP0005)

Initiative Type: Program

Category: Bus and Paratransit Investments

Location: Systemwide

Mode: Bus

Program: Maintenance/Overhaul

Federal Participation (all years): Yes

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program provides for the complete rehabilitation of bus mechanical, electrical, and structural systems when a bus is approximately 7.5 years of age. Additionally, the program supports the procurement of components to replace assets that can no longer be overhauled.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ➔ Maintain Mean Distance Between Failure (MDBF)

Additional Impacts: ↑ Improve Customer Satisfaction

Near Term Deliverables

Metro will perform an annual scheduled overhaul of approximately 100 buses, 120 engines, 150 transmission assemblies, and 33 energy storage systems. Various other components will be rebuilt to include axles, HVAC units, pro-heat units, and steering boxes. Work will be completed to retrofit 260 buses with new enclosures to ensure operator safety.

Bus Fleet Acquisition Program (CIP0006)

Initiative Type: Program

Category: Bus and Paratransit Investments

Location: Systemwide

Mode: Bus

Program: Acquisition

Federal Participation (all years): Yes

Metro's
Goals

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This program acquires and replaces standard 30-foot, 40-foot, and 60-foot articulated buses consistent with the Metrobus Fleet Management Plan. Metro continues to advance the purchase and deployment of electric buses. The program also includes bus maintenance training, and the purchase of spare parts.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ➔ Maintain Operational Capacity

Additional Impacts: Improve State of Good Repair Improve Mean Distance Between Failure
 Improve Customer Satisfaction Promote Environmental Sustainability

Near Term Deliverables

Metro will advance the scheduled acquisition of approximately 100 buses per year. In FY2026, Metro plans to acquire approximately 75 40-foot hybrid buses and approximately 25 40-foot zero-emission buses.

Cost (\$M)

Investments	(\$M)

Mode: Systemwide

Program: Support Equipment/Services

Federal Participation (all years): Yes

Metro's
Goals

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This program acquires service and maintenance support vehicles, primarily to replace vehicles that are past their useful life, including police vehicles. Metro will explore transitioning to zero-emission vehicles and plans to reduce the number of vehicles in the fleet.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

Additional Impacts: ↑ Improve Safety with Improved Response
Times ↑ Improve Operational Efficiency

↑ Improve Employee Sentiment About
Working for Metro

↑ Promote Environmental Sustainability

Near Term Deliverables

Metro will replace vehicles beyond their useful life, taking delivery of service vehicles, including safety, Metro Transit Police Department (MTPD), and maintenance vehicles.

Category: Business Support Investments

Location: Systemwide

Mode: Systemwide

Program: Support Equipment/Services

Federal Participation (all years): TBD

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program designs, upgrades, and replaces equipment and facilities to mitigate environmental impacts and maintain compliance with environmental regulations and directives from regulatory agencies.

Expected Performance Outcome

Primary Goal/Objective • Sustainability | Environmental Sustainability

Expected Outcome Measure: ↑ Improve Regional Environmental Impacts

Additional Impacts: ↑ Improve Employee Safety ↑ Improve State of Good Repair
→ Support Compliance

Near Term Deliverables

Cost (\$M)

Metro will advance storage tank replacement at New Carrollton, Glenmont, and Greenbelt Railyards; modify track fueling within Alexandria and Shady Grove Railyards to comply with environmental regulations; replace the parking lot at 3421 Pennsy Drive to accommodate stormwater runoff, pretreatment, and connection to sewer systems; and evaluate repairs to the Twinbrook Metrorail Station stormwater detention system.

Location: Systemwide

Mode: Paratransit

Program: Acquisition

Federal Participation (all years): Yes

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program acquires vehicles for the MetroAccess paratransit fleet, consistent with the MetroAccess Fleet Plan. Vehicle acquisition includes purchase of vans, minivans and sedans, in addition to making the necessary retrofits to add paratransit equipment and features. This program primarily supports the replacement of paratransit vehicles on a lifecycle basis.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

Additional Impacts: ↑ Improve Operational Efficiency ↑ Improve Customer Satisfaction
↑ Promote Transit Equity

Near Term Deliverables

Metro will purchase approximately 200 vehicles in FY2026. Metro will monitor and evaluate the performance of these vehicles to inform future decisions on the appropriate mix of vans, sedans, and next-generation vans.

Track Rehabilitation Program (CIP0024)

Initiative Type: Program

Category: Track and Structures Rehabilitation Investments

Location: Systemwide

Mode: Rail

Program: Fixed Rail

Federal Participation (all years): Yes

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program replaces, rehabilitates and provides preventative maintenance to rail systems in an effort to maintain a State of Good Repair. This includes rail replacement, stray current mitigation, track bed cleaning, drain rodding, vegetation controls, and other activities.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Improve State of Good Repair

Additional Impacts: ↑ Improve Safety ↑ Improve Operational Efficiency
 ↑ Improve On-Time Performance

Near Term Deliverables

Metro will continue the systemwide State of Good Repair program which includes stabilization and tamping of track, cleaning of the track bed, and replacement or renewal of crossties, fasteners, grout pads, drains, insulators, and switches.

Description

This program will support scheduled maintenance programs for all railcars. Major rail vehicle systems that will be addressed include, but are not limited to, replacement of components associated with wheels, brakes, traction motors, propulsion systems, HVAC, couplers, and vital relays.

Expected Performance Outcome

Primary Goal/Objective ● **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

Additional Impacts: ↑ Improve Rail Service and On-Time Performance
↑ Improve Customer Satisfaction ↑ Increase Asset Lifespan

Near Term Deliverables

Metro will maintain the 3000-, 6000-, and 7000-series railcars in a State of Good Repair by performing preventive maintenance via the Scheduled Maintenance Program (SMP). This involves subsystem equipment overhauls at specified intervals.

Station Entrance Canopy Installation (CIP0088)

Initiative Type: Project

Category: Stations and Passenger Facilities Investments

Location: Systemwide

Mode: Rail

Program: Platforms & Structures

Federal Participation (all years): Yes

Metro's
Goals
• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project installs new station entrance canopies over entry escalators and stairways.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Convenience**

Expected Outcome Measure: ↑ Increase General Customer Satisfaction

Additional Impacts: ↑ Improve Reliability and Useful Life ↑ Promote Financial Sustainability

Near Term Deliverables

Metro will continue construction of station entrance canopies at select stations, including: Judiciary Square, Capitol South, Potomac Ave, Arlington Cemetery, Smithsonian, U Street, and Archives/Navy Memorial and construction of stairs at College Park, Judiciary Square, and Bethesda.

Location: Systemwide

Mode: Rail

Program: Vertical Transportation

Federal Participation (all years): Yes

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program rehabilitates or replaces escalator and elevator components based on asset condition and management criteria.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Maintain (Or Increase) Elevator Availability

Additional Impacts: ↑ Enhance Security ↑ Improve Customer Satisfaction
↑ Promote Transit Equity ↓ Reduce Energy Use

Near Term Deliverables

Metro will repair and replace escalator and elevator components including speed reducer motors and rack and axle units, brake boards, and escalator steps, as well as refurbish gearboxes. At 52 station locations where escalators and elevators experience water intrusion and poor or blocked drainage, Metro will snake/clear existing drainage piping and perform escalator wellway, truss, and pan cleaning.

Location: Systemwide

Mode: Rail

Program: Signals & Communications

Federal Participation (all years): Yes

Metro's
Goals
• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project replaces Metro's outdated internal communication and public safety radio systems. This includes the public safety radio system, the Metro area radio system, and cellular services throughout the system, allowing customers to utilize cellular service while underground.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Safety & Security

Expected Outcome Measure: ↑ Improve Communications and Enhance Safety and Security

↑ Improve Service Reliability ↑ Improve Customer Satisfaction

Additional Impacts: Promote Professional and Technical Skill ↑ Improve Communication with Jurisdictional First Responders

↑ Development

Near Term Deliverables

Metro will complete the installation of the new radio system both above and below ground, take delivery of additional handheld radio and subscriber units, and install the remaining Metro box enclosures to cover Metro's above and underground system for both radio and wireless use.

Category: Stations and Passenger Facilities Investments

Location: Systemwide

Mode: Systemwide

Program: Station Systems

Federal Participation (all years): TBD

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program will provide for security improvements at various rail yards, stations, and facilities by installing public address systems, intercoms, and additional security measures, and maintain a State of Good Repair for those various related systems. It also includes the monitoring and support of Metro's legacy camera systems during the transition to the Enterprise Wide Video system.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Safety & Security

Expected Outcome Measure: ↓ Deter Major Crimes (Part 1 Crimes)

Additional Impacts: ↑ Improve Customer Perception of Safety from Crime ↑ Increase Staff Sentiment About Working for Metro

Near Term Deliverables

Advance replacement and upgrade of life-safety and security systems at various locations systemwide. These modernization upgrades can include intrusion detection and access control systems, new intercoms and communication equipment, and the infrastructure needed to support this equipment.

Metrorail Station Improvements (CIP0218)

Initiative Type: Program

Category: Stations and Passenger Facilities Investments

Location: Systemwide

Mode: Rail

Program: Platforms & Structures

Federal Participation (all years): TBD

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program supports rehabilitation of station components throughout the system including shaft repairs, entry gates, flooring, other components and amenities.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Safety & Security

Expected Outcome Measure: ↑ Improve Customer and Employee Safety

Additional Impacts: ↑ Improve State of Good Repair

Near Term Deliverables

Metro will install new and improved station entrance gates at priority Metrorail stations and address emergency egress.

Rail Station Lighting Improvements (CIP0219)

Initiative Type: Program

Category: Stations and Passenger Facilities Investments

Location: Systemwide

Mode: Rail

Program: Station Systems

Federal Participation (all years): Yes

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program improves the lighting and illumination levels within rail stations, replacing mezzanine, lower-level platform, and track bed lighting in Metrorail stations with higher-efficiency and more cost-effective fixtures. Exterior lighting for customers accessing the stations, including station pathways and bus loops, are also replaced through this program.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Safety & Security

Expected Outcome Measure: ↓ Reduce Customer Injuries

↑ Increase Asset Lifespan

↑ Improve Customer Satisfaction

Additional Impacts:

↑ Promote Seamless Accessibility

↑ Promote Financial and Environmental Sustainability

Near Term Deliverables

Metro will continue upgrades to Metrorail station platform edge lighting and exterior site lighting.

Mode: Bus

Program: Passenger Facilities/Systems

Federal Participation (all years): No

Metro's
Goals

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This program advances Metrobus planning studies necessary to sustain the network of services and facilities. Efforts focus on service plans, customer information, facilities management, bus stop accessibility, transit operations, traffic management, and service delivery.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Convenience**

Expected Outcome Measure: ↑ Increase General Customer Satisfaction

Additional Impacts: ↑ Improve Bus Service Reliability

↑ Promote Transit Equity

Near Term Deliverables

Metro will advance bus planning studies evaluating integrating systems, services, and facilities.

Flood Resiliency Infrastructure Upgrades (CIP0241)

Initiative Type: Project

Category: Stations and Passenger Facilities Investments

Location: Systemwide

Mode: Systemwide

Program: Support Equipment/Services

Federal Participation (all years): TBD

Metro's
Goals

• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

Since the opening of the first Metro line over 40 years ago, changes in local development, aging of the system, updates in design guidelines and criteria, and the effects of extreme weather events have led to flooding vulnerabilities in the system. This project will assess and implement mitigations to protect stations from flood waters entering into the rail system.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Safety & Security**

Expected Outcome Measure: ↓ Reduce Fire and Smoke Events

↑ Promote Reliable Revenue Service and

Additional Impacts: ↑ Financial Sustainability

Near Term Deliverables

Metro will develop implementation projects based on the completed assessment and plan the next set of stations to assess for flood resiliency improvements.

Rail System Drainage Rehabilitation Program (CIP0242)

Initiative Type: Program

Category: Stations and Passenger Facilities Investments

Location: Systemwide

Mode: Rail

Program: Station Systems

Federal Participation (all years): Yes

Metro's
Goals

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This program replaces and rehabilitates drainage pumping stations throughout the Metrorail system that have exceeded their lifecycle and supports implementation of flood resiliency improvements.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Increase Operational Capacity with Reduced Track Under Performance Restrictions

Additional Impacts:	↑ Improve Safety	↓ Reduce Fires
	↓ Reduce Speed Restrictions	↑ Promote Financial Sustainability

Near Term Deliverables

Metro plans to complete drainage pump station renewals at the next two stations (e.g., Noyes Road and Medical Center) identified in the priority list. Drainage pump station renewals include replacement of pumps, piping, controls, lighting, and other structural and drainage elements. Continue designs of drainage pump stations at the following seven locations: Van Ness-UDC, Judiciary Square, Friendship Heights, Medical Center, Forest Glen, Fort Totten, and Gallery Place-Chinatown.

Location: District of Columbia

Mode: Rail

Program: Platforms & Structures

Federal Participation (all years): TBD

Metro's
Goals
• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project adds a new elevator to connect the northbound Yellow/Green platform to the Blue/Orange/Silver platform and replace three escalators with three staircases to improve mobility and access for customers at L'Enfant Plaza Metrorail station.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Convenience**

Expected Outcome Measure: ↑ Increase General Customer Satisfaction

Additional Impacts:

↑ Promote Transit Equity

↑ Promote Seamless Accessibility

Near Term Deliverables

Metro will award a design-build contract and begin construction activities.

Automatic Train Control State of Good Repair (CIP0251)

Initiative Type: Program

Category: Rail Systems Investments

Location: Systemwide

Mode: Rail

Program: Signals & Communications

Federal Participation (all years): Yes

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program replaces aging signaling systems, Train Control Room (TCR) infrastructure and wayside equipment (including devices to replace remote terminal units). Obsolete and failing equipment are planned to be replaced at intervals ranging from 20 to 40 years.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Asset Lifespan/Improve State of Good Repair

↑ Improve Rail Service Reliability

↑ Improve Customer Satisfaction

Additional Impacts:

↑ Promote Professional and Technical Skill

↑ Development

Near Term Deliverables

Metro will continue the switch machine power supply replacements and State of Good Repair programs for high current bonds, interlocking, signals, circuit cable, switch machines, control cable insulation, and remote terminal units. Metro will complete the rehabilitation of 24 train control rooms and outfit a second training lab.

Category: Rail Systems Investments

Location: Systemwide

Mode: Rail

Program: Power

Federal Participation (all years): Yes

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program replaces traction power systems, improves various traction power components (e.g., remote terminal units), and maintains existing traction power systems in a State of Good Repair to deliver safe and reliable Metrorail operations.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Improve State of Good Repair

Additional Impacts: ↑ Improve Employee Safety

↑ Improve Rail Service Reliability and Operational Efficiency

↑ Improve Customer Satisfaction

Near Term Deliverables

Metro will replace equipment in traction power substations and tie breaker stations throughout the system. Approximately 600 cables will be inspected and tested, and 8,000 linear feet of cable will be replaced per quarter.

Sustain-
ability

Description

This project replaces Metro's aging fare collection systems in rail stations, on Metrobuses, and upgrades the back-end system that supports fare collection. The investment includes new methods for customers to pay and manage payment accounts, and modifications to faregates to help reduce fare evasion.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

Additional Impacts: ↑ Improve Fare Collection Reliability ↑ Improve Customer Satisfaction
↑ Promote Regional Partnership ↑ Promote Financial Sustainability

Near Term Deliverables

Cost (\$M)

Metro will continue development and improvement of the mobile payment system, replacement of the fare machines, and assist in developing WMATA.com.

Location: Systemwide

Mode: Rail

Program: Acquisition

Federal Participation (all years): Yes

Metro's
Goals

• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project acquires 620 of the 7000-series railcars to replace 1000-, 4000-, and 5000-series fleets, plus 28 additional railcars. The Metropolitan Washington Airports Authority (MWAA) funded 128 additional 7000-series railcars in support of the Silver Line Phase 1 and 2 extension projects under CRB0019_19 and CRB0020_01.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

↑ Enhance Security

↑ Improve Operational Efficiency and Reliability

Additional Impacts:

↑ Improve Customer Satisfaction

↑ Promote Professional and Technical Skill Development

Near Term Deliverables

Metro will continue to make milestone payments for railcar warranties while closely working to address various railcar modifications, including improved training and troubleshooting. All 7000-series railcars associated with this project have been acquired.

Tunnel Water Leak Mitigation (CIP0262)

Initiative Type: Program

Category: Track and Structures Rehabilitation Investments

Location: Systemwide

Mode: Rail

Program: Structures

Federal Participation (all years): Yes

Metro's
Goals

• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This program mitigates water infiltration into the Metrorail tunnel and vent shaft system.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Safety & Security

Expected Outcome Measure: ↓ Reduce Fire and Smoke Events

Additional Impacts: ↑ Improve Rail Service Reliability ↑ Improve Asset Lifespan
↑ Improve Customer Satisfaction

Near Term Deliverables

Metro will continue tunnel grouting to mitigate water intrusion along two segments of the Red Line. Evaluation of the effectiveness of the mitigation work is included in the scope.

Category: Stations and Passenger Facilities Investments

Location: Systemwide

Mode: Systemwide

Program: Station Systems

Federal Participation (all years): No

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

Metro is advancing new ways to inform customers through the installation of digital signs. This program invests in new equipment and space improvements designed to upgrade digital displays, improve signage and wayfinding, and deliver other customer amenities.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Convenience

Expected Outcome Measure: ↑ Increase General Customer Satisfaction

Additional Impacts: ↑ Promote Modern Wayfinding and Digital Signage ↑ Improve State of Good Repair
↑ Promote Financial Sustainability

Near Term Deliverables

Progress the installation of customer entrance digital displays at additional high-ridership and equity Metrorail stations, install digital signage at Bethesda Station as part of the summer shutdown, and build in-house capability to roll out improved static signage at Metrorail stations.

New Carrollton Garage and Bus Bays (CIP0275)

Initiative Type: Project

Category: Bus and Paratransit Investments

Location: State of Maryland

Mode: Bus

Program: Passenger Facilities/Systems

Federal Participation (all years): TBD

Metro's
Goals
• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project supports the joint development at New Carrollton Metrorail Station. Metro has entered into a third-party joint development agreement for mixed-use development in the New Carrollton Station area, including the new Metro office building. As a part of this development, Metro will demolish the obsolete parking garage and construct a replacement garage and bus loop.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

Additional Impacts:	↑ Improve Operational Efficiency	↑ Improve Customer Satisfaction
	↑ Promote Station Access	↑ Promote Ridership and Economic Stimulus

Near Term Deliverables

Metro will complete construction of the new bus loop and parking garage structure.

Location: Systemwide

Mode: Systemwide

Program: Support Equipment/Services

Federal Participation (all years): No

Metro's
Goals

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

Metro manages an extensive supply chain. There is a multi-year proposal to modernize and centralize the supply chain systems, storerooms, and inventory management, as well as to replace material handling equipment (e.g., forklifts, swing reach trucks, order pickers, utility vehicles, etc.)

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

↑ Improve Safety

↑ Improve Operational Efficiency

Additional Impacts:

↑ Promote Professional and Technical Skill
↑ Development

↑ Promote Financial Sustainability

Near Term Deliverables

Metro will procure new material handling equipment to replace current warehouse material handling equipment that is at the end of its lifecycle. This will include forklifts, pallet jacks, order pickers, swing reach trucks, and utility vehicles.

Railyard Shop Equipment Replacement (CIP0279)

Initiative Type: Program

Category: Railcar Investments

Location: Systemwide

Mode: Rail

Program: Maintenance Facilities

Federal Participation (all years): No

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program replaces or rehabilitates Metro rail shop maintenance equipment, such as overhead cranes, rail train lifts, hoists, or industrial shop air compressors that are inoperable, deficient, or have reached the end of their useful life.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

Additional Impacts: ↑ Improve Safety → Maintain Operational Capacity
↓ Reduce Failures

Near Term Deliverables

Scheduled rehabilitation/replacement of maintenance equipment including shop lifts, trammimg tables, cranes, drop tables, hoists, wheel lathes, press, and bore truing machines.

Railyard Facility and Site Rehabilitation (CIP0284)

Initiative Type: Program

Category: Railcar Investments

Location: Systemwide

Mode: Rail

Program: Maintenance Facilities

Federal Participation (all years): No

Metro's Goals

• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This program rehabilitates railyard facilities, systems, and site assets to achieve and maintain a State of Good Repair and improve employee safety and operational efficiency. It will also support the creation of a Fleet Management Facility to support the scheduled maintenance program for Metro's railcar fleet.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

↑ Improve Safety

↑ Improve Operational Efficiency

Additional Impacts:

↑ Improve Employee Sentiment

↑ Promote Financial and Environmental

↑ Sustainability

Near Term Deliverables

Metro will launch planning and design for the Fleet Management Facility, repair damaged cable troughs at the West Falls Church Railyard, complete designs for the sewage ejector and the paint shop lift in the Greenbelt Railyard, design targeted operational improvements at New Carrollton Railyard, and procure railyard equipment.

Description

This project encompasses a redesign of the First Street Northeast entrance, featuring an expansion of the north mezzanine with new stairs, additional fare gates, and relocated fare vending machines. Concurrently, at Amtrak's request and with reimbursement, Metro is repairing the deteriorated structural slab above the entrance mezzanine during the renovation.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Convenience

Expected Outcome Measure: ↑ Increase General Customer Satisfaction

Additional Impacts:

↑ Improve Safety

↑ Improve Lighting

↑ Improve Customer Satisfaction

↓ Reduce Station Crowding

Near Term Deliverables

Cost (\$M)

Metro will advance site design and begin the procurement process to award the construction contract for the First Street Northeast entrance at Union Station.

Bladensburg Bus Garage Replacement (CIP0311)

Initiative Type: Project

Category: Bus and Paratransit Investments

Location: District of Columbia

Mode: Bus

Program: Maintenance Facilities

Federal Participation (all years): Yes

Metro's
Goals

• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project demolishes and replaces the existing obsolete bus maintenance and operations facility at Bladensburg to improve use and capacity of limited facility space. The new facility is designed to achieve LEED certification, will have multiple access points, parking for up to 300 buses and 31 maintenance bays, fueling both diesel and compressed natural gas, and an on-site employee parking lot. The facility will be built to support zero-emission electric vehicles. This project will also construct a combined natural gas facility at Shepherd Parkway Bus Division.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

↑ Improve Employee Safety

↑ Improve Bus Reliability

Additional Impacts:

↑ Promote Professional and Technical Skill

↑ Promote Environmental Sustainability

↑ Development

Near Term Deliverables

Reallocate the staff to the new operations and maintenance (O&M) building, commence Phase 2 with the archaeological study, and commence and complete the excavation of the existing facility.

Northern Bus Garage Replacement (CIP0315)

Initiative Type: Project

Category: Bus and Paratransit Investments

Location: District of Columbia

Mode: Bus

Program: Maintenance Facilities

Federal Participation (all years): Yes

Metro's
Goals
• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project involves replacing the outdated Northern Bus Garage to remedy structural issues and optimize the use of limited facility space. The new facility will maintain the historical façade while being designed for LEED certification. It will accommodate around 150 buses, feature multiple access points, and include parking, along with potential retail or public space. Upon reopening, the facility will support the operation of a full zero-emissions bus fleet.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

↑ Improve Employee Safety ↑ Improve Bus Reliability

Additional Impacts: ↑ Promote Professional and Technical Skill ↑ Promote Environmental Sustainability
↑ Development

Near Term Deliverables

Metro will advance the project through construction activities (e.g., structure and mechanical, electrical and plumbing (MEP)) and that will preserve the historic façade.

Description

This program provides support for the financial management of the capital program, including jurisdictional funds and federal grants.

Expected Performance Outcome

Primary Goal/Objective • Sustainability | Financial Sustainability

Expected Outcome Measure: ➔ Support Program Operations

↑ Improve Operational Efficiency

Near Term Deliverables

Metro will support the financial management of the capital program to include management of grants, accounting services, maintenance of financial systems, and alignment of capital costs to appropriate funding.

Mode: Systemwide

Program: IT

Federal Participation (all years): No

Metro's
Goals
• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project constructed a new data center to replace the existing data center at the Jackson Graham Office Building that was vacated. Metro will build a modern data center that blends new technologies with existing capabilities to continually improve and scale services to users, customers, and partners.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Improve Operational Efficiency

Additional Impacts:

↑ Enhance Data Security

↓ Reduce Energy Use

↓ Reduce Costs

Near Term Deliverables

Metro will continue to maintain installed servers, racks, telecommunications, and networking equipment at the off-premises data center through FY2026 and will conclude support thereafter.

**Sustain-
ability**

Description

This project implements a new Enterprise Resource Planning (ERP) system. Metro will perform necessary upgrades to the current ERP system to maximize vendor support until the current system sunsets.

Expected Performance Outcome

Primary Goal/Objective • **Talented Teams | Engagement, Empowerment & Recognition**

Expected Outcome Measure: ↑ Increase Staff Sentiment About Working For Metro

Additional Impacts: ↑ Improve Business Process Efficiency ↑ Improve Customer and Employee Services

Near Term Deliverables

Metro will continue implementation of the new ERP system, including integration of new ERP and various Metro software and modules, and migration of information from the old system to the replacement.

Fiber Optic Cable Installation (CIP0332)

Initiative Type: Project

Category: Rail Systems Investments

Location: Systemwide

Mode: Systemwide

Program: Signals & Communications

Federal Participation (all years): No

Metro's
Goals

• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project installs fiber optic cable, replacing outdated copper wiring that connects communication rooms along the rail right-of-way (ROW) throughout the system. It also identifies strategies for fiber optic installations in ancillary facilities, including traction power substations, low voltage power rooms, vent shafts, and tie breaker stations. This initiative serves as the foundation for other key investments, notably the radio infrastructure replacement.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Improve System Operations

Additional Impacts: ↑ Improve Metro's Radio System ↑ Improve Employee Communications
↑ Functionality ↑ Improve Safety

Near Term Deliverables

In FY2026, Metro will transition to testing and handoff of fiber to the radio upgrade effort. Metro will also install roughly 20,000 linear feet of fiber in support of the ancillary work that remains in the contract.

Office Consolidation - District of Columbia (CIP0335)

Initiative Type: Project
Category: Business Support Investments
Location: District of Columbia

Mode: Systemwide
Program: Support Equipment/Services
Federal Participation (all years): No

Metro's
Goals
• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

As part of Metro's regional office consolidation plan, this project funds the construction of a D.C. office building at 300 7th St. SW. The new site will be renovated to modern workplace standards, including new commercial amenities on the ground floor to activate the streetscape and benefit the community. In addition, Metro will improve the exterior appearance and add three floors, creating space for leases to generate additional revenue. The building achieved LEED Platinum status in September of 2023.

Expected Performance Outcome

Primary Goal/Objective • Talented Teams | Engagement, Empowerment & Recognition

Expected Outcome Measure: ↑ Increase Staff Sentiment About Working For Metro

Additional Impacts:	↑ Improve Safety	↑ Promote Economic Stimulus
	↑ Improve Cost Savings	↑ Promote Environmental Sustainability

Near Term Deliverables

Metro will continue construction to move the chiller that was at the Jackson Graham Office Building.

Location: State of Maryland

Mode: Systemwide
Program: Support Equipment/Services
Federal Participation (all years): No

Metro's
Goals
• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This project constructs a new office building in Maryland as part of Metro's regional office consolidation plan. The new office building consolidates employees near New Carrollton Metrorail Station in Prince George's County, Maryland. The station is one of the region's most significant transit hubs and is served by Metro, MARC, multiple local and regional buses, Amtrak, Greyhound, and the future Maryland MTA Purple Line. The building has been designed with the goal of achieving LEED certification and is part of the continued development of New Carrollton.

Expected Performance Outcome

Primary Goal/Objective • Talented Teams | Engagement, Empowerment & Recognition

Expected Outcome Measure: ↑ Increase Staff Sentiment About Working For Metro

↑ Improve Safety

↑ Promote Economic Stimulus

Additional Impacts:

↑ Promote Financial Sustainability

↑ Promote Environmental Sustainability

↑ Improve Safety and Security

Near Term Deliverables

Metro will make the final payments related to the construction of the new administrative office building located at New Carrollton in Maryland.

Location: Systemwide

Mode: Bus
Program: Acquisition
Federal Participation (all years): Yes

Metro's
Goals
• Primary

Service Excellence

Talented Teams

Regional Opportunity & Partnership

Sustainability

Description

This project purchases electric buses to transition the initial portion of the bus fleet to zero-emissions technology. Results will inform, guide, and direct Metro's future bus fleet strategy and plans for supporting equipment, infrastructure, and zero-emission facilities. As the zero-emission bus landscape continues to evolve, technologies other than electric will be evaluated through this project. Future unfunded zero-emission conversion costs have been included in the 10-Year and Beyond FY35 budget to better align with DMVMoves discussions.

Expected Performance Outcome

Primary Goal/Objective • Sustainability | Environmental Sustainability

Expected Outcome Measure: Improve Carbon Footprint and Increase Percent of Energy Procured from Renewable Sources; Increase Percent of Fleet That Is Zero-Emission

Additional Impacts: Improve Operational Efficiency Promote Environmental Sustainability
Promote Regional Energy Goals

Near Term Deliverables

Metro expects to conduct closeout actions for bus and Shepherd Parkway Bus Facility chargers for zero-emission vehicle development Phase 1.

Service-Oriented Architecture (SOA) application platform enables organizations to share independent services to accomplish business goals. SOA enables the development of applications to be more efficient and secure. This supports the ability to adjust applications to align with changing business needs.

The screenshot shows the Metroweb homepage with a navigation bar at the top. Below the navigation, there are two main sections. The left section features a black background with three small video frames showing people in work environments. The right section has a blue background with a woman in a suit, a red banner with text, and a logo for 'ANOTHER SHOT FOR A SHOT' featuring a syringe and a vial.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: → Maintain System Operations

↑ Support Business Process Efficiency and
Improvement

Near Term Deliverables

Metro will continue maintaining and improving its Service-Oriented Architecture services and systems to meet operating and business requirements. Annual program activities include but are not limited to support for technological maintenance of the software such as patches, security fixes, replacement of outdated or faulty equipment, security and threat upgrades, and recommended warranty compliance maintenance activities.

Description

Execute a fixed-price procurement for a vendor to do an assessment of Metro's technology landscape to identify what is needed to establish an Independent Verification and Validation (IV&V) program, including program requirements, projected costs, and a statement of work for IV&V implementation procurement.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Convenience**

Expected Outcome Measure: → Maintain and develop IV&V development and review standard for technology development

Additional Impacts: ↑ Improve the Development of System Applications

Near Term Deliverables

Procurement for a vendor to do an assessment of the technology landscape to identify what is needed to establish an IV&V program.

Sustain-
ability

Description

This project rehabilitates structural and system components of priority bridges and aerial structures at Minnesota Avenue, Grosvenor, Shady Grove, and Greenbelt Stations.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

Additional Impacts:

↑ Improve Safety

↑ Improve Rail Service Reliability

Near Term Deliverables

Metro will award the construction package for the prioritized list of locations and begin construction activities on various bridge structures throughout the system.

Shaft Structural Rehabilitation (CIP0375)

Initiative Type: Project

Category: Track and Structures Rehabilitation Investments

Location: Systemwide

Mode: Systemwide

Program: Structures

Federal Participation (all years): No

Metro's
Goals

• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project rehabilitates six shafts to address damage to the structure from water infiltration, including repairs to grouting, concrete, ladders, stairs, electrical equipment, bollards, and drainage systems. Future unfunded fall protection investments in shafts have been included in the 10-Year and Beyond FY35 to better align with DMVMoves discussions.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Increase Asset Lifespan / Improve State of Good Repair

Additional Impacts: ↑ Improve Safety ↑ Improve Operational Efficiency

Near Term Deliverables

Metro will continue the remediation of six shafts: five located on the Red Line and one on the Green Line.

Western Bus Garage Replacement (CIP0376)

Initiative Type: Project

Category: Bus and Paratransit Investments

Location: District of Columbia

Mode: Bus

Program: Maintenance Facilities

Federal Participation (all years): TBD

Metro's
Goals

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project replaces the obsolete Western Bus Garage maintenance and operations facility to improve use and capacity of limited facility space. The new facility, designed to achieve LEED certification, will support full implementation of 100% electric vehicles, multiple access points, bus parking, and maintenance bays.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

↑ Improve Employee Safety

↑ Improve Operational Efficiency

Additional Impacts:

↑ Improve Employee Experience

↑ Promote Environmental
Sustainability

Near Term Deliverables

Metro will continue progressing the land purchase at 5255 Western Avenue NW, Washington DC.

Location: Systemwide

Mode: Rail

Program: Signals & Communications

Federal Participation (all years): TBD

Metro's
Goals
• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project focuses on developing an advanced signaling system and platform screen doors, which will be implemented across the entire Metrorail system to replace existing signaling infrastructure. The unfunded rough order of magnitude cost estimates in Beyond FY35 have been updated to better align with DMVMoves discussions.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Improve System Operations

↑ Improve Safety and Security

↑ Improve Customer Satisfaction

Additional Impacts:

↑ Promote Professional and Technical Skill

↑ Promote Financial and Environmental

↑ Development

↑ Sustainability

Near Term Deliverables

Complete program development activities including: establishing the overall program goals and objectives, implementation strategy, cost, and schedule. Design and develop a demonstration of platform screen doors at a Metrorail station.

Metro Training Facility (CIP0381)

Initiative Type: Project
Category: Business Support Investments
Location: State of Maryland

Mode: Systemwide
Program: Support Equipment/Services
Federal Participation (all years): TBD

Metro's
Goals
• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

Metro's current training facilities are scattered throughout the region and are inefficient at addressing often overlapping training needs, and systemic training shortfalls. Additionally, dedicated, off-system space is not available for first responder training exercises and new maintenance techniques. A new, co-located Metro Training Facility will facilitate the cost-effective delivery of training opportunities for employees across all departments. Through cutting-edge technology, interactive learning platforms, and hands-on simulations, employees will be equipped with the tools and knowledge needed to deliver the highest level of service to customers.

Expected Performance Outcome

Primary Goal/Objective • Talented Teams | Professional & Technical Skills Development

Expected Outcome Measure: ↑ Increase Staff Perception of Support To Learning & Development

↑ Improve Service Reliability

↑ Improve Customer Satisfaction

Additional Impacts:

Near Term Deliverables

Begin gathering requirements and planning for a unified Metro Training Facility.

Location: Commonwealth of Virginia

Mode: Bus

Program: Maintenance Facilities

Federal Participation (all years): Yes

Metro's
Goals

• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

The electrification infrastructure and facility upgrades, conducted in partnership with Fairfax County, will support 100% zero-emission bus operations at the existing Cinder Bed Bus Garage. This will include service delivery reconfiguration, garage infrastructure enhancements, and training and workforce development to support an electric bus fleet.

Expected Performance Outcome

Primary Goal/Objective • Sustainability | Environmental Sustainability

Expected Outcome Measure: Improve Carbon Footprint, and Increase Percent of Energy Produced from Renewable Sources

Additional Impacts: Improve Safety and Operational Efficiency Promote Professional and Technical Skill Development
 Promote Regional Partnership Promote Financial Sustainability

Near Term Deliverables

Install necessary equipment and infrastructure to support battery electric buses at Cinder Bed Bus Garage.

Description

This program supports State of Good Repair activities for critical asset management applications supporting Bus and Rail activites.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ➔ Maintain State of Good Repair

Additional Impacts: ➔ Maintain System Operations

Near Term Deliverables

Metro will continue maintaining asset management software systems used to provide asset management tracking for Bus and Rail. Annual program activities for critical asset management include but are not limited to, security patches and updates, specific IT and software patches and updates, resolution of technical issues, and IT support for software application configurations.

Better Bus Implementation (CIP0396)

Initiative Type: Project

Category: Bus and Paratransit Investments

Location: Systemwide

Mode: Bus

Program: Passenger Facilities/Systems

Federal Participation (all years): TBD

Metro's
Goals

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

Better Bus is an initiative to rethink, redesign, and revitalize bus service to better serve the needs of customers in the region - through new facilities and buses, better and faster service, and better customer information and amenities. The proposed 2025 Better Bus Network is a bus network and service plan that reshapes the entire Metrorail system within Metro's current resource levels, while improving service and connections throughout the system.

Expected Performance Outcome

Primary Goal/Objective • **Service Excellence | Reliability**

Expected Outcome Measure: ↑ Increase Bus Speeds

↑ Improve Customer Safety

↑ Improve Customer Satisfaction

Additional Impacts:

↑ Promote Regional Partnership and Transit
Equity

↑ Improve Environmental Sustainability

Near Term Deliverables

Deliver the on-street infrastructure to support the transition to the 2025 Better Bus Network.

Silver Line Phase 2 Construction Support (CRB0020)

Initiative Type: Project

Category: Stations and Passenger Facilities Investments

Location: Commonwealth of Virginia

Mode: Rail

Program: Platforms & Structures

Federal Participation (all years): TBD

Metro's
Goals

• Primary

Service Excellence

Talented Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project provides support for Metro's role in Silver Line Phase 2 construction, integration, and infrastructure improvements. The Silver Line Phase 2 project is managed and funded by the Metropolitan Washington Airports Authority (MWAA).

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

↑ Enhance Security and Reliability

↑ Improve Customer Satisfaction

Additional Impacts:

↑ Promote Professional and Technical Skill
↑ Development

↑ Promote Regional Partnership

Near Term Deliverables

Support the completion of final MWAA activities for Silver Line Phase 2, which include installing artwork at the Ashburn and Reston Metrorail stations, and managing the acquisition and warranty of remaining equipment.

Silver Line Phase 2 Railcars (CRB0020_01)

Initiative Type: Project

Category: Railcar Investments

Location: Systemwide

Mode: Rail

Program: Acquisition

Federal Participation (all years): No

Metro's
Goals

• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project acquires 64 new 7000-series railcars for Phase 2 construction of the Silver Line. The railcars are funded by the Metropolitan Washington Airports Authority (MWAA).

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Reliability

Expected Outcome Measure: ↑ Increase Mean Distance Between Failure (MDBF)

↑ Enhance Security and Reliability

↑ Improve Customer Satisfaction

Additional Impacts:

↑ Promote Professional and Technical Skill
↑ Development

↑ Promote Regional Partnership

Near Term Deliverables

Metro will complete the performance milestone payments and commence final acceptance payments.

Purple Line Construction Support (CRB0127)

Initiative Type: Project

Category: Stations and Passenger Facilities Investments

Location: State of Maryland

Mode: Rail

Program: Platforms & Structures

Federal Participation (all years): No

Metro's
Goals

• Primary

Service
Excellence

Talented
Teams

Regional
Opportunity &
Partnership

Sustain-
ability

Description

This project supports the Purple Line, a 16-mile light rail transit line extending from Bethesda to New Carrollton. The Maryland Transit Administration (MTA) is managing and funding the development of the line which will connect to four Metrorail stations: Bethesda, Silver Spring, College Park, and New Carrollton. This project includes design and engineering support to integrate Metro facilities with the Purple Line and new station entrances at Bethesda and Silver Spring Metrorail Stations.

Expected Performance Outcome

Primary Goal/Objective • Regional Opportunity & Partnership | Community Partnership & Engagement

Expected Outcome Measure: ➔ Support Program Operations

Additional Impacts:

↑ Improve Customer Satisfaction

↑ Improve Regional Transit Access

Near Term Deliverables

Metro will support design and construction efforts to integrate the Purple Line with the Metrorail system. Metro will begin to construct the South Mezzanine connector to the Purple Line system at Bethesda Metrorail Station.

Crystal City East Entrance (CRB0137)

Initiative Type: Project

Category: Stations and Passenger Facilities Investments

Location: Commonwealth of Virginia

Mode: Rail

Program: Vertical Transportation

Federal Participation (all years): TBD

Metro's
Goals

• Primary

Service
Excellence

Talented
Teams

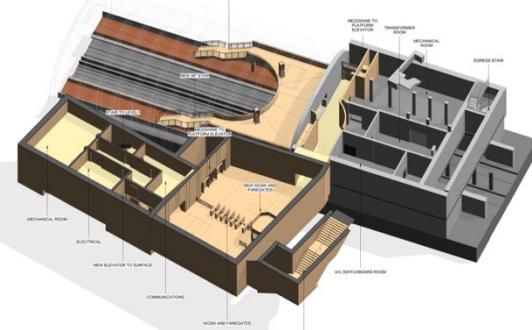

Regional
Opportunity &
Partnership

Sustain-
ability

Description

Crystal City Metrorail Station, one of the more highly-used stations in Arlington County, is reaching capacity during peak periods and has limited emergency egress. With redevelopment underway in the area, overall trip-making will increase and may overburden the existing station entrance. The construction of a new entrance at the east end of the station is being managed and funded by Arlington County. The new entrance will have two new street-to-mezzanine elevators and new platform-to-mezzanine elevators, and will provide easier access from Crystal Drive, the nearby Virginia Railway Express (VRE) station, and the Metroway transit station.

Expected Performance Outcome

Primary Goal/Objective • Service Excellence | Convenience

Expected Outcome Measure: ↑ Increase General Customer Satisfaction

Additional Impacts: ↑ Promote Regional Opportunity and Partnership ↑ Improve Regional Transit Access

Near Term Deliverables

Through this project, Metro will provide support for excavation at the site and the construction of a concrete underground structure.

Appendix E – Sustainability, Energy, Equity, and Climate Resilience

Pictured: Zero-Emission Metrobus

Sustainability at Metro

Metro is key to the region meeting its sustainability goals – by providing mobility for customers while reducing travel-related emissions and traffic congestion. Transit helps the region meet its visionary and ambitious goals, which include providing clean and efficient transportation, continuing to grow the economy, improving access to jobs, promoting cleaner air and improved health, and advancing livability.

Metro is a vital part of moving the region and as Metro's ridership grows, our positive impact increases. That's why Metro's biggest regional impact is the service we provide. Metro service reduces regional greenhouse gas (GHG) emissions by providing an efficient, low-carbon, affordable and safe transportation option for the region's residents and visitors.

Metro continues progress towards the environmental sustainability objective in the Strategic Transformation Plan: [Your Metro, The Way Forward](#) ("the Plan") in which key targets aligned with regional goals include decarbonization, resource consumption efficiency, investments in carbon-free clean energy sources , equity through system design and employment, the transition to zero-emission vehicles, and climate resiliency.

As Metro moves ahead, the Strategic Transformation Plan will continue to serve as a guide to ensure Metro delivers what customers deserve and the region needs. Major programs are described in the following pages; keep apprised of Metro's sustainability efforts at:

<https://www.wmata.com/initiatives/sustainability/>

Decarbonization

As one of the single largest energy consumers in the region, Metro is an important partner for meeting regional energy and decarbonization goals. In support of Metro's greenhouse gas emissions reduction and clean energy targets, Metro is taking action to increase energy efficiency, electrify when we retrofit facilities and replace equipment, invest in carbon-free clean energy sources, and transition to zero-emission vehicles.

This strategic pathway helps to maintain and continue efforts towards regional emission reduction targets while providing excellent service and a responsible return on investment for the region.

Clean Energy Market Engagement

Metro is engaging in the energy market in a way that supports a sustainable and resilient grid, investing in carbon-free electricity sources, and helping transition to the fleet of the future. For example, Metro is continuing to work with the General Services Administration to obtain clean electricity, secure favorable and stable supply pricing, and minimize administrative costs. Metro is making progress towards the Strategic Transformation Plan goal of 100% carbon-free electricity by 2033. In FY2024, 33 percent of Metro's electricity was carbon-free.

In addition, Metro continues investment in on-site renewable energy with designs for rooftop solar at Bladensburg and Northern Bus Garages (anticipated to come online in 2028). This builds on Metro's continuing support of clean energy investments, which includes a lease revenue generating, nearly 10MW, Solar Carport Program developed through public private partnership - the largest community solar project in the National Capital Area and one of the largest in the nation.

Pictured: Solar panels at the Naylor Road Station parking lot

Zero-Emission Vehicle Program

In addition to the inherent benefits of transit, transitioning to a [zero-emission bus](#) fleet presents a further opportunity to deliver significant benefits to the region and improve the overall experience for Metrobus customers.

Zero-emission buses improve efficiency and eliminate tailpipe emissions, providing public health benefits across the region. Without the need for a conventional vehicle engine, Metrobus customers will also experience a more comfortable ride while both the customers and the communities served benefit from a quieter vehicle.

Metro's Zero-Emission Bus Transition Plan provides a path for Metro to transform its fleet, facilities, workforce, and operations to 100 percent zero-emission bus service by 2042.

Metro's initial deployment of zero-emission buses will include 12 battery-electric buses at Shepherd Parkway Bus Division in D.C. Four battery-electric buses are currently in service with the remaining eight expected to be delivered by mid-2025.

Metro is in the design and construction process for three additional bus garages to support battery-electric buses and has a larger bus procurement underway. In addition, Metro is transitioning its workforce for the zero-emission fleet with over 500 employees trained on battery-electric buses to-date.

Initial planning is underway for non-revenue and paratransit fleets in support of the Strategic Transformation Plan objective to transform these fleets by 2050.

Equity

Equity is a key component of Metro's Strategic Transformation Plan. As a major employer and contractor of services, Metro is improving access to opportunity across the region by promoting career opportunities, recruitment, and supporting small, female-owned, and/or minority-owned businesses. In addition, Metro is actively working to incorporate equitable provision of services, including through the bus network redesign and public participation and outreach.

As a participant in the American Public Transportation Association (APTA) Racial Equity Commitment Program, Metro has pledged to make racial equity an explicit strategic priority for the agency; undertake timely assessments; review and analyze demographic data; and put in place programs, policies, and practices to establish and maintain a diverse and inclusive environment. Since Metro hired its first Chief Diversity, Equity, and Inclusion Officer in 2023, the Office of DEI has launched seven new Employee Resources Groups (ERGs) across the authority and began participating in New Employee Orientation (NEO) to inform new Metro employees of our commitment to diversity, equity and inclusion.

Climate Resiliency

In line with the Strategic Transformation Plan, Metro launched an effort to develop a climate resilience program to adapt to changing weather conditions. The program will better help us prepare and prioritize strategic investments in alignment with regional resilience planning efforts. In 2024, Metro updated the Manual of Design Criteria to consider updated projections. New capital projects are now required to conduct a risk assessment that evaluates potential risks and adaptations to ensure cost-effective investments.

Metro is pursuing grant funded and nature-based investments. For example, Metro has entered an agreement with Casey Trees to plant and maintain (for five years) approximately 450 trees at nine Metro rail stations, as part of a grant from the U.S. Department of Agriculture. Trees provide health and environmental benefits, such as mitigating stormwater impacts and improving air quality, and will also improve the customer experience by providing shade and cooling.

Innovation and Continuous Improvement

Metro facilitates an organizational culture of continual improvement and sustainable stewardship. Metro's Sustainability Lab and Sustainability Challenge promote cost effective innovation and best practice adoption across the Authority. Since their inception, these two programs combined have sponsored several business case analyses, test and evaluation programs, and operational improvements and recognized over 200 staff.

Metro has also embedded tools to support innovation and data-driven business decisions into operations. For example, Metro utilizes energy monitoring software that centralizes all utility data and enables insight into operations and opportunities for cost savings.

In line with the Strategic Transformation Plan, Metro is committed to reducing resource consumption, improving efficiency, controlling costs, and advancing employee wellness and health. Metro recently obtained certification for our fourteenth green-certified facility and is on the path to reach 18 green-certified buildings by 2028. In FY2026, Metro will continue advancing delivery of Northern and Bladensburg bus garages, which are being built to LEED standards. As the most widely used green building standard in the world, LEED helps Metro create safe and healthy workspaces for employees, enhance building operations and efficiency, and be a good neighbor in the communities we serve.

Pictured: Construction underway at Northern Bus Garage – pursuing LEED®

THIS PAGE INTENTIONALLY LEFT BLANK

Appendix F – Financial Standards

Metro's Financial Standards can be grouped into three major areas: general, business planning, and debt policy. General standards ensure that Metro prudently manages its daily financial operations, including banking services, investments and risk management to maintain adequate liquidity and appropriate cash reserves.

The business planning directives from the General Manager provide management with a set of parameters for developing the upcoming year's budget and other longer-term financial plans, as well as establishing future business targets for management to achieve.

The debt policy establishes parameters that govern the incurrence of Metro Debt and ensure that debt issuances are based on financial parameters similar or more conservative than those that would be placed on Metro by the financial marketplace. Actual debt covenants may differ from these standards, and in accordance with the debt policy, the actual covenants will be disclosed in any Board resolution approving a debt issuance.

This appendix also explains how Metro allocates state and local funding support among the jurisdictions.

Financial Standards – General GAAP

Metro maintains complete and accurate accounting records in accordance with generally accepted accounting principles in the United States of America (US GAAP) as applicable to governmental entities. The Government Accounting Standards Board is the standard setting body establishing governmental accounting and financial reporting standards.

Revenue and Expenditure Recognition

Revenues are recognized in the period they are earned, and expenses are recognized in the period in which they are incurred.

- Metro distinguishes between operating and non-operating revenues and expenses in its financial statements
- Operating revenues, which do not include state or local operating subsidy contributions or federal operating grants, are primarily composed of passenger fares and parking fees, as well as revenue for fiber optic leases and joint development agreements

Fiscal Year

The fiscal year-end for financial reporting purposes is June 30th of each year. The Board approves the budget for each fiscal year by June 30th of the previous year.

Annual Comprehensive Financial Report (ACFR)

An independent certified public accounting firm performs an audit of Metro's financial statements. Metro's aims to receive an unmodified ("clean") opinion on its financial statements and to receive the Government Finance Officers Association (GFOA) award for excellence in financial reporting for its ACFR.

Other Financial Policies and Guidelines

Funds are invested within the guidelines of the Board's approved investment policies and in compliance with the investment guidelines in WMATA's Compact.

- In accordance with Board Resolution No. 81-36, designated Metro officials are empowered to open, close, or authorize changes to accounts and are authorized to appoint individuals as official signatories for financial accounts
- An annual actuarial analysis is performed on all Metro-administered pension plans. Based on the results of such analysis, Metro makes contributions as required in agreement with the terms of each plan
- Appropriate insurance coverage is maintained to mitigate the risk of material loss. For self-insured retentions, Metro records the liabilities, including losses incurred but not reported, at 100 percent of the net present value
- The budget includes the operating and capital resources necessary to implement the policy directions set by the Board. The budget is prepared in a fashion to clearly describe the projects and programs for the period
- Metro engages in regional long-range transportation planning for the Washington metropolitan area in conjunction with the National Capital Region Transportation Planning Board (TPB) and other jurisdictional partners

- Staff provide transit system inputs to TPB for the Constrained Long-Range Plan (CLRP) and identify changes affecting the major financial assumptions of the plan and progress toward the implementation of new projects and programs
- Metro also engages in short-range transit planning for the Washington metropolitan area. Staff provide inputs to the region's six-year Transportation Improvement Program (TIP) and identify the capital investment needs to support the existing regional transit system and regional service expansion
- The Office of Inspector General develops an annual work plan each year. The Board of Directors and Metro's Senior Executive Team provide input on the work plan, which covers audits and evaluations. Furthermore, finalized complete audit and evaluation reports are submitted to the Board via the Executive Committee
- Recommendations for improvements are based on audits and evaluations performed by the Inspector General's office. Audits are performed in accordance with Government Auditing Standards, while evaluations are performed in accordance with the Association of Inspectors General (AIG) *Principles and Standards for Offices of Inspector General* (Green Book). These recommendations, management corrective action plans, and progress toward implementation are reported quarterly or as needed to the Board by the Inspector General. Semi-annual reports provide an overview of the Office of Inspector General's audits, evaluations and investigations for that period. The reports are provided to the Board and significant stakeholders identifying work performed, results and recommendations

Financial Standards – Business Planning

Passenger revenue forecasts are derived from historical ridership and revenue trends as well as forecasts of regional growth in population and employment. Since ridership may be affected by future fare policy changes, the impacts on ridership and average fare forecasts are based on conservative estimates.

- The Board has adopted fare policy principles and reviews the fares on a regular cycle. Management may propose fare modifications to achieve transit ridership improvements, maintain financial sustainability or support the other goals defined in Metro's fare policy principles

- Service plan assumptions are based on demonstrated needs as defined through short-range planning
- Capital programs are funded according to the terms of the Capital Funding Agreement (CFA), laws, regulations and discretionary procedures approved by the Board. The capital program covers Metro's assets, including major transportation projects, and is included in each annual budget
- From time to time, Metro applies for and receives discretionary federal and state funding. Discretionary funding is requested when projects or programs may be competitive for receiving an award. Discretionary funding levels are estimated based on federal and state criteria and the likelihood of obtaining approvals

Financial Standards – Debt Policy

Metro may not enter into a debt or financing arrangement unless the transaction is in compliance with all applicable provisions of WMATA's Compact.

- Pursuant to WMATA's Compact (Article IX paragraph 27), Metro may borrow money in pursuit of its mission. All such bonds and evidences of indebtedness are authorized by resolution of the Board and are payable solely out of the revenues of Metro. The bonds and other debt obligations of Metro, except as may be otherwise provided in the indenture under which they are issued, are direct and general obligations of Metro and the full faith and credit of Metro are pledged for the prompt payment of the debt service
- There is no dollar borrowing limit set in WMATA's Compact
- Long-term debt may be included in the budget or long-range plans; however, no such debt can be incurred without the specific approval of the Board
- The average life of debt instruments is matched to the average economic lives of the assets financed
- Reserve funds that may be required by the financial markets for each debt issuance are maintained. Cash and securities, insurance or surety bonds may fund these reserves. For financial planning purposes, reserve requirements are included in the face value of debt issued
- Further guidelines beyond the Compact are included in the Board's annual adopted Debt Management Policy, which reviews and provides

additional guidance for the use of debt for financing the Authority's infrastructure, capital projects and operational needs each fiscal year. The Debt Management Policy principles (a) identify efficient use of debt, (b) provide for timely debt service payments, and (c) balance the cost of capital with high credit ratings and access to capital markets

Allocation of State and Local Operating Subsidy

State and local funds to support Metro's annual operating and capital budgets are based on Board-approved subsidy calculations described in this section. In FY2025, the Board of Directors approved a restructuring of the Metrorail and Metrobus operating subsidy allocation formula to address the challenges with the legacy formulas by improving clarity and transparency, aligning service costs with regional benefits and incentivizing ridership and revenue growth. This restructured operating subsidy formula allocates both costs and revenues to determine the jurisdictional subsidy using six subsidy allocation formulas:

1. Metrobus Cost Allocation
2. Metrorail Cost Allocation
3. Metrobus Revenue Allocation
4. Metrorail Revenue Allocation
5. Paratransit subsidy allocation
6. Debt service allocation

Formulas 1 and 2: Metrobus and Metrorail Cost Allocation

Cost Classification

Metrobus and Metrorail operating costs are divided into formula cost categories prior to the cost allocation:

- **Metrobus and Metrorail System Costs:** Commonly known as administrative costs (such as finance and legal functions) that support the Metro system
- **Metrobus and Metrorail Service Costs:** Costs associated with service delivery (such as operators, hours and miles of revenue service, and station manager functions)

- **Metrorail Infrastructure Operating Costs:** Costs associated with rail infrastructure and facility maintenance (such as track, stations, structures) that result regardless of the amount of rail service provided

Formula cost categories are determined by aligning to cost categories in the most recently approved Metro National Transit Database (NTD).¹⁰ data submission by the Federal Transit Administration (FTA). The four NTD cost categories of General Administration (GA), Vehicle Maintenance (VM), Vehicle Operations (VO) and Facility Maintenance (FM) are applied as follows:

NTD Cost Category	Metrobus Formula Costs	Metrorail Formula Costs
General Administration by Mode	Metrobus System Cost	Metrorail System Cost
Vehicle Maintenance plus Vehicle Operation by Mode	Metrobus Service Costs	Metrorail Service Costs
Facilities Maintenance by Mode	Metrobus System Costs	Metrorail Infrastructure Operating Costs

The formula cost categories in each fiscal year are determined by taking the proportion of System, Service and Rail Infrastructure Operating Costs by mode based on the NTD categories as above and multiplying each category by mode times the proposed fiscal year budget Metrobus and Metrorail operating costs.

Cost Allocation

The five formula cost categories (Metrobus System Costs, Metrorail System Costs, Metrobus Service Costs, Metrorail Service Cost and Metrorail Infrastructure Operating Costs) are each allocated based on specific variables as described below:

- **Metrobus and Metrorail System Costs by Mode:** Allocated based on two equally weighted variables, Ridership and Population
 - Ridership (see Appendix H, Operating Statistics): Jurisdiction average weekly ridership by mode divided by the Compact area total average weekly ridership by mode.¹¹

¹⁰ See [NTD Uniform System of Accounts \(USOA\) | FTA](#)

¹¹ Determined by Metrobus and Metrorail Passenger Surveys. Riders who live outside the Metro Compact area are excluded

from the calculation.

- Population: Jurisdiction U.S. Decennial Census Population divided by the Metro Compact area census population^{12, 13}
 - **Metrobus Service Costs:** Allocated based on Revenue Hours and Peak Vehicles
 - Revenue Hours¹⁴: Proposed fiscal year bus vehicle operations expense divided by the total proposed fiscal year bus revenue hours (see Appendix H, Annual Revenue Hours). The result is multiplied by each jurisdiction's share of bus revenue miles¹⁵ (see Appendix H, Annual Revenue Mile)
 - Peak Vehicles: Proposed fiscal year bus vehicle maintenance expense divided by the total proposed fiscal year bus peak vehicles¹⁵ (see Appendix H, Active Fleet). The result is multiplied by each jurisdiction's share of bus revenue miles (see Appendix H, Annual Revenue Mile)
 - **Metrorail Service Costs:** Allocated based on Railcar Miles weighted at 90 percent and Peak Vehicles weighted at 10 percent
 - Railcar miles: Proposed fiscal year scheduled revenue railcar miles by rail line (see Appendix H, Railcar Miles) times the proposed fiscal year rail route miles by line and by jurisdiction. The result is divided by the total rail system proposed fiscal year scheduled revenue railcar miles.¹⁶ (see Appendix H, Operating Statistics)
 - Peak vehicles (see Appendix H): Proposed fiscal year scheduled revenue peak vehicles by rail lines times the proposed fiscal year rail route miles by line (see Appendix H, Rail Service Levels Scheduled) and by jurisdiction (see Appendix H). The result is divided by the total rail system proposed fiscal year scheduled
- revenue peak vehicles¹⁶ (see Appendix H, Rail Service Levels Scheduled)
- **Metrorail Infrastructure Operating Costs:** Allocated based on two equally weighted variables, Track Miles and Stations
 - Track miles: Proposed fiscal year rail center line revenue track miles (see Appendix H, Railcar Miles) divided by the proposed fiscal year total rail system center line revenue track miles.¹⁷ (see Appendix H, Railcar Miles)
 - Stations: Proposed fiscal year rail stations by jurisdiction, divided by the proposed fiscal year total number of rail system stations.¹⁸ (see table). Metro operates 98 stations with some stations allocated across jurisdiction¹⁸. Arlington Cemetery is not assigned to any jurisdiction and not in this calculation
- | Jurisdiction | Number of Stations |
|---------------------------|--------------------|
| District of Columbia | 40.27 |
| Montgomery County | 11.50 |
| Prince George's County | 14.23 |
| City of Alexandria | 4.83 |
| Arlington County | 9.33 |
| City of Fairfax | 0.33 |
| Fairfax County | 13.83 |
| City of Falls Church | 0.33 |
| Loudoun County | 2.33 |
| TOTAL¹⁸ | 97 |
- Total does not include Arlington Cemetery Metro Station
See Note 18*

¹² See [Decennial Census of Population and Housing](#)

¹³ The Metrobus System Cost allocation population factor for Loudoun County is set to zero since it does not receive Metrobus service. This is consistent with Board of Directors policy in resolution 2019-34.

¹⁴ Metrobus Service costs allocation (revenue hours and peak vehicles) for the City of Fairfax are allocated as follows: Fairfax County (80%), City of Fairfax (20%). City of Falls Church bus service costs (revenue hours and peak vehicles) are allocated as follows: City of Falls Church (50%), Arlington County (25%) and Fairfax County (25%)

¹⁵ Revenue miles by Metrobus line by jurisdiction, the geo-distribution that determines each jurisdiction's share, is only recalculated in a budget year when a major bus service change takes place.

¹⁶ Rail route miles are the one-way center line mileage for each

rail line or route, accounting for service interlining, which serve as the geo-distribution that determines each jurisdiction's share. Scheduled revenue railcar miles and peak vehicles excludes special event, gap trains, and spares.

¹⁷ For formula purposes, revenue track center line miles are measured within each jurisdiction's borders, measured to each terminal station.

¹⁸ Arlington Cemetery is excluded. Border station allocations are as follows: Capitol Heights: 50% District of Columbia and 50% Prince George's County; Friendship Heights: 50% District of Columbia, 50% Montgomery County; Southern Avenue: 27% District of Columbia, 73% Prince George's County; Van Dorn Street: 50% City of Alexandria, 50% Fairfax County. Reagan National Airport and Washington Dulles International Airport station costs are allocated to each Virginia jurisdiction at a 1/6th share.

Formulas 3 and 4: Metrobus and Metrorail Revenue Allocation

Revenue Classification

Metrobus and Metrorail revenues are divided into passenger and non-passenger revenues, as determined in each proposed fiscal year's operating budget, prior to revenue allocation. As an illustrative example, the passenger and non-passenger revenue categories by mode from the FY2025 budget are shown below:

- Metrobus and Metrorail Passenger Revenues: Revenues from bus and rail passenger fares, passes, and fare programs
- Metrobus Non-Passenger Revenues: Revenues from advertising and other sources
- Metrorail Non-Passenger Revenues: Revenues from parking, joint development, fiber optics, advertising, and other sources

Revenue Allocation

Passenger and non-passenger revenue are allocated based on the methods described below:

- **Metrobus Passenger Revenue:** Metrobus Paid Ridership calculated as the share of aggregate prior fiscal year actual paid bus trips multiplied times the total fiscal year budgeted Metrobus Passenger Revenue¹⁹ (see Appendix H, Operating Statistics)
- **Metrorail Passenger Revenue:** Metrorail Paid Ridership calculated as the share of aggregate prior fiscal year actual paid rail trips multiplied times the total fiscal year budgeted Metrorail Passenger Revenue^{20,21} (see Appendix H, Operating Statistics)
- **Metrobus and Metrorail Non-Passenger Revenue:** Each jurisdiction's operating cost allocation share by mode for Metrobus and Metrorail is determined based on the factors described above in Cost Allocation (weighted average of system, service, and rail infrastructure costs). Within Virginia, the state-level subtotal is

allocated to the jurisdictions within Virginia based on share of track miles. The resulting allocation share by mode is multiplied times the proposed fiscal year budgeted non-passenger revenue by mode (see Chapter 3, Operating Summary by Mode)

Formula 5: Paratransit Subsidy Allocation

The paratransit subsidy is allocated to the jurisdictions using a two-factor formula with sub-allocations used for the Virginia jurisdictions.

1. Direct Costs - The contract carriers' actual per trip, reservation and eligibility charges will be allocated directly to the jurisdictions
2. Overhead Costs - All other (non-direct) costs of the paratransit program will be allocated in proportion to the direct costs

Virginia sub-allocations of direct costs require that per trip charges be adjusted to reflect the average time of trips provided for each jurisdiction. Overhead costs assigned to Virginia jurisdictions will be sub-allocated based on the direct cost allocation as calculated above.

Formula 6: Debt Service Allocation

The allocation of local match and system performance funding is determined in accordance with the CFA. Any debt service from Gross Revenue Transit Bonds is allocated to the jurisdictions based on the request by one or more jurisdiction that Metro issue debt in an amount equal to the jurisdiction's share of local match. Any jurisdiction opting for debt in lieu of making cash payment of its capital subsidy agrees to pay the debt service for the term of the debt. Gross Revenue Transit Bond debt service for a given debt issue is allocated only to each jurisdiction that opted into such debt and shall be paid in accordance with the CFA, as amended. Dedicated Revenue Bonds debt service is paid by Metro from available, non-restricted dedicated revenue proceeds.

¹⁹ Prior fiscal year paid bus trips are allocated by bus line. Bus line paid ridership is distributed by each jurisdiction's share of bus revenue miles by line. For proposed fiscal year budget Major Bus Service changes, the incremental proposed fiscal year budgeted passenger revenue resulting from those services are allocated to each jurisdiction in the proposed budget. Major Service Changes are defined in the Board-approved Title VI Program as may be amended from time to time.

²⁰ Allocation of station level paid rail ridership is distributed by the percentage of each station's riders from in each jurisdiction. For proposed fiscal year budget Major Rail Service changes, the

incremental proposed fiscal year budgeted passenger revenue resulting from those services are allocated to each jurisdiction in the proposed budget. Major Service Changes are defined in the Board-approved Title VI Program as may be amended from time to time.

²¹ Revenue for the City of Fairfax and Falls Church is redistributed to all other Compact jurisdictions. This is done because, except for the share of costs of National and Dulles Airport stations, those cities are not allocated rail service nor infrastructure costs due to the lack of rail service or infrastructure within their borders (e.g., track miles, stations, railcar miles, and peak vehicles).

THIS PAGE INTENTIONALLY LEFT BLANK

Appendix G – Debt Service

Debt Policy/Borrowing Powers

WMATA's Compact allows the Authority to borrow money in pursuit of its mission. All such bonds and evidences of indebtedness are payable solely out of Metro's properties and revenues. The bonds and other obligations, except as may be otherwise provided in the indentures under which they were issued, are direct and general obligations of the Authority. The full faith and credit of Metro is pledged for the prompt payment of the debt service.

There is no legal debt limit for Gross Revenue Transit Bonds which are issued on behalf of Metro's jurisdictional partners in lieu of cash payment of all or a portion of a jurisdiction's capital subsidy obligation for a fiscal year. Debt Service for the life of Gross Revenue Transit Bonds is paid by jurisdiction(s) that opted into the bond issuance. Metro receives \$500 million annually in Dedicated Capital Funding Revenues which is used as security for Dedicated Revenue Bonds. The legal debt limit for Dedicated Revenue Bonds is approximately \$470 million which is the estimated amount of non-restricted Dedicated Capital Funding Revenues which may be used for payment of debt service on Metro's bonds.

Metro is required to make semi-annual payments of principal and interest on each series of bonds. The Authority must comply with certain covenants associated with these outstanding bonds. The most significant are:

- Metro is to punctually pay principal and interest according to provisions in the bond document
- Metro will use its best efforts to operate the transit system properly and in a sound and economical manner. Metro will use its best efforts to maintain, preserve, and keep the system in good repair, working order and condition
- Metro must maintain insurance or self-insurance coverage for assets and operations of the transit system at all times
- Metro will make timely financial disclosures on at least an annual basis

Gross Revenue Transit Bonds

2017A Bonds

In July 2017 WMATA issued bonds (2017A-1) as an advance refunding of the series 2009A bonds and advance crossover refunding bonds (2017A-2) for the

2009B series bonds. The 2009A and the 2009B series bonds were refunded and retired on July 1, 2019.

2017B Bonds

On August 17, 2017, Metro issued new money Gross Revenue Transit Bonds, series 2017-B bonds in the principal amount of \$496.5 million. Net bond proceeds with premiums totaled \$588.9 million. The bonds provide for semi-annual payments of interest and annual payments of principal, with final maturity in July 2042. To service interest on debt through July 2018, \$21.7 million was placed in a capitalized interest fund. The annual jurisdictional debt service payment on the bonds is \$35.8 million. One jurisdiction fully opted out of the bond issuance, and two jurisdictions partially opted out of the bond issuance. In all, the three jurisdictions provided \$78.7 million in funding to bring the total capital project fund related to the bond issuance to \$575.2 million.

2018 Bonds

On December 18, 2018, Metro issued new money Gross Revenue Transit Bonds, series 2018 bonds in the principal amount of \$239.9 million. Net bond proceeds with premiums totaled \$269.1 million. The bonds provide for semi-annual payments of interest and annual payments of principal, with final maturity in July 2043. To service interest on the debt through July 2019, \$6.4 million was placed in a capitalized interest fund. The annual jurisdictional debt service payment on the bonds is approximately \$17.3 million. Five jurisdictions fully opted out of the bond issuance.

Dedicated Revenue Bonds

2020A Bonds

On June 11, 2020, Metro issued new money Dedicated Revenue Bonds. This sale, in the principal amount of \$545.0 million, was the inaugural issue under the Dedicated Capital Funding Revenues credit. Net bond proceeds with premium totaled \$690.7 million. The bonds provide for semi-annual payments of interest and annual payments of principal, with final maturity in July 2045. To service interest on the debt through July 2022, \$55.4 million was placed in a capitalized interest fund. Principal payments were deferred until July 2023. The annual debt service payment on the bonds is \$39.1 million. Debt service is paid from unrestricted Dedicated Capital Funding revenues proceeds.

2021A Bonds

On June 8, 2021, Metro issued new money Dedicated Revenue Bonds. This sale, in the principal amount of \$784.4 million, was issued under the Dedicated Capital Funding Revenues credit. Net bond proceeds with premium totaled \$970.0 million. The bonds provide for semi-annual payments of interest and annual payments of principal, with final maturity in July 2046. Principal payments were deferred until July 2023, after which time the level annual debt service payment on the bonds is \$52.0 million. Debt service is paid from unrestricted Dedicated Capital Funding Revenues proceeds.

2023A Bonds

On March 14, 2023, Metro issued new money Dedicated Revenue Bonds. This sale, in the principal amount of \$392 million, was issued under the Dedicated Capital Funding Revenues credit. Net bond proceeds with premium totaled \$425.0 million. The bonds provide for semi-annual payments of interest and annual payments of principal, with final maturity in July 2051. Annual debt service payment on the bonds through 2043 is \$25.8 million. Debt service is paid from unrestricted Dedicated Capital Funding Revenues proceeds.

Second Lien 2023A Bonds

On August 17, 2023, Metro issued new money Second Lien Dedicated Revenue Bonds. This sale, in the principal

amount of \$797.8 million, was issued as a second lien, subordinate to the Series 2020A, 2021A, and 2023A, under the Dedicated Capital Funding Revenues credit. Net bond proceeds with premium totaled \$869.8 million. The bonds provide semi-annual payments of interest and annual payments of principal with debt service payments of \$50.5 million through 2045 and sinking fund payments in 2046 through 2053 to retire two term bonds maturing in July 2048 and July 2053. Debt service is paid from unrestricted Dedicated Capital Funding Revenues proceeds.

Second Lien 2024A Bonds

On July 24, 2024, Metro issued new money Second Lien Dedicated Revenue Bonds. This sale, in the principal amount of \$635.9 million, was issued on parity with the Second Lien Series 2023A bonds under the Dedicated Capital Funding Revenues credit and subordinate to the Series 2020A, 2021A, and 2023A, under the Dedicated Capital Funding Revenues credit. Net bond proceeds with premium totaled \$666.1 million. The bonds provide annual interest-only payments through 2047 of \$31.1 million with semi-annual interest and annual principal payments through 2054 of \$37.2 million followed by semi-annual interest and annual principal payments through 2059 of \$112.5 million. Debt service is paid from unrestricted Dedicated Capital Funding Revenues proceeds.

Lines of Credit

Metro has access of up to \$500 million in short-term lines of credit, for terms less than two years. The lines of credit support Metro's capital program and are available to manage cash flow needs. The lines of credit may be renewed annually in May and October.

Appendix H – Operating Statistics

Metrobus Revenue Vehicle Fleet Management Plan

The Metrobus Revenue Vehicle Fleet Management Plan is a statement of the processes and practices by which Metro establishes its current and projected Metrobus revenue vehicle fleet and facilities requirements. It includes a description of revenue service planned to accommodate Metrobus ridership demand, service adjustments, as well as an assessment and projection of needs for Metrobus maintenance programs and facilities.

METROBUS OPERATING STATISTICS

	FY2023 Actual	FY2024 Actual	FY2025 Budget	FY2026 Budget
STATISTICS	Bus Miles (000s) ¹	49,843	49,556	48,555
	Revenue Bus Miles (000s) ¹	38,220	38,528	38,060
	Passengers (000s)	102,477	117,596	111,408
	Total Active Fleet	1,572	1,571	1,556
	Passenger Revenue (\$000s)	\$55,635	\$50,108	\$53,703
	Operating Revenue (\$000s)	\$73,222	\$87,560	\$67,022
	Operating Expenses (\$000s)	\$760,500	\$767,571	\$840,621
	Net Subsidy (\$000s) ²	\$432,002	\$434,696	\$748,591
RATIOS	Cost Per Bus Mile	\$15.26	\$15.49	\$17.31
	Passengers Per Bus (000s)	65.19	74.85	71.60
	Passengers Per Revenue Bus Mile	2.68	3.05	2.93
	Cost Per Passenger	\$7.42	\$6.53	\$7.55
	Subsidy Per Passenger	\$4.22	\$3.70	\$6.72
	Average Passenger Fare ³	\$0.54	\$0.43	\$0.48
	Percentage of Cost Recovered from Passenger Revenues ⁴	7.3%	6.5%	6.4%
	Percentage of Cost Recovered from Operating Revenues ⁵	9.6%	11.4%	8.0%

1. Bus miles and revenue bus miles are scheduled and not actual

2. Net Subsidy includes Covid-related federal relief funds in FY2021 - FY2025

3. Average fare is lower than base fare due to the impact of the transfer discount, senior, low-income and student discounts, passes, and the temporary suspension of fare collection between March 2020 and January 2021 and fare evasion

4. Farebox Recovery ratio

5. Cost Recovery ratio

1. Revenue bus miles are scheduled and not actual

2. Total excludes DC School Capacity of 13,772 Revenue Hours, 118,598 Revenue Miles, and 12 Peak vehicles allocated to District of Columbia

Metrorail Revenue Vehicle Fleet Management Plan

The Metrorail Revenue Vehicle Fleet Management Plan is a statement of the processes and practices by which Metro establishes its current and projected Metrorail revenue vehicle fleet size requirements and operating spare ratio. It documents how service goals are applied to existing and forecast levels of ridership to establish fleet requirements for Metrorail service, as well as how these requirements are affected by vehicle maintenance needs, expansions of the Metrorail system, and other factors affecting the operation of the system. Additionally, it documents the key challenges Metro faces in meeting its service and maintenance goals.

MetroAccess Revenue Vehicle Fleet Management Plan

The MetroAccess Revenue Vehicle Fleet Management Plan is a tool that provides information, analysis, and recommendations about the anticipated growth in paratransit ridership, and the current and projected revenue vehicle requirements for MetroAccess to meet the demand as well as an assessment and projection of needs for paratransit vehicle maintenance.

PERFORMANCE MEASURE DEFINITIONS

Last Reviewed November 9, 2023 for Q1 report

Goal 1: Service Excellence

Customer Satisfaction

= Number of survey respondents (active riders) who marked their last trip on Metrorail / Metrobus / MetroAccess as “very satisfactory” OR the second highest category in a five -point scale ÷ Total number of Respondents

Surveying customers about the quality of Metro’s service delivery provides a mechanism to continually identify those areas of the operation where actions to improve the service can maximize rider satisfaction.

Customer satisfaction is defined as the percentage of customer survey respondents who rated their last trip within a 30-day period on Metrobus, Metrorail, or MetroAccess as a “5” or “4” in the survey, with “5” denoting “very satisfied” and “1” denoting “very unsatisfied”. Metro distributes this survey through address-based sampling on a biweekly basis, and respondents must meet specific criteria to participate. Metro summarizes results quarterly.

Objective 1A: Safety and Security

Part 1 Crime Rate

= Number of Part 1 Crimes ÷ (Total number of riders ÷ 1,000,000)

(In other words, the number of crimes per million passenger trips)

The FBI’s Uniform Crime Reporting program classifies the following as Part 1 Crimes: Criminal Homicide, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny, Motor Vehicle Theft, and Arson. To calculate Metro’s Part 1 Crime Rate, MTPD looks at these crimes committed in the following areas: 1) on buses and bus stops, 2) on trains and in rail stations, 3) at Metro-owned parking lots, 4) at other Metro Facilities such as rail yards, bus divisions, headquarters, and MetroAccess vehicles, and 5) in non-WMATA locations but involving WMATA or MTPD property. This measure provides an indicator of security customers experience when traveling the Metro system. Increases or decreases in crime can influence whether customers feel secure in the system.

Employee and Customer Assault Rate

= Number of employee and customer assaults reported to the National Transit Database ÷ (Total vehicle revenue miles ÷ 10 million)

(In other words, the number of reportable assaults per ten million miles driven while vehicles are in revenue service)

The Federal Transit Administration criteria for reporting assaults is any unlawful physical assault upon an employee or customer of Metro while on Metro property (including vehicles) that results in immediate medical attention away from the scene. These are different criteria than those used by OSHA in the employee injury rate.

Customer and employee safety is the highest priority for Metro and a key measure of quality service. The assault rate is an indicator of how well the service is meeting this security objective.

Customer Perception/Satisfaction: Safety from Crime

= Number of survey respondents (active riders) who responded to whether they felt safe from crime and harassment on their last Metrorail/Metrobus/MetroAccess trip as “very satisfactory” OR the second highest category in a five-point scale ÷ Total number of respondents

Customer satisfaction with safety from crime or harassment is defined as the percent of customer survey respondents who responded whether they felt safe from crime or harassment on their last trip within a 30-day period on Metrobus, Metrorail, or MetroAccess as a “5” or “4” in the customer satisfaction survey, with “5” denoting “very satisfied” and “1” denoting “very unsatisfied”. Metro distributes this survey through address-based sampling on a biweekly basis, and respondents must meet specific criteria to participate. Results are summarized quarterly.

This measure provides insight into how customers perceive their safety from crime within the Metro system.

Customer Injury Rate

= Number of customer injuries reported to the National Transit Database ÷ (Total vehicle revenue miles ÷ 10 million)

(In other words, the number of customer injuries per ten million miles driven while vehicles are in revenue service)

Customer injury rate is based on National Transit Database (NTD) reporting criteria. It includes customers injured during Metro operations where the injury requires immediate medical attention away from the scene.

Customer safety is the highest priority for Metro and a key measure of quality service. Customers expect a safe and reliable ride each day. Customer injury rate is an indicator of how well the service is meeting this safety objective.

Employee Injury Rate

= Number of employee injuries reported to the Department of Labor ÷ (Total work hours ÷ 200,000)

200,000 hours is equivalent to 100 employees working full-time for one year. In other words: the number of employees injured per 100 employees

An employee injury is recorded based on OSHA 1904 Recordkeeping Criteria, when the injury is (a) work-related; and, (b) one or more of the following happens to the employee: 1) fatality, 2) injury or illness that results in loss of

consciousness, days away from work, restricted work, or job transfer 3) medical treatment received above first aid, 4) diagnosed case of cancer, chronic irreversible diseases, fractured or cracked bones or teeth, and punctured eardrums, 5) special cases involving needlesticks and sharps injuries, medical removal, hearing loss, and tuberculosis.

Per the Occupational Safety and Health Act, employers are obligated to provide a workplace free of recognized hazards which may cause employee death or serious injury. OSHA-recordable injuries are a key indicator of how safe employees are in the workplace.

Metrorail Crowding

= Number of crowded passenger minutes ÷ Total number of passenger minutes

Crowding is a key driver of customer satisfaction with Metrorail service. This measure calculates the percentage of passenger time spent on vehicles that exceed crowding guidelines per WMATA service standards of 100 passengers per car (the pre-pandemic definition of crowding, which WMATA returned to in FY23). Crowding informs decision making regarding asset investments, service plans and scheduling. Factors that can affect crowding include: service reliability, missed trips insufficient schedule, or unusual demand.

Metrobus Crowding

= Number of crowded passenger minutes ÷ Total number of passenger minutes

Crowding is a key driver of customer satisfaction with Metrobus service. The measure calculates the percentage of passenger time spent on vehicles that exceed crowding guidelines per WMATA service standards of 120% of seated capacity during peak for Bus Rapid Transit, framework, and coverage routes (see pages 5-6 of the Metrobus Service Guidelines for explanations of these route types), 100% off peak and at all times on commuter routes.

In FY23, WMATA returned to the pre-pandemic definition of crowding. Prior to the adoption of the Metrobus Service Guidelines in December 2020, crowding guidelines were 120% of seated load for all trips except Metrobus Express service during peak periods.

Crowding informs decision making regarding asset investments, service plans and scheduling. Factors that can affect crowding include: service reliability, missed trips insufficient schedule, or unusual demand.

Objective 1B: Reliability

Metrorail On-Time Performance

= Number of journeys completed on time ÷ Total number of journeys

Rail Customer On-Time Performance (OTP) communicates the reliability of rail service, a key driver of customer satisfaction and ridership. OTP measures the percentage of customers who complete their journey within the maximum amount of time it should take per WMATA service standards. The maximum time is equal to the train runtime + a headway (scheduled train frequency) + several minutes to walk between the fare gates and platform. These standards vary by line, time of day, and day of the week. Actual journey time is calculated from the time a customer taps a SmarTrip® card to enter the system, to the time when the customer taps to exit.

Factors that can affect OTP include: railcar availability, fare gate availability, elevator and escalator availability, infrastructure conditions, speed restrictions, single-tracking around scheduled track work, railcar delays (e.g., doors), or delays caused by sick passengers.

Metrobus On-Time Performance

= **Number of timepoints delivered on-time based on a window of 2 minutes early and 7 minutes late ÷ Total number of timepoints delivered**

“Timepoints”: major stops on a bus route that are used to create bus schedules.

Bus on-time performance (OTP) communicates the reliability of bus service, a key driver of customer satisfaction and ridership. Factors that can affect OTP include: traffic congestion, detours, inclement weather, scheduling, vehicle reliability, operational behavior, or delays caused by the public (crime, protests, medical emergencies, etc.). Note that this measure only includes service delivered; it does not include bus trips that were missed.

MetroAccess On-Time Performance

= **Number of vehicle arrivals at the pick-up location within the 30-minute on-time widow ÷ Total stops**

This measure illustrates how closely MetroAccess adheres to customer pick-up windows on a system-wide basis. MetroAccess customers schedule trips at least one day in advance, and are given a 30-minute pick-up window. MetroAccess on-time pick-up performance is essential to delivering quality service to the customer.

Metrorail Percent of Planned Service Delivered

= **Number of trips delivered ÷ Number of scheduled trips**

This measure monitors Metro's “guarantee of service”—whether Metro is providing all the service that was scheduled and committed to. It helps to offer more clarity on the relative magnitude of various operational issues on daily rail operation, for example, operator or railcar shortage, and incident response strategy. It is an important indicator of transit service quality and productivity. Missed trips can have a negative impact on the perceived reliability of rail service and can result in longer customer wait times, missed transfers, etc. which lead to customer inconvenience and dissatisfaction.

Metrobus Percent of Planned Service Delivered

$$= \text{Number of scheduled trips delivered} \div \text{Number of scheduled trips}$$

This measure communicates whether Metro is meeting the level of service committed to customers through the budget and scheduling process. It is also a key measure of reliability and customer satisfaction; when trips are missed, customers experience much longer wait times than expected and overall confidence in the system falls. Monitoring whether service was delivered helps Metro identify issues with staffing, planning and scheduling, bus availability and reliability, and service interruptions.

MetroAccess Missed Trips

$$= \text{Number of missed trips} \div \text{number of completed trips}$$

Missed Trips are trips that a customer does not take if a vehicle arrives past its designated pick-up window, or trips where the driver does not dwell the minimum required time.

Elevator/Escalator Availability

$$= \text{Hours in service} \div \text{Revenue operating hours}$$

Hours in service = Operating hours – Hours out of service

Revenue operating hours = Operating hours per unit * number of units

(In other words, the percentage of time that Metrorail escalators or elevators in stations and parking garages are in service during operating hours)

Escalator/elevator availability is a key component of customer satisfaction with Metrorail service. This measure communicates system-wide escalator and elevator performance (at all stations over the course of the day) and will vary from an individual customer's experience.

Customers access Metrorail stations via escalators to the train platform, while elevators provide an accessible path of travel for persons with disabilities, seniors, customers with strollers, and travelers carrying luggage. An out-of-service escalator requires walking up or down a stopped escalator, which can add to travel time and may make stations inaccessible to some customers. When an elevator is out of service, Metro is required to provide alternative services which may include shuttle bus service to another station.

Objective 1C: Convenience

Metrorail and Metrobus Accuracy of Real-Time Arrival Information

$$= \text{Number of accurate predictions} \div \text{Number of predictions}$$

Rail and Bus Prediction Accuracy measure the quality of Metro's real time arrival prediction data that customers use to plan their trips through Metro's online platform and other third-party trip planning applications. The predictions are compared to the actual time the vehicle (either train or bus) arrived at the stop according to Metro internal records. Both Bus and Rail Prediction Accuracy use the same principles, methods, and standards.

Which predictions are evaluated? To make the measure as customer focused as possible, this measure only evaluates the most meaningful predictions; vehicles begin making predictions well before they begin service on a particular trip, and can make predictions for stops well before they are scheduled to arrive. Customers typically only use prediction information to plan in the very near term and are mostly only looking for the next arrival. To account for this, this measure excludes predictions made well in advance, and evaluates only predictions made within 30 minutes of the vehicle's arrival.

What is considered accurate? Prediction Accuracy compares the predicted time of a vehicle's arrival to the actual time of its arrival. A perfect prediction is when the predicted arrival time and the actual arrival time match exactly—but it is rare for a predicted and actual arrival to match to the second. The goal is not to be perfect, but to provide customers with enough good information so they can effectively plan their trips and are not waiting long periods of time. Therefore, the measure creates a range of allowable error within which a prediction is considered accurate. If the prediction falls outside that range, it is considered inaccurate.

The accuracy range follows two key principles:

1. Predictions should become increasingly more accurate as a vehicle gets closer to its stop. Errors have greater impacts on customer as a vehicle gets closer to its stop. Customers are more likely to use these predictions, and a two-minute difference has a greater impact if the vehicle is five minutes away than when the vehicle is 25 minutes away.
2. A vehicle arriving before its predicted arrival (Early) is worse than a vehicle arriving after its predicted arrival (Late). If customers follow predictions exactly, they will miss their trip if the vehicle was earlier than its prediction.

Using these principles, this measure uses the following time ranges to determine whether a prediction is accurate. Prediction Accuracy is essentially the number of predictions that fall within these ranges out of all predictions made within 30 minutes of a vehicle's arrival.

Time before arrival	Lower Bound (Early)	Upper Bound (Late)
0-3 mins	-1 min	1 min
3-6 mins	-1.5 mins	2 mins
6-12 mins	-2.5 mins	3.5 mins
12-30 mins	-4 mins	6 mins

Last-Mile Connectivity / Bicycle Access

Percentage of survey respondents who reported using a bicycle to embark or disembark from a rail station

Last-Mile Connectivity measures the percentage of customers who use a bicycle to get to a Metrorail station to start their journey and/or get to their destination from a Metrorail station. Metro's Board and the Strategic Transformation Plan have set a target of 3.5% by 2030. Data for this measure come from the Rail Customer Survey, which occurs every three years. Most recent data are from 2022 with the next data collection scheduled for 2025.

Appendix J – Glossary of Terms

Accounting Basis	The accounting principles and methods appropriate for a government enterprise fund. Financial statements are prepared on the accrual basis of accounting, under which revenues and expenses are recognized when earned or incurred.
Accrual Basis	Basis of Accounting where revenues are recognized when they are measurable and earned. Expenses are recorded when incurred.
American Rescue Plan Act of 2021 (ARPA)	A law that provided economic and other relief from the Covid-19 pandemic, including \$1.9 trillion in funding for individuals, businesses, and state and local governments.
Approved Budget	The revenue and expenditure plan approved by the WMATA Board of Directors for a specific one-year period starting on July 1.
Articulated bus (Also see Slinky bus)	A bus that comprises two or more rigid sections linked by a pivoting joint (articulation) enclosed by protective bellows inside and outside and a cover plate on the floor.
Assets	Property owned by Metro which has monetary value with a future benefit.
Audit	An inspection of an individual or organization's accounts, typically by an independent body.
Automatic Door Operations	A technology allowing train doors to open automatically when the train is properly aligned with the station platform.
Automatic Train Operations	A technology that can allow the automated control of a train's acceleration, deceleration and speed.
Balanced Budget	Refers to a budget where estimated revenues are equal to or greater than estimated expenses.
Better Bus Network	Refers to Metro's overarching initiative to improve Metrobus for the region, including new facilities, zero-emission vehicles, improved bus communications and more bus lanes and transit signals.
Board of Directors	The Board of Directors is a 16-member body composed of eight voting and eight alternate members responsible for corporate governance of WMATA.

Bond	A written promise to pay a specified sum of money (face value) at a specified future date and the proposed means of financing them.
Bond Proceeds	Refers to additional local capital funds raised, when necessary, by issuance of revenue bonds in the municipal markets.
Budget	Refers to a financial operation embodying an estimate of revenues and expenditures for a fiscal period of 12 months or longer. This can be an operating or capital budget.
Budget Calendar	Refers to a schedule of key dates for specific milestones in the preparation and approval of a budget.
Budget Document	Refers to the official written statement and the supporting numbers prepared by the financial staff for presentation for approval by the Board.
Budget Message	Refers to the general discussion of the budget document presented in writing as an overview, usually by the head of the organization.
BudStat	Monthly meeting to discuss status of Operations' financials and procurements by office with senior leadership across Operations, Procurement and Finance departments.
Bus Shelter	A shelter for riders to wait for the bus - a canopy area with or without bench seating. In addition, the shelter includes a display case with bus information for Metrobus riders and is equipped with a trash receptacle.
Bus Stop	Refers to a stop indicated by a sign for riders to wait for the bus.
Canopy	The roof-type structure above Metrorail station entrances or above bus stations/terminals used to protect the entryway or customers from inclement weather.
Capital Assets	Assets of a material value that have a useful life of more than one year. Also called fixed assets.
Capital Budget	The portion of the budget that provides for the funding of improvements, projects and major equipment purchases.
Capital Improvement Program	The six-year plan of capital projects to be completed by Metro.

Cash Basis	Basis of Accounting whereby revenue and expense are recorded on the books of account when received and paid, respectively, without regard to the period in which they are incurred.
Collective Bargaining Agreement	Refers to a written legal contract between an employer and a union representing employees covering topics such as, but not limited to, wages, work hours and employment conditions.
Compact	Refers to interstate compact creating WMATA; this is a special type of contract or agreement between the three jurisdictions within which the organization operates.
Congestion Mitigation & Air Quality Improvement Program	A federally funded program of surface transportation improvements designed to improve air quality and mitigate congestion.
Contingency Funds	Operating and capital funds reserved for unexpected expenditures during the fiscal year which were not addressed in the annual budget.
Coronavirus (Also see Covid-19)	Refers to a family (Coronaviridae) of large single-stranded RNA viruses that have a lipid envelope studded with club-shaped spike proteins, infect birds and many mammals including humans, and include the causative agents of MERS, SARS, and Covid-19; also, an illness caused by a coronavirus.
Coronavirus Aid, Relief, and Economic Security Act (CARES)	A law which provided an economic relief package of over \$2 trillion in 2020 to American people as protection against the public health and economic impacts of Covid-19.
Coronavirus Response and Relief Supplemental Appropriations Act of 2021 (CRRSAA)	A law which provided supplemental appropriations for Covid-19 relief which included \$14 billion allocated to support the transit industry.
Cost Allocation	Refers to a process by which indirect or common costs are distributed to multiple cost objects (i.e., job, task, or business unit) based on a prescribed basis or methodology. For example, overhead costs such as IT support are allocated to the transportation modes on a percentage basis.
Covid-19 (Also see Coronavirus)	First identified in Wuhan, China in December 2019, Covid-19 refers to a mild to severe respiratory illness caused by a coronavirus (severe acute respiratory syndrome coronavirus 2 of the genus Betacoronavirus) and is transmitted chiefly by contact with infectious material (such as respiratory droplets) or with objects or surfaces contaminated by the causative virus, and is characterized especially by fever, cough, and shortness of breath and may progress to pneumonia and respiratory failure.

DC Circulator	Refers to a bus route funded by the DC Government with support from Metro to take persons to Washington DC's premier cultural, shopping, dining, and business destinations.
Deadhead	Refers to non-revenue time when a bus or train is not carrying revenue passengers, usually a trip from, to, or between lines, yards or garages. Usually this refers to bus or rail travel to or from the garage or yard to a terminus or station where revenue service begins or ends.
Decarbonization	Reduction or elimination of carbon dioxide emissions from process.
Deficit	Refers to an excess of Liabilities over Assets or Expenses over Revenue.
Department	A major organizational unit that has overall responsibility for an operation or a group of operations within a functional area.
Development and Evaluation	An initial investment into the planning, development and evaluation of potential or proposed capital projects to determine if a project is viable and should be pursued.
Division	Refers to a garage and yard facility where buses are stored, maintained, and dispatched into service.
DMV Moves	A joint initiative of the Metropolitan Washington Council of Governments and Washington Metropolitan Area Transit Authority to create a unified vision and sustainable funding model for the region's transit network.
Electronic Health Record	Digital version of a patient's health record implemented to enhance availability and security.
Enterprise Fund	Refers to the sole fund for Metro with income sources classified as passenger fares and parking fees, federal funds, state and local funds, dedicated funding, business revenues, other sources and debt.
Enterprise Resource Planning	Software solution used by organizations to manage daily business functions such as human capital, payroll, enterprise learning management, procurement, financial management and reporting.
Fairfax Connector	The bus system that runs seven days a week with service throughout Fairfax County, Virginia and to Metrorail stations on the Orange, Blue and Yellow lines, including the Pentagon.
Fare box recovery ratio	Refers to the ratio of passenger fares (including inter-agency agreements related to fares) to total operating costs.

Farecard	Refers to a paper pass used to ride Metrorail or Metrobus. Paper farecards are no longer accepted by bus or at rail faregates (as of March 2016).
Fare Evasion	When an individual uses transit or attempts to do so without paying the posted fare.
Fiscal Year	A 12-month period used to report financial results. WMATA's fiscal year extends from July to June.
Four-point Securement System	Refers to an onboard securement system for wheelchairs, three-wheel and four-wheel scooters. The system incorporates four seatbelt-type straps that attach to the frame of a mobility device as a way to keep it from moving or rolling while on the bus.
Head Sign	Refers to the sign above the front windshield of a bus describing the line number or letter, its line name, and destination.
Headway (Frequency)	Refers to time intervals between vehicles moving in the same direction on a particular route. Headway can change on a line during the day as rider demand changes.
In-fill Station	A Metrorail station built between two existing stations after the stations on either side are already in use.
Infrastructure	Assets that make up WMATA's transportation system, including maintenance facilities, rail tracks, signals, stations, elevated structures and power stations.
Instructional System Design	Practice of systematically designing, developing and delivering instructional materials and experiences, both digital and physical, to support long term learning
Joint Development Agreement	A Board-approved agreement between WMATA and an outside developer collaborating to work on a project or initiative.
Jurisdictional Subsidy	Funding provided to Metro by its jurisdictional partners for the operating budget.
Key Performance Indicator	Performance metrics aligned to strategic goals and objectives to monitor progress toward an established goal.
Kiss and Ride	Refers to an area within a station where commuters are driven by private car and dropped off to board Metrobus or Metrorail.
Kneeling Bus (Also see Passenger Lift)	Refers to a feature on buses that lowers the floor to the curb or to near-curb level to make it easier for passengers to board, especially for seniors and persons with disabilities.

Layover Time (Also known as Spot Time)	Refers to time built into a schedule between arrival and departure for bus drivers to rest; minimum times are set by union contract. Layovers normally occur at each end of a route to allow for a driver's break and schedule recovery, but they may be scheduled at other points to allow for timed transfer connections.
Liability	A debt or legal obligation arising from transactions in the past which must be liquidated, renewed or refunded at a future date.
Metro Lift	An income-qualified reduced fare program that offers a 50 percent discount on Metrobus and Metrorail trips for customers in D.C., Maryland, and Virginia who qualify for the Supplemental Nutritional Assistance Program.
Mezzanine	The area of a Metrorail station near the entrance level that contains the faregate, fare vendors and kiosk.
Modified Accrual Basis	An accounting method that combines accrual-basis accounting with cash-basis accounting. Modified accrual accounting recognizes revenues when they become available and measurable, and with a few exceptions, recognizes expenditures when liabilities are incurred.
NextBus	Refers to the application that uses satellite technology for Metrobus locations to track the arrival times for bus operators and customers.
Office	An organizational unit that falls under the structure of a department.
Operating Expenses	Costs associated with the day-to-day operations of service delivery, including, but not limited to, labor, material, fuel, power, security and professional services.
Operating Revenues	Revenues generated through Metro operations, including revenue from passenger fares, parking, advertising, joint development, fiber option leases, investment income and other sources of revenue generated through Metro operations.
Paratransit	Refers to scheduled service for people who cannot use regular fixed-route bus service. MetroAccess uses vans and sedans to provide this service in the Washington Metropolitan area.
Park and Ride	Refers to the parking facility available for riders at Metrorail stations.
Passenger Lift (Also see Kneeling Bus)	A mechanical device, either a lift or ramp, that allows wheelchair or scooter users as well as other mobility-impaired passengers to board a bus without climbing the steps.
Peak Service	Refers to weekday a.m. and p.m. service during commute hours that carries a maximum number of passengers.

Personnel Expenses	Refers to expenditure in the operating budget for salaries and wages paid for services performed by Metro employees as well as fringe benefits costs associated with their employment.
Platform Hours	The total scheduled time a bus spends from pull-out to pull-in at the division. Platform hours are used as a benchmark to calculate the efficiency of service by comparing "pay to platform" hours.
Preventive Maintenance	Refers to operating maintenance costs eligible for reimbursement from the capital budget, subject to Federal Transit Administration (FTA) approval.
Programmed Reader	A machine that is attached to the fare gate/fare box where magnetic fare media can be read on Metrorail and Metrobus.
Revenue	An increase in fund assets from operational activity such as passenger fares, parking and advertising.
Revenue Bonds	A bond on which debt service is payable solely from a restricted revenue source.
Revenue Hours (Also known as Revenue Service)	Refers to all scheduled time bus/rail spends serving passengers, which can also be defined as platform hours minus deadhead and layover time.
Revenue Passengers	Refers to passengers who enter the system through the payment of a fare.
Revenue trip (Also see Linked/Unlinked Trip)	Refers to any linked or unlinked trip that generates revenue by cash payment, use of a pass, and/or any other means of payment.
Ride-On	Refers to Montgomery County regional bus transit system.
Safety Management System	Systematic way to continuously identify and monitor hazards, control risks, and assure of effective risk controls
Slinky bus	Refers to a nickname used by passengers for an articulated bus.
SmartStudent Pass	A monthly pass for unlimited travel on Metrobus and Metrorail for students under 19 years of age who live and attend school in the District of Columbia.
SmarTrip®	Refers to a technology built and designed by Cubic Transportation Systems, Inc., a subsidiary of San Diego-based Cubic Corporation to add and deduct value from an

	electronically encoded card when a rider passes the card near a programmed reader on Metrobus and at fare gates on Metrorail.
STAT Program	Meetings and reports that facilitate analysis and planning focused on reviewing performance results, understanding drivers and trends and developing action plans.
Strategic Buses	Refers to spare buses available for service in the event that a bus in route is taken out of service.
Strategic Transformation Plan	Refers to Metro's guiding document adopted in February 2023, <i>Your Metro, The Way Forward</i> , describing Metro's strategy and actions for the next five-plus years
Subsidy	Refers to funding received from jurisdictional funding partners in the Washington Metropolitan area consisting of Washington DC, suburban Maryland (Montgomery County and Prince George's County) and Northern Virginia counties of Arlington, Fairfax and Loudoun, and the Cities of Alexandria, Fairfax and Falls Church.
TheBus	Prince George's County, Maryland's local bus service.
Transit Advertising	Refers to ads posted on the exterior and interior of buses and rail cars.
Transit Oriented Development	Projects designed to advance the use of public transportation by promoting economic development activities at and around Metro stations.
Tripper	A short piece of work (usually on a bus, but sometimes on a train) not long enough to qualify as complete run or full day's work. May involve vehicles from one line or route being re-routed to serve another.
Trunk Line	A route operating along a major corridor that carries a large number of passengers and operates at headway frequencies of 15 minutes or less.
Unlinked Passenger Trip	Unlinked passenger trips count each boarding as a separate trip.
U-Pass	Metro's college program offering students at participating schools unlimited rides on Metrorail and Metrobus throughout the semester.
Video Surveillance System	Extensive camera network system that provides video coverage across the rail and bus networks, including in stations and at many WMATA-owned support facilities.
Wayfinding	Methods by which people orient themselves in physical space and navigate from place to place.

Appendix K– Glossary of Acronyms and Abbreviations

A

AAC	Accessibility Advisory Committee
AC	Alternating Current
ACFR	Annual Comprehensive Financial Report
ACS	American Community Survey
ACS	Authorized Construction Site
ACSO	Assistant Chief Safety Officers
ADA	Americans with Disabilities Act
ADO	Automatic Door Operations
AFC	Automatic Fare Collection
AIG	Association of Inspectors General
APC	Automatic Passenger Counter

How to Contact Metro

By mail or in person:

Washington Metropolitan Area Transit Authority
300 Seventh Street SW, Washington, DC 20024

To reach Metro headquarters by Metrorail, the closest station is L'Enfant Plaza and the closest station exit is at D and 7th Streets. To reach Metro headquarters by Metrobus, use routes 52 or 74.

By website:

<http://www.wmata.com>

By telephone:

Metro Information

202-637-7000 (TTY 202-962-2033)
Metrobus and rail schedules, fares, parking, Bike 'N Ride program, and more
Weekdays: 7:00 a.m. to 8:00 p.m.
Saturday and Sunday: 8:00 a.m. to 8:00 p.m.

Customer Relations

202-637-1328
Suggestions, commendations, comments
Weekdays: 8:30 a.m. to 5:00 p.m.

MetroAccess
